## AI-900 Pass4sure Training - AI-900 Latest Vce & AI-900 Free Demo

The NewPassLeader team regularly updates the AI-900 exam pdf format to make sure that applicants receive the most up-to-date Microsoft AI-900 exam questions. Additionally, our AI-900 PDF is designed to be user-friendly and accessible on any smart device, which means that students can prepare for the AI-900 from anywhere, at any time.

## Microsoft Azure AI Fundamentals Sample Questions (Q225-Q230):

### NEW QUESTION # 225

You need to identify harmful content in a generative AI solution that uses Azure OpenAI Service. What should you use?

- A. Language
- B. Video Analysis
- C. Face
- **D. Content Safety**

**Answer: D**

Explanation:

According to the Microsoft Azure AI Fundamentals (AI-900) curriculum and Azure OpenAI documentation, the appropriate service for detecting and managing harmful, unsafe, or inappropriate content in text, images, or other generative AI outputs is Azure AI Content Safety.

Azure AI Content Safety is designed to automatically detect potentially harmful material such as hate speech, violence, self-harm, sexual content, or profanity. It ensures that generative AI applications like chatbots, image generators, and content creation tools comply with Microsoft's Responsible AI principles - specifically Reliability & Safety and Accountability.

This service integrates directly with the Azure OpenAI Service, meaning that when developers build AI solutions using models like GPT-4 or DALL E, they can use Content Safety to filter and moderate both input prompts and model outputs. This protects users from unsafe or offensive content generation.

Let's analyze why the other options are incorrect:

\* A. Face - The Face service detects and analyzes human faces in images or videos. It is unrelated to moderating harmful textual or generative content.

\* B. Video Analysis - This service analyzes video streams to detect objects, actions, or events but not inappropriate or harmful text or imagery from AI models.

\* C. Language - The Azure AI Language service focuses on text understanding tasks like sentiment analysis, entity recognition, and translation, not content safety filtering.

Therefore, per Microsoft Learn's official AI-900 guidance, when identifying or filtering harmful content in a generative AI solution built with Azure OpenAI, the correct and verified service to use is Azure AI Content Safety.

### NEW QUESTION # 226

You are building an AI system.

Which task should you include to ensure that the service meets the Microsoft transparency principle for responsible AI?

- A. Provide documentation to help developers debug code.
- B. Enable autoscaling to ensure that a service scales based on demand.
- C. Ensure that a training dataset is representative of the population.
- D. Ensure that all visuals have an associated text that can be read by a screen reader.

**Answer: A**

<https://docs.microsoft.com/en-us/azure/cognitive-services/computer-vision/concept-object-detection>

### NEW QUESTION # 229

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

□ Explanation

□ Reference:

<https://docs.microsoft.com/en-gb/azure/cognitive-services/text-analytics/overview>

<https://azure.microsoft.com/en-gb/services/cognitive-services/speech-services/> You can use the Speech service to transcribe a call to text - Yes we can use Speech to Text API to achieve this

<https://docs.microsoft.com/en-us/learn/modules/recognize-synthesize-speech/1-introduction> You can use a speech service to translate the audio of a call to a different language - Yes we can use Speech translation service to achieve this The Speech service includes the following application programming interfaces (APIs):

Speech-to-text - used to transcribe speech from an audio source to text format.

Text-to-speech - used to generate spoken audio from a text source.

Speech Translation - used to translate speech in one language to text or speech in another.

<https://docs.microsoft.com/en-us/learn/modules/translate-text-with-translation-service/2-get-started-azure> You can use text analytics service to extract key entities from a call transcript - Yes Text Analytics API helps to achieve this

<https://docs.microsoft.com/en-us/learn/modules/analyze-text-with-text-analytics-service/2-get-started-azure>

**NEW QUESTION # 230**

.....

In order to make all customers feel comfortable, our company will promise that we will offer the perfect and considerate service for all customers. If you buy the AI-900 training files from our company, you will have the right to enjoy the perfect service. We have employed a lot of online workers to help all customers solve their problem. If you have any questions about the AI-900 learning dumps, do not hesitate and ask us in your anytime, we are glad to answer your questions and help you use our AI-900 study questions well. We believe our perfect service will make you feel comfortable when you are preparing for your exam.
