Topic 3	<ul style="list-style-type: none"><li>Understanding SAP AI Value Proposition: Explains the core benefits and strategic impact of SAP's AI technologies on business efficiency and innovation.</li></ul>

## SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q67-Q72):

### NEW QUESTION # 67

Which component of SAP AI is responsible for automating routine business tasks?

Please choose the correct answer.

Response:

- A. SAP Intelligent RPA
- B. SAP AI Core
- C. SAP Conversational AI
- D. SAP S/4HANA Cloud

**Answer: A**

### NEW QUESTION # 68

If a company implements SAP's Business AI offerings comprehensively, all things being equal, which bottomline benefits could they expect?

There are 2 correct answers to this question.

Response:

- A. Gross profit increase: up to 1.4%
- B. Revenue increase: up to 1.4%
- C. Gross profit increase: up to 3.5%
- D. Revenue increase: up to 3.5%

**Answer: A,D**

### NEW QUESTION # 69

Which key advantage does SAP Business AI provide to organizations? Please choose the correct answer.

- A. Isolated data storage without AI integration
- B. Manual business process execution
- C. Automated financial accounting processes
- D. Predictive insights for decision-making

**Answer: D**

Explanation:

SAP Business AI delivers a transformative advantage by embedding AI into business processes to enhance decision-making. The correct answer is "Predictive insights for decision-making," as this is a core advantage highlighted across SAP's AI offerings.

SAP documentation emphasizes: "SAP Business AI offers capabilities such as predictive analytics, natural language processing, and machine learning to enhance decision-making, provide personalized insights, ensure intelligent automation of tasks, and improve business processes within the SAP ecosystem." Predictive insights enable organizations to "forecast trends, optimize operations, and make data-driven decisions" across functions like finance, supply chain, and marketing. For example, SAP S/4HANA uses predictive analytics to

"forecast expected incoming payments," while SAP Customer Experience leverages AI to predict customer behavior for targeted campaigns. Henkel's use of SAP Business Technology Platform with AI illustrates how predictive insights drive supply chain resilience and operational efficiency.

The incorrect options do not reflect SAP Business AI's core advantages. Automated financial accounting processes are a specific use case, not the primary advantage. Manual business process execution contradicts SAP's automation focus. Isolated data storage without AI integration is contrary to SAP's integrated, AI-driven architecture. Predictive insights stand out as the overarching advantage, as they enable proactive and informed decision-making across the enterprise.

### NEW QUESTION # 70

A multinational company wants to implement AI-based fraud detection for its financial transactions. Which SAP AI solutions should they use? Note: There are 3 correct answers to this question.

- A. SAP Predictive Analytics
- B. SAP Cloud ERP
- C. SAP Intelligent RPA
- D. SAP AI Business Services
- E. SAP SuccessFactors AI

**Answer: A,C,D**

Explanation:

For a multinational company seeking AI-based fraud detection in financial transactions, SAP offers solutions that leverage machine learning and automation to identify and mitigate fraudulent activities. The correct answers are SAP AI Business Services, SAP Predictive Analytics, and SAP Intelligent RPA, as these solutions directly support fraud detection in financial processes.

SAP documentation explains: "SAP AI solutions can detect anomalies and patterns in financial transactions, procurement processes, and other business operations to identify potential fraud and risks." SAP AI Business Services provide "machine learning capabilities for fraud detection in finance," enabling real-time monitoring of transactions to identify suspicious activities. SAP Predictive Analytics, embedded in SAP S/4HANA, supports "AI-assisted anomaly detection" to "predict and identify unusual patterns in financial data," such as fraudulent transactions, enhancing security. SAP Intelligent RPA automates "transaction monitoring and validation processes," using AI to flag potential fraud by cross-referencing data against predefined rules, as seen in financial reconciliation workflows.

The incorrect options-SAP SuccessFactors AI and SAP Cloud ERP-are not relevant. SAP SuccessFactors AI focuses on HR processes, such as recruitment, not financial fraud detection. SAP Cloud ERP is a broad platform that may include AI but is not specifically tailored for fraud detection compared to the selected solutions. SAP's financial AI solutions, as evidenced by their use in SAP Cash Application, confirm the suitability of the chosen answers.

#### NEW QUESTION # 71

Which of the following are features of the clean core dashboard? Note: There are 2 correct answers to this question.

- A. It can be accessed by using SAP For Me
- B. It can be used in all SAP S/4HANA Cloud editions
- C. Customers can grant access to the dashboard to partners
- D. Customers can use the dashboard in the dev, test, and production tenants

**Answer: A,C**

Explanation:

The SAP clean core dashboard provides tools to monitor and manage clean core compliance in SAP S/4HANA Cloud environments. The correct answers are "Customers can grant access to the dashboard to partners" and "It can be accessed by using SAP For Me," as these are documented features of the clean core dashboard.

SAP documentation states: "The clean core dashboard in SAP S/4HANA Cloud enables customers to monitor system compliance with clean core principles, ensuring minimal customizations and seamless upgrades. It can be accessed through SAP For Me, providing a centralized interface for system management." Additionally, "customers can grant access to the dashboard to partners," allowing external consultants or service providers to collaborate on maintaining clean core standards. This feature supports "transparent collaboration" and ensures alignment with SAP's extensibility guidelines.

The incorrect options are not features of the clean core dashboard. The dashboard is not explicitly documented as available in "dev, test, and production tenants," as its primary use is in production systems for monitoring live environments. The option "It can be used in all SAP S/4HANA Cloud editions" is incorrect, as the dashboard's availability may vary depending on specific editions (e.g., public vs. private cloud). SAP's clean core strategy documentation confirms the selected features as key capabilities of the dashboard.

#### NEW QUESTION # 72

.....

The SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite (C-BCBAI-2502) product can be easily accessed just after purchasing it from Lead4Pass.
