Prep4King Salesforce MuleSoft-Integration-Architect-I Dumps are validated by many more candidates, which can guarantee a high success rate. After you use our dumps, you still fail the exam so that Prep4King will give you FULL REFUND. Or you can choose to free update your exam dumps. With such protections, you don't need to worry.

## Salesforce MuleSoft-Integration-Architect-I Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Designing Integration Solutions to Meet Reliability Requirements: It includes selecting alternatives to traditional transactions, recognizing the purpose of various scopes and strategies, differentiating disaster recovery and high availability, and using local and XA transactions.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Designing for the Runtime Plane Technology Architecture: It includes analyzing Mule runtime clusters, designing solutions for CloudHub, choosing Mule runtime domains, leveraging Mule 4 class loader isolation, and understanding the reactive event processing model.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Designing and Developing Mule Applications: It includes selecting application properties, using fundamental features, designing with core routers, understanding the Salesforce Connector, and leveraging core connectors.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Applying DevOps Practices and Operating Integration Solutions: Its sub-topics are related to designing CI</li> <li>CD pipelines with MuleSoft plugins, automating interactions with Anypoint Platform, designing logging configurations, and identifying Anypoint Monitoring features.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Designing Automated Tests for Mule Applications: This topic covers unit test suites, and scenarios for integration and performance testing.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Designing Integration Solutions to Meet Persistence Requirements: It addresses the usage of VM queues and connectors, object stores and services, and stateful components configured with object stores.</li> </ul>

**MuleSoft-Integration-Architect-I Free Pdf Guide | Reliable MuleSoft-Integration-Architect-I Test Pattern**

We can assure you that you will get the latest version of our MuleSoft-Integration-Architect-I training materials for free from our company in the whole year after payment. For we promise to give all of our customers one year free updates of our MuleSoft-Integration-Architect-I exam questions and we update our MuleSoft-Integration-Architect-I Study Guide fast and constantly. Do not miss the opportunity to buy the best MuleSoft-Integration-Architect-I preparation questions in the international market which will also help you to advance with the times.

## Salesforce Certified MuleSoft Integration Architect I Sample Questions (Q146-Q151):

### NEW QUESTION # 146

When the mule application using VM is deployed to a customer-hosted cluster or multiple cloudhub workers, how are messages consumed by the Mule engine?

- A. by starting an XA transaction for each new message
- B. the primary only in order to avoid duplicate processing
- C. in a deterministic way
- D. in non-deterministic way

**Answer: C**

### NEW QUESTION # 147

An organization uses one specific CloudHub (AWS) region for all CloudHub deployments. How are CloudHub workers assigned to availability zones (AZs) when the organization's Mule applications are deployed to CloudHub in that region?

- A. An AZ is randomly selected for a Mule application, and all the Mule application's CloudHub workers are assigned to that one AZ
- B. Workers belonging to a given environment are assigned to the same AZ within that region.
- C. Workers are randomly distributed across available AZs within that region.
- D. AZs are selected as part of the Mule application's deployment configuration.

**Answer: C**

Explanation:

Correct answer is Workers are randomly distributed across available AZs within that region. This ensure high availability for deployed mule applications Mulesoft documentation reference :

<https://docs.mulesoft.com/runtime-manager/cloudhub-hadr>

### NEW QUESTION # 148

Why would an Enterprise Architect use a single enterprise-wide canonical data model (CDM) when designing an integration solution using Anypoint Platform?

- A. To reduce dependencies when integrating multiple systems that use different data formats
- B. To leverage a data abstraction layer that shields existing Mule applications from nonbackward compatible changes to the model's data structure
- C. To remove the need to perform data transformation when processing message payloads in Mule applications
- D. To automate AI-enabled API implementation generation based on normalized backend databases from separate vendors

**Answer: A**

### NEW QUESTION # 149

Which Anypoint Platform component helps integration developers discovers and share reusable APIs, connectors, and templates?

- A. Anypoint Studio
- B. API Manager
- C. Design Center
- D. Anypoint Exchange

**Answer: D**

Explanation:

Anypoint Exchange is the Anypoint Platform component that helps integration developers discover and share reusable APIs, connectors, and templates. It acts as a central repository where developers can publish and access various assets, facilitating reuse and collaboration within the organization. By using Anypoint Exchange, developers can reduce duplication of effort, speed up development processes, and ensure consistency across integrations.

Other components like API Manager, Anypoint Studio, and Design Center serve different purposes, such as managing APIs, developing Mule applications, and designing API specifications, but they are not specifically focused on discovering and sharing reusable assets.

\* Best Practices for Asset Reuse on Anypoint Platform

### NEW QUESTION # 150

An API implementation is being developed to expose data from a production database via HTTP requests. The API implementation executes a database SELECT statement that is dynamically created based upon data received from each incoming HTTP request. The developers are planning to use various types of testing to make sure the Mule application works as expected, can handle specific workloads, and behaves correctly from an API consumer perspective. What type of testing would typically mock the results from each SELECT statement rather than actually execute it in the production database?

- A. Unit testing (white box)
- B. Functional testing (black box)
- C. Integration testing
- D. Performance testing

**Answer: A**

Explanation:

In Unit testing instead of using actual backends, stubs are used for the backend services. This ensures that developers are not blocked and have no dependency on other systems.

In Unit testing instead of using actual backends, stubs are used for the backend services. This ensures that developers are not blocked and have no dependency on other systems.

Below are the typical characteristics of unit testing.

- Unit tests do not require deployment into any special environment, such as a staging environment
- Unit tests can be run from within an embedded Mule runtime
- Unit tests can/should be implemented using MUnit
- For read-only interactions to any dependencies (such as other APIs): allowed to invoke production endpoints
- For write interactions: developers must implement mocks using MUnit
- Require knowledge of the implementation details of the API implementation under test

### NEW QUESTION # 151

.....

Generally speaking, reviewing what you have learned is important, since it will help you have a good command of the knowledge points. MuleSoft-Integration-Architect-I Online test engine has testing history and performance review, so that you can have a general review of what you have learned before next learning. In addition, MuleSoft-Integration-Architect-I exam dumps is convenient and easy to study, it supports all web browsers and Android and iOS etc. You can also practice offline if you like. We provide you with free update for 365 days for MuleSoft-Integration-Architect-I Exam Materials, so that you can get the latest information for the exam timely. And the latest information for MuleSoft-Integration-Architect-I exam dumps will be auto sent to you.
