### SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q27-Q32):

#### NEW QUESTION # 27

Your customer wants to deploy a generative AI model to summarize customer feedback across channels. Which AI Foundation component is best suited for this task?

- A. SAP Document AI
- B. Joule Studio
- C. Generative AI hub
- D. SAP Knowledge Graph

**Answer: C**

Explanation:

The Generative AI hub is the most suitable component within SAP's AI Foundation for summarizing customer feedback across channels. As per SAP Business AI documentation, the Generative AI hub provides enterprise-grade orchestration of generative AI models, enabling tasks such as text summarization, content generation, and natural language processing. This component is designed to handle large-scale, cross-channel data inputs, making it ideal for summarizing customer feedback. SAP Document AI focuses on extracting insights from structured documents, Joule Studio is a low-code environment for building AI applications, and SAP Knowledge Graph contextualizes data relationships but is not optimized for generative tasks. The Generative AI hub ensures secure, compliant, and scalable processing, delivering accurate summaries to support business decisions.

#### NEW QUESTION # 28

Within AI Foundation's layered architecture, which layer provides a unified entry point for development, operations, and administration?

- A. AI Integration Layer
- B. Peripheral & Data Layer
- C. AI Kernel Layer
- D. OS Interfaces Layer

**Answer: A**

#### NEW QUESTION # 29

(How can Joule for ABAP development support developers? Note: There are 3 correct answers to this question.)

- A. By creating ABAP coding learning journeys
- B. By explaining ABAP code
- C. By generating ABAP business objects
- D. By creating unit tests
- E. By debugging ABAP programs

**Answer: B,C,D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Joule for ABAP development supports developers by explaining ABAP code to aid understanding of logic and structure, creating unit tests to automate testing and improve code quality, and generating ABAP business objects to accelerate development using the ABAP RESTful Application Programming Model (RAP).

These capabilities enhance productivity and proficiency in end-to-end ABAP development.

Exact extracts supporting this:

Explaining ABAP code: "Joule generates explanations of selected ABAP code or ABAP core data services (CDS) views to help you quickly understand the programming logic and code written ..."sap.com Creating unit tests: "New generative AI capabilities are designed to help you write, optimize, and test ABAP code more efficiently. From generating code suggestions

..."community.sap.com (Implying unit test generation as part of testing efficiency.) Generating ABAP business objects: "We are introducing new generative AI capabilities in ABAP Cloud to increase developer efficiency. The first scope of features will cover business object ..."learning.sap.com "Generative AI for ABAP development. With new ABAP capabilities, Joule can now help ABAP developers be more efficient with their development ..."community.sap.com Other options are incorrect because:

Option D: Joule provides suggestions and automation but does not directly debug programs; debugging remains a developer task supported by tools like ADT.

Option E: Joule focuses on practical development assistance rather than creating educational learning journeys, which are handled by SAP Learning platforms.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Based on SAP News articles like "Introducing Joule for Developers: AI-Powered Capabilities Across SAP" and SAP Help Portal for "Joule for Developers, ABAP AI Capabilities." These position Joule as an AI tool for ABAP within the SAP Business Suite, as covered in the C\_BCBAl\_2502 certification and learning journeys for generative AI in development.

### NEW QUESTION # 30

(What are some generative AI enhancements in ABAP Cloud? Note: There are 2 correct answers to this question.)

- A. Generate digital assistants.
- **B. Generate business objects using the ABAP RESTful application programming model.**
- **C. Generate unit-tests for ABAP classes and CDS views.**
- D. Generate integrations with preconfigured connectors.

**Answer: B,C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Generative AI enhancements in ABAP Cloud include generating unit tests for ABAP classes and CDS views to improve testing efficiency, and generating business objects using the ABAP RESTful Application Programming Model (RAP) to streamline development and maintain a clean core approach.

Exact extracts supporting this:

Generate unit-tests: "New generative AI capabilities are designed to help you write, optimize, and test ABAP code more efficiently."community.sap.com Generate business objects: "The first scope of features will cover business object ..."learning.sap.com "Generative AI for ABAP development. With new ABAP capabilities, Joule can now help ABAP developers be more efficient with their development ..."community.sap.com Other options are incorrect because:

Option A: Generating digital assistants is not a specific enhancement in ABAP Cloud; Joule is the assistant, but generation is for code artifacts.

Option D: Generating integrations is supported in broader SAP Build, but not highlighted as a generative AI enhancement specific to ABAP Cloud.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Extracted from SAP Help Portal "Generative AI in ABAP Cloud" and community blogs like "Unveiling today: SAP Build meets ABAP Cloud."

These position generative AI for code generation and testing in ABAP as part of custom AI solutions in the SAP Business Suite, per C\_BCBAl\_2502 certification.

### NEW QUESTION # 31

(What are some key differentiators of SAP Business AI? Note: There are 3 correct answers to this question.)

- **A. AI Foundation**
- **B. Embedded AI**
- C. Large Foundation Models
- **D. Ecosystem of Innovation**
- E. Predictive Analytics

**Answer: A,B,D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Key differentiators of SAP Business AI include embedded AI

directly integrated into business applications for seamless use, an AI Foundation providing the underlying infrastructure and tools in SAP BTP, and an Ecosystem of Innovation through partnerships and open standards for collaborative advancements. These set SAP apart by focusing on integration, foundational support, and ecosystem-driven innovation.

Exact extracts supporting this:

Embedded AI: "Embedded AI: Our relevant, reliable, and responsible SAP Business AI is ... key differentiators."learning.sap.com

AI Foundation: "For that, we established an AI foundation."learning.sap.com "SAP's main differentiators are... deep domain and industry expertise."community.sap.com (Foundation as base.) Ecosystem of Innovation: "Maximize the value of AI across your business with a single AI interface that seamlessly integrates data and workflows across your SAP and non-SAP

applications."sap.com Implies ecosystem

Other options are incorrect because:

Option C: Predictive analytics is a capability but not a key differentiator; focus is on embedded and foundational aspects.

Option D: SAP integrates large foundation models from partners but does not claim them as differentiators; emphasis is on business grounding.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: From SAP Learning course "Discovering SAP Business AI," units on market point of view and role of Business AI, highlighting embedded AI, foundation, and ecosystem as differentiators, per C\_BCBAI\_2502 materials.
