Our FCP - FortiSandbox 5.0 Administrator study questions have a high quality, that mainly reflected in the passing rate. More than 99% students who use our FCP_FSA_AD-5.0 exam material passed the exam and successfully obtained the relating certificate. This undoubtedly means that if you purchased FCP_FSA_AD-5.0 exam guide and followed the information we provided you, you will have a 99% chance of successfully passing the exam. So our FCP_FSA_AD-5.0 study materials are a good choice for you. In order to gain your trust, we will provide you with a full refund commitment. If you failed to pass the exam after you purchase FCP_FSA_AD-5.0 Exam Material, whatever the reason, you just need to submit your transcript to us and we will give you a full refund. We dare to make assurances because we have absolute confidence in the quality of FCP - FortiSandbox 5.0 Administrator study questions. We also hope you can believe that FCP_FSA_AD-5.0 exam guide is definitely the most powerful weapon to help you pass the exam.

Fortinet FCP_FSA_AD-5.0 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Results analysis: This section involves understanding common attack vectors, analyzing malware behavior, and interpreting scan job reports to assess threats and make informed security decisions.
Topic 2	<ul style="list-style-type: none"> Scanning and rating components: This section focuses on FortiSandbox scanning mechanisms, including scanning components, managing guest virtual machines, and configuring scan options to properly analyze and rate suspicious files.
Topic 3	<ul style="list-style-type: none"> Deployment and system settings: This domain covers understanding FortiSandbox deployment within different stages of the Cyber Kill Chain, along with configuring system settings, high availability (HA) clusters, and troubleshooting system-related issues.

- Integration: This domain explains how to integrate FortiSandbox within the Fortinet Security Fabric and with third-party tools, as well as identifying ATP deployments and resolving integration-related issues.

Verified Fortinet FCP_FSA_AD-5.0: Verified FCP - FortiSandbox 5.0 Administrator Answers - Professional It-Tests Dumps FCP_FSA_AD-5.0 Reviews

A good brand is not a cheap product, but a brand that goes well beyond its users' expectations. The value of a brand is that the FCP_FSA_AD-5.0 exam questions are more than just exam preparation tool -- it should be part of our lives, into our daily lives. Do this, therefore, our FCP_FSA_AD-5.0 question guide has become the industry well-known brands, but even so, we have never stopped the pace of progress, we have been constantly updated the FCP_FSA_AD-5.0 real study dumps. The most important thing is that the FCP_FSA_AD-5.0 exam questions are continuously polished to be sold, so that users can enjoy the best service that our products bring. Our FCP_FSA_AD-5.0 real study dumps provide users with comprehensive learning materials, so that users can keep abreast of the progress of The Times.

Fortinet FCP - FortiSandbox 5.0 Administrator Sample Questions (Q12-Q17):

NEW QUESTION # 12

Which three actions does FortiSandbox perform when it is integrated with FortiMail for advanced threat protection (ATP)? (Choose three answers)

- A. It assigns and returns a rating for analyzed objects.
- B. It submits objects for sandbox scanning.
- C. It updates FortiGuard databases.
- D. It queues email during analysis.
- E. It analyzes file and URL objects.

Answer: A,D,E

Explanation:

The Study Guide is explicit about the FortiMail-FortiSandbox workflow. It states: "On top of file submissions, FortiMail can also submit extracted URLs from emails to FortiSandbox for inspection. FortiMail queues the email while waiting for a verdict. FortiSandbox inspects all submitted files and URLs. FortiSandbox then generates a verdict and sends that verdict in reply to FortiMail. FortiMail uses the verdict to apply the configured action." This directly supports D because FortiSandbox analyzes file and URL objects. It supports B because FortiSandbox generates a verdict and returns it to FortiMail. And it supports E because the integrated workflow includes the email being queued during analysis while FortiSandbox is processing the submitted objects. Option C is incorrect because FortiMail is the device that submits the objects to FortiSandbox, not FortiSandbox itself. Option A is also incorrect because updating FortiGuard databases is not one of the three ATP integration actions described for the FortiMail workflow. Therefore, the correct three answers are B, D, and E.

NEW QUESTION # 13

Refer to the CLI configuration below.

```
set device-authorization -a
```

How will FortiSandbox authorize new FortiClient devices after this command? (Choose one answer)

- A. When a new FortiClient registers, FortiSandbox will authorize it automatically.
- B. When a new device other than FortiClient registers, FortiSandbox will authorize it automatically.
- C. When a new FortiClient registers, it inherits authorization status from the managing EMS or FortiGate.
- D. When a Fabric device is not authorized, FortiSandbox will authorize it automatically.

Answer: A

Explanation:

The Study Guide explains the default behavior first: "You must authorize FortiClient EMS on FortiSandbox. FortiSandbox automatically authorizes all FortiClient endpoints managed by an authorized FortiClient EMS." It then adds the key point for this question: "To change the default FortiClient authorization behavior, use the command shown on this slide to authorize FortiClient endpoints using FortiSandbox CLI. By default, FortiClient inherits its authorization status from the managing EMS or FortiGate." Because the question specifically shows the CLI command set device-authorization -a, it is asking about the behavior after changing the default. The default inheritance model described in option A applies before the override. After this command, FortiSandbox is set to authorize FortiClient endpoints directly and automatically, which makes C the correct answer. Option B is incorrect because the command is specifically about FortiClient endpoints, not other devices in general. Option D is too broad and does not match the Study Guide's explanation, which is limited to FortiClient authorization behavior.

NEW QUESTION # 14

Refer to the exhibit.

As a best practice, where must you rank the FortiClient inputs when configuring the job queue priority on FortiSandbox? (Choose one answer)

- A. Before FortiGate but after FortiMail inputs
- **B. After On-Demand but before FortiGate inputs**
- C. Before all other input methods
- D. After all other input methods

Answer: B

Explanation:

From the FortiClient EMS Integration lesson, the Study Guide explicitly states:

"It is always a good idea to place the files that are submitted by FortiClient, high on the Job Queue Priority since these are files that end users need immediate access to. In most cases, end users might not be willing to wait for a long time to access these files and placing the FortiClient submitted files high on the Job Queue Priority ensures that these files receive high priority for scanning from FortiSandbox." Looking at the exhibit, the Job Priority Configuration shows:

Positions 1-4: On-Demand inputs (highest priority)

Position 5: FortiGate InlineBlock

Positions 6-11: Other sources including FortiWeb, File RPC, Device, FortiClient As a best practice, FortiClient should rank after On-Demand (positions 1-4) but before FortiGate inputs - since end users need immediate file access, FortiClient submissions should be near the top but On-Demand scanning takes highest precedence.

NEW QUESTION # 15

A FortiGate root VDOM is authorized on FortiSandbox, and FortiGate is configured to send suspicious files to FortiSandbox for inspection. You create a new VDOM and then generates some traffic so that the new VDOM sends a file to FortiSandbox for the first time. In this scenario, which action will FortiSandbox take? (Choose one answer)

- A. FortiSandbox will inspect all files, based on the root VDOM authorization state and configuration.
- B. FortiSandbox will authorize the new VDOM by default and inspect files as they are received.
- **C. FortiSandbox will accept the file, but not inspect the file until the administrator manually authorizes the new VDOM on FortiSandbox.**
- D. FortiSandbox will accept the file; but not inspect the file until the administrator manually configures the new VDOM on FortiSandbox.

Answer: C

Explanation:

The uploaded FortiSandbox 5.0 Administrator Study Guide states that each VDOM is handled independently by FortiSandbox, not under the root VDOM's authorization. It explicitly explains that "each VDOM is treated as a separate input device on FortiSandbox" and that each device must be authorized before FortiSandbox will process its submissions. It further adds that only when auto-authorization is enabled will FortiSandbox automatically authorize VDOMs as files are submitted.

Therefore, the new VDOM does not inherit the root VDOM's authorized state. Since the question does not say that auto-authorization is enabled, FortiSandbox will not automatically trust or process that new VDOM as if it were already approved. This eliminates A and C. Option D is incorrect because the issue is not that the administrator must manually configure the VDOM on FortiSandbox; the study guide specifically identifies authorization as the required control. For that reason, B is the best answer: the new VDOM must be manually authorized before its submitted files are inspected.

NEW QUESTION # 16

You are troubleshooting long delays between FortiMail file submissions to FortiSandbox and verdicts being returned from FortiSandbox. Which FortiMail debug tool must you use to troubleshoot this issue further? (Choose one answer)

- A. diagnose debug application deferd
- B. diagnose debug application hoststatd
- C. diagnose debug application oftpd
- D. diagnose debug application mailfilterd

Answer: A

NEW QUESTION # 17

.....

Our FCP_FSA_AD-5.0 exam guide are not only rich and varied in test questions, but also of high quality. A very high hit rate gives you a good chance of passing the final FCP_FSA_AD-5.0 exam. According to past statistics, 98 % - 99 % of the users who have used our FCP_FSA_AD-5.0 Study Materials can pass the exam successfully. So without doubt, you will be our next passer as well as long as you buy our FCP_FSA_AD-5.0 practice braindumps.
