### Microsoft Power Platform Functional Consultant Sample Questions (Q240-Q245):

#### NEW QUESTION # 240

You are implementing a model-driven app to support a new line of business.

There are several places where automated business logic must be applied.

You need to determine how to apply the business logic.

Which method should you use? To answer, drag the appropriate methods to the appropriate business logic statements. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Methods	Answer Area	
Business rule	Business logic	Method
Real-time workflow	Make a field read only until a predetermined value is exceeded.	Method
Power Automate instant flow	Automatically send an email when a record's status is changed to deactivated.	Method
	Use the previous value of a field when the value is automatically updated as part of the	Method

Business rule	Business logic	Method
Real-time workflow	Make a field read only until a predetermined value is exceeded.	Business rule
Power Automate instant flow	Automatically send an email when a record's status is changed to deactivated.	Real-time workflow
	Use the previous value of a field when the value is automatically updated as part of the	Power Automate instant flow

Explanation

Graphical user interface, text, application Description automatically generated

## Business logic

Make a field read only until a predetermined value is exceeded.

Automatically send an email when a record's status is changed to deactivated.

Use the previous value of a field when the value is automatically updated as part of the

## Method

### Business rule

### Power Automate instant flow

#### Box 1: Business rule

By combining conditions and actions, you can do any of the following with business rules:

- \* NSE5\_FSM-5.2 Set column values
- \* Clear column values
- \* Set column requirement levels
- \* Show or hide columns
- \* Enable or disable columns
- \* Validate data and show error messages
- \* Create business recommendations based on business intelligence.

#### Box 2: Real-time workflow

Real-time workflows:

Graphical user interface, text, application, email Description automatically generated

A screenshot of the Microsoft Dynamics CRM interface, specifically the "Process" screen. The title bar says "Process: Discount for a specific group of accounts - Microsoft Dynamics CRM - Internet Explorer". The main content area shows the "General" tab of a process named "Discount for a specific group of account". Under "Available to Run", the checkbox "Run this workflow in the background (recommended)" is checked. Under "Workflow Job Retention", the checkbox "Automatically delete completed workflow jobs (to save disk space)" is checked. On the right, under "Options for Automatic Processes", the "Record is created" checkbox is checked, while "Record status changes" is unchecked. Below this, there is a list of steps: "Discount for the child accounts of the Alpine Ski House account" and "Discount for the accounts that are not children of the Alpine Ski House account", both triggered by "Record is created" and updated to "Opportunity". The bottom left corner shows the Microsoft logo and the status "Status: Draft".

#### Box 3: Power Automate instant flow

Instant Flows don't have a trigger in the same way as the Automated flow. Instead, they are triggered manually or on-demand, such as a user clicking a Flow button in the mobile app.

## NEW QUESTION # 241

A company plans to automate the following manual processes by using Power Automate.

You need to identify UI flow types for the two business processes.

Process	Time to Complete	Comments
1	30 minutes	The user's device must remain unlocked when the business process runs. The user will be required to leave their device unattended in a secure setting while the business process runs so that the user can assist with other efforts.
2	45 minutes	The process must run after normal business hours. The device that runs the business process must remain unlocked when the business process is not running.

Which desktop flow type should you use? To answer, drag the appropriate desktop flow types to the correct business processes. Each desktop flow type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Desktop flow types

Attended      Unattended

### NEW QUESTION # 243

You need to capture the Date Completed value from the website using a desktop flow.

Which method should you use?

- A. Display an input dialog and prompt the user to enter the value.
- B. Extract the value from the window the browser is using.
- C. Retrieve the value from the HTML element in the webpage.
- D. Use optical character recognition (OCR) on the screen to locate and extract the value.

**Answer: B**

Explanation:

Record the name of the QV team member who performed the work and the date completed.

Topic 3, Bellows College Case Study

Overview

Bellows College is a post-secondary school that wants to start a football team. The college uses Microsoft Power Platform to manage its recruiting efforts. The registration team and assistants use model-driven apps. The coaches use canvas apps on their mobile devices.

Prospects are considered underage if they are younger than 18 years old at the time of registration.

Environment

- \* Custom code is not allowed in the system.
- \* Server-side synchronization is configured for emails, appointments, contacts, and tasks.
- \* The database and file storage of Dataverse must be minimized to keep costs low.

Contact table

- \* Birthdate is a custom date and time field.
- \* Age at Registration is a calculated field that displays the age of the prospect at the time of registration.
- \* Current Age is a calculated field that displays the age of the prospect based on the current date and time.

Evaluation Table

- \* The Evaluation table is a custom table used to track evaluation criteria.
- \* Evaluation records cannot be manually created.
- \* Users must not be able to continue until an evaluation record is created automatically for the prospect.

Consent table

- \* The consent forms completed by the parents are stored as records in the Consent table.
- \* Occasionally, a parent cannot complete the consent online and a paper copy must be printed. The signed copy must be scanned and stored with the consent record.

team website

- \* The consent forms completed by the parents are stored as records in the Consent table.
- \* Occasionally, a parent cannot complete the consent online and a paper copy must be printed. The signed copy must be scanned and stored with the consent record.

Requirements

- \* The team website is created by using Power Pages.
- \* A starter layout template was used to create the site.

\* The site consists of five pages:

o Home: A page open to everyone to view the announcements from the team, o Schedule: A page open to everyone to view the tryout and game schedule, o Evaluations: A page that displays tracking from the evaluation table.

Prospects are able to view their own information only.

o Forms: A page that displays the consent form,

o Contact Us: A page for anyone to submit questions and comments.

\* Two web roles for authenticated users are created: Primary Contact User and Prospect User.

o All primary contacts and prospects are assigned to their respective roles.

Registration

\* Parents and prospects are created as contacts and must be linked.

\* The registration team must be able to rapidly create prospects without navigating away from the Parents form. Only the First Name, Last Name, and Birthdate fields should be displayed for the team.

\* Assistants must be able to update prospect information and add teams that the prospect has previously played on to a subgrid.

Parent consent

\* When a prospect is underage, a Primary Contact field will appear. The field must be populated before the prospect record can be saved.

\* A view named Underage Prospects that lists all underaged prospects is required.

\* The Underage Prospects view must run once a week without requiring modifications to display correct information.

\* A consent email must meet the following requirements:

o be sent to the primary contact of each new underage prospect

o contain a link to the team website

o be automatically sent weekly and tracked to the contact record in Dataverse o include the current date using the full month name, date, and year Evaluations

\* Coaches rate prospects each day on a scale of 1-10 in three categories: endurance, coordination, and skill.

\* The total of the three categories is displayed at the bottom of the form. If the total for the day is greater than 25, the number should appear green.

#### NEW QUESTION # 244

A company has a portal. Users sign into the portal by using a social media account.

The company wants to replace the existing portal with a Power Apps portal. users must sign up for access to the portal by using a Microsoft account and a unique invitation code that will be provided to the users.

You need to configure authentication for the home page.

Which values should you use? To answer, drag the appropriate values to the appropriate authentication settings. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

<b>Values</b> <input type="checkbox"/> Yes <input type="checkbox"/> No	<b>Answer Area</b>	 <b>Authentication setting</b> External sign in <input type="checkbox"/> Value Open registration <input type="checkbox"/> Value
