Free L5M9 Practice | L5M9 Reliable Dumps Sheet

Our L5M9 training dumps are deemed as a highly genius invention so all exam candidates who choose our L5M9 exam questions have analogous feeling that high quality our practice materials is different from other practice materials in the market. So our L5M9 study braindumps are a valuable invest which cost only tens of dollars but will bring you permanent reward. So many our customers have benefited form our L5M9 preparation quiz, so will you!

CIPS Operations Management Sample Questions (Q31-Q36):

NEW QUESTION # 31

Doug's Doughnuts Ltd is a large manufacturer of doughnuts. They produce in excess of 100,000 doughnuts per day which are boxed and sent to supermarkets and other retail outlets for sale. Large pieces of machinery are used to make the doughnuts. Which form of maintenance would be the most appropriate to use at Doug's Doughnuts?

- A. condition based
- **B. preventative**
- C. run to breakdown
- D. reactive

Answer: B

Explanation:

Preventative maintenance should be used at Doug's Doughnuts. The machines should be serviced regularly to ensure they're working well. A break-down in machinery would stop production, and because Doug's Doughnuts produce so many items per day, this would cause a serious issue for the company. Run to breakdown means you don't repair anything until the item is completely broken. Condition-based maintenance is when maintenance is scheduled when it is required, usually to a schedule. Reactive is when maintenance is conducted when something breaks. See p.103.

NEW QUESTION # 32

In Operations Management strategies, there are 10 strategic areas which fall into two categories: structure-related and infrastructure-related. Which of the following are structure-related? Select TWO

- A. supply network
- B. capacity
- C. new product development
- D. performance measurements
- E. quality

Answer: A,B

Explanation:

Capacity and Supply Network are structure-related. The other three are Infrastructure-related. This is from p.35-36 of the study guide. Structure is about the 'hardware' of the business and physical attributes. Infra-structure is considered the software and are easier to change.

NEW QUESTION # 33

A lorry used for transporting goods between warehouses has a light that flashes up on the dashboard when engine oil needs to be replaced soon. This is an example of what form of maintenance?

- A. preventative
- B. condition-based maintenance
- C. run to breakdown
- D. reactive

Answer: B

Explanation:

This is an example of condition-based maintenance. This is when, prior to failure, the user is alerted to a potential problem and given time to fix it before it happens. Preventative maintenance is proactively checking regularly, so in this scenario it would be the driver checking the oil level manually before each journey. Reactive maintenance would be changing the oil when it needs changing (not beforehand). Run to breakdown would be driving the vehicle until it doesn't go any more then replacing the vehicle. See p.103.

NEW QUESTION # 34

Bilal is an Operations Manager at an apple pie manufacturer and is currently undertaking an Aggregate Capacity Analysis. What is the purpose of this?

- A. It will help Bilal assess if he is working within the allocated budget
- B. It will help Bilal decide if he needs to hire more workers in the short term to ensure the factory produces enough apple pies to meet demand
- C. It will tell Bilal if he has the correct number of apples he needs to produce the desired number of apple pies
- D. It will give Bilal an overall evaluation of the company's ability to meet demand fluctuations

Answer: D

Explanation:

4 is the correct answer. Aggregate Capacity Analysis looks at medium-term capacity to see whether supply can match demand. This is from p.23. Aggregate means 'from a group or cluster' and therefore requires quite a few bits of data. For this reason option 1 is incorrect as this describes a very short term look at capacity analysis.

NEW QUESTION # 35

The RATER methodology looks at the key dimensions to providing an effective service. Which of the following is not a dimension of this framework?

- A. responsiveness
- B. empathy
- C. assurance
- D. tangibles

Answer: A

Explanation:

Responsiveness is incorrect. The R in RATER stands for reliability. The full acronym is; reliability, assurance, tangibles, empathy, responsiveness. P.58

NEW QUESTION # 36

.....

After cracking the Operations Management (L5M9) exam you will receive the credential badge. It will pave your way toward well-paying jobs or promotions in any reputed tech company.
