

# Flexible HQT-4160 Testing Engine, Valid HQT-4160 Exam Format

<b>Exam Type</b> Qualification
<b>Format</b> Proctored, closed book exam
<b>Credential</b> Hitachi Vantara Qualified Professional - VSP 5000 Series Installation
<b>Validity</b> 3 years
<b>Delivery</b> Criterion Webassessor System*
<b>Questions</b> 35
<b>Passing Score</b> 65%
<b>Duration</b> 60 minutes
<b>Cost</b> US \$100 or equivalent in local currency (plus local tax, depending on location)
<b>Supporting Material</b> • 1090PI - Installing and Configuring the Hitachi VSP 5000 Series (5 day-ILT)

This test is designed for Hitachi Vantara employees and partners who install Hitachi Virtual Storage Platform (VSP) 5000 series systems. The test will validate that the successful candidate has knowledge and skills in installing, configuring and supporting VSP 5000 series systems at customer sites. This includes strong knowledge of the systems' hardware and associated program products, thorough understanding of installation and configuration procedures, and associated support activities. This test covers Hitachi Virtual Storage Platform models VSP 5100(H), VSP 5500(H), VSP 5200(H) and VSP 5600(H).

**Audience:** Hitachi Vantara Employee and Partner Installation Professionals

Hitachi VSP 5000 series installation professionals should have strong knowledge and skills in installing and supporting storage systems deployed as part of VSP 5000 series solutions implementation. They perform pre-installation checks and install, configure and test the systems so they can be handed over in an operational state to customers. They also provide post-installation services, including support, maintenance, updates and upgrades, and have knowledge of problem-determination and incident-resolution procedures, tools and techniques.

Test Objectives	
<b>Section 1 System Architecture</b>	
1.1	Describe the different VSP 5000 models and their specifications.
1.2	Describe the VSP 5000 systems architecture, their components and their functions.
1.3	Describe the front-end design and layout of VSP 5000 systems and the supported Channel Boards (CHBs).
1.4	Describe the back-end design and layout of VSP 5000 systems and the supported Disk Adapters (DKAs).
<b>Section 2 System Pre-installation and Installation</b>	
2.1	Describe the VSP 5000 storage systems pre-installation procedures and documentation.
2.2	Describe the VSP 5000 disk controllers (DKCs) interconnections.
2.3	Describe the "New Installation" procedure for VSP 5000 storage systems and when it is appropriate to use.
2.4	Describe the VSP 5000 storage systems network settings.
2.5	Describe the VSP 5000 storage microcode upgrade procedures.
<b>Section 3 System Configuration</b>	
3.1	Describe the key steps involved in the installation of VSP 5000 storage systems.
3.2	Describe how to create Parity Groups on VSP 5000 storage systems.

\* Depending on the location and course delivery format, this closed-book, proctored qualification test may also be offered and administered by the instructor at the conclusion of the supporting course.

## 2026 Hitachi Trustable Flexible HQT-4160 Testing Engine

HQT-4160 learning materials can help them turn to very clear ones. We have been abiding the intention of providing the most convenient services for you all the time on Hitachi Vantara Qualified Professional - VSP 5000 Series Installation HQT-4160 Study Guide, which is also the objection of us. Hitachi HQT-4160 practice materials are successful measures and methods to adopt.

Hitachi HQT-4160 certification exam is designed for IT professionals who are looking to validate their installation skills and

knowledge of the Hitachi Vantara VSP 5000 Series. Hitachi Vantara Qualified Professional - VSP 5000 Series Installation certification exam is suitable for professionals who work with Hitachi Vantara products on a regular basis and want to demonstrate their expertise in this area. HQT-4160 Exam is comprehensive and covers all aspects of installation, configuration, and management of the VSP 5000 Series.

## Hitachi Vantara Qualified Professional - VSP 5000 Series Installation Sample Questions (Q35-Q40):

### NEW QUESTION # 35

A disk drive is in failed state in a VSP 5600 system and you want to replace it. Which two actions should you perform as part of the replacement procedure? (Choose two.)

- **A. Block the drive with the Maintenance Utility.**
- B. Activate Dynamic Sparing.
- **C. Replace the drive.**
- D. Initiate the Correction Copy process.

**Answer: A,C**

Explanation:

Replace the drive.

Physically replacing the failed drive is a required step in the drive replacement procedure.

Block the drive with the Maintenance Utility.

Before removal, the failed drive should be logically blocked using the Maintenance Utility to safely isolate it from the system and prevent I/O errors during replacement.

### NEW QUESTION # 36

What are two ways to identify that a problem occurred on a VSP 5000 system? (Choose two.)

- **A. A SIM was generated and could be displayed using the SVP GUI.**
- **B. The Master Alarm LED at the top right of the front door is lit.**
- C. An Alert Information Message (AIM) was generated and communicated by SNMP to notify the customer.
- D. The Remote Ops SVP Agent called home and a support case was generated.

**Answer: A,B**

Explanation:

The Master Alarm LED at the top right of the front door is lit.

A lit Master Alarm LED is a direct hardware indicator that a problem has occurred on the system.

A SIM was generated and could be displayed using the SVP GUI.

A Service Information Message (SIM) indicates an event or error and can be viewed via the SVP GUI, helping identify and diagnose system issues.

### NEW QUESTION # 37

A drive in a VSP 5000 series storage system is blocked. The microcode is now searching for a matching spare drive. What are the three requirements for the spare drive? (Choose three.)

- A. It must be located in the same DKU.
- **B. It must have the same rotation speed (RPM).**
- **C. It must have the same or a larger capacity.**
- D. It must be defined in the SVP Spare Drive Mapping table.
- **E. It must be of the same type (NL-SAS, SSD, FMD etc.).**

**Answer: B,C,E**

Explanation:

It must have the same or a larger capacity.

The spare drive must be equal to or larger in capacity than the failed drive to ensure data can be fully rebuilt.

It must have the same rotation speed (RPM).

Matching rotation speed is required to maintain consistent performance and RAID group behavior.

It must be of the same type (NL-SAS, SSD, FMD etc.).

The spare drive must be the same drive type as the failed drive to ensure compatibility and maintain system reliability.

### NEW QUESTION # 38

You are installing a VSP 5000 system, it is connected to the power distribution and you now want to power it up. Which three steps should you perform as part of the Power On sequence?

(Choose three.)

- A. Press the LAN Reset Button on CBX 0.
- B. Turn on the main breakers at the PDUs.
- C. Press the Power Button on each CBX.
- D. Check that the Power LED on all the CBXs are on.
- E. Turn on the PS ON/PS OFF switch on the HSNPANEL0.

**Answer: B,C,E**

Explanation:

Turn on the main breakers at the PDUs.

Power distribution must be enabled first by switching on the main breakers to supply electricity to the entire system.

Turn on the PS ON/PS OFF switch on the HSNPANEL0.

Activating the PS ON/PS OFF switch on the HSN panel supplies power to system components.

Press the Power Button on each CBX.

Each Controller Box (CBX) must be powered on individually by pressing its power button to start the system boot process.

### NEW QUESTION # 39

How many IP addresses should you configure to integrate a VSP 5000 series storage system on the customer public network?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: A**

Explanation:

To integrate a VSP 5000 series storage system into the customer public network, you should configure two IP addresses - one for each Service Processor (SVP) to provide redundancy and ensure high availability for management access.
