Oracle Fusion Project Billing uses bill rates, burdening, and transfer price schedules to derive standard bill rates, multipliers, markups, and bases for calculating potential revenue when the revenue method classification on a revenue plan is as billed, as incurred, or rate based. Similarly, bill rates derive invoice amounts when the invoice method classification on a bill plan is rate based.

## NEW QUESTION # 72

Shift is one of the key elements in defining project and resource calendars.

Which two additional key elements are required to define the project and resource calendars? (Choose two.)

- A. Schedule Exceptions
- B. Time off
- C. Expenditure Type
- D. Workday Patterns
- E. Accounting Calendar

**Answer: A,D**

#### Explanation:

Shift is one of the key elements in defining project and resource calendars. Two additional key elements that are required to define the project and resource calendars are:

\* Schedule Exceptions: These are dates or periods that override the regular workday patterns and shifts of a calendar. They can be used to define holidays, vacations, or other special events that affect the availability of resources or projects.

\* Workday Patterns: These are patterns of working and nonworking days that repeat over a period of time. They can be used to define the standard working days and hours for a calendar. Time off, expenditure type, and accounting calendar are not key elements in defining project and resource calendars. Time off is an attribute of a resource assignment that reduces the availability of a resource.

Expenditure type is a classification of costs that determines how they are processed and accounted.

Accounting calendar is a calendar that defines the accounting periods and dates for transactions.
