## Actual CV0-004 Exam Prep Materials is The Best Choice for You

CompTIA Certified professionals are often more sought after than their non-certified counterparts and are more likely to earn higher salaries and promotions. Moreover, cracking the CompTIA Cloud+ (CV0-004) Certification Exam (CV0-004) exam helps to ensure that you stay up to date with the latest trends and developments in the industry, making you more valuable assets to your organization.

## CompTIA Cloud+ (CV0-004) Certification Exam Sample Questions (Q139-Q144):

### NEW QUESTION # 139

A company migrated its CRM system to a SaaS solution. The security team is updating the RAG matrix for the newly migrated CRM. Given the following table:

	Data-center security	CRM software security	CRM server patching	CRM development life cycle
Customer	C,I		A, I	A,C,I
CSP	R,A	R,A,C	R,C	R

Which of the following responsibility assignments best aligns with the shared responsibility model for the new CRM?

- A. CRM server patching

- B. Data-center security
- C. CRM software security
- D. CRM development life cycle

**Answer: B**

Explanation:

For the newly migrated SaaS CRM, the responsibility assignment that best aligns with the shared responsibility model is data-center security. In a SaaS model, the cloud service provider (CSP) is responsible for the security of the infrastructure, including data centers, while the customer is typically responsible for the data and possibly the user access management.

The shared responsibility model and its implications for different service models are foundational concepts included in the CompTIA Cloud+ certification, under the domain of Governance, Risk, Compliance, and Security.

#### NEW QUESTION # 140

A cloud administrator is reviewing the annual contracts for all hosted solutions. Upon review of the contract for the hosted mail solution, the administrator notes the monthly subscription rate has increased every year. The provider has been in place for ten years, and there is a large amount of data being hosted. Which of the following is a barrier to switching providers?

- A. Service-level agreement
- B. Encrypted data
- C. Memorandum of understanding
- D. Vendor lock-in

**Answer: D**

Explanation:

Vendor lock-in is a situation where a customer is so dependent on a particular vendor that they cannot easily switch to another vendor. This can happen for a variety of reasons, such as the use of proprietary technology, the lack of documentation, or the high cost of switching.

In this case, the cloud administrator is concerned about the increasing monthly subscription rate for the hosted mail solution. They may also be concerned about the difficulty of migrating the large amount of data that is being hosted. These factors could contribute to vendor lock-in.

#### NEW QUESTION # 141

Which of the following cloud deployment strategies is best for an organization that wants to run open-source workloads with other organizations that are sharing the cost?

- A. Public
- B. Private
- C. Hybrid
- D. Community

**Answer: D**

Explanation:

A community cloud deployment strategy is best for an organization that wants to run open-source workloads with other organizations while sharing the cost. Community clouds are collaborative efforts where infrastructure is shared between several organizations with common concerns, which could be regulatory, security, or compliance-related.

The concept of community clouds is discussed in the domain of Cloud Concepts within the CompTIA Cloud+ exam objectives.

#### NEW QUESTION # 142

A cloud developer needs to update a REST API endpoint to resolve a defect. When too many users attempt to call the API simultaneously, the following message is displayed:

Error: Request Timeout - Please Try Again Later

Which of the following concepts should the developer consider to resolve this error?

- A. Rate limiting
- B. Permission issues

- C. TLS encryption
- D. Server patch

**Answer: A**

Explanation:

To resolve the issue of a REST API endpoint timing out when too many users attempt to call the API simultaneously, the developer should consider implementing rate limiting. Rate limiting controls the number of requests a user can submit in a given amount of time, preventing overuse of the API resources and ensuring availability for all users.

### NEW QUESTION # 143

A company receives files daily from a bank. The company requires that the files must be copied from the cloud storage resource to another cloud storage resource for further processing. Which of the following methods requires the least amount of effort to achieve the task?

- A. REST
- B. SOAP
- C. Remote procedure call
- D. Event-driven architecture

**Answer: D**

Explanation:

An event-driven architecture is the most efficient method for automating the task of copying files from one cloud storage resource to another upon their arrival. This architecture allows systems to automatically trigger actions based on specific events, such as the arrival of new files, minimizing manual effort and ensuring timely processing.

### NEW QUESTION # 144

.....

What is the selling point of a product? It is the core competitiveness of this product that is ahead of other similar brands. The core competitiveness of the CV0-004 exam practice questions, as users can see, we have a strong team of experts, the CV0-004 study dumps are advancing with the times, updated in real time, so that's why we can with such a large share in the market. Through user feedback recommendations, we've come to the conclusion that the CV0-004 learning guide has a small problem at present, in the rest of the company development plan, we will continue to strengthen our service awareness, let users more satisfied with our CV0-004 study dumps, we hope to keep long-term with customers, rather than a short high sale.
