The most amazing part of our MTCNA exam questions is that your success is 100% guaranteed. As the leader in this career for over ten years, we have enough strength to make our MTCNA study materials advanced in every single detail. On one hand, we have developed our MTCNA learning guide to the most accurate for our worthy customers. As a result, more than 98% of them passed the exam. On the second hand, our services are considered the best and the most professional to give guidance for our customers.

MikroTik MTCNA (MikroTik Certified Network Associate) certification is a highly sought after certification in the networking industry. It is designed to validate the basic knowledge of networking and routing using MikroTik RouterOS. MikroTik Certified Network Associate Exam certification is suitable for network engineers, administrators, and technicians who want to learn about MikroTik routers and associated technologies.

MikroTik MTCNA (MikroTik Certified Network Associate) certification exam is a comprehensive exam that tests the knowledge and skills of network professionals. MTCNA exam covers a wide range of topics, including routing protocols, network security, wireless networking, and network management. MikroTik Certified Network Associate Exam certification is recognized worldwide, and is highly valued in the IT industry.

**New MTCNA Test Sample | Updated MTCNA Demo**

There is no shortcut to MTCNA exam questions success except hard work. You cannot expect your dream of earning the MikroTik CERTIFICATION EXAM come true without using updated study material MikroTik Certified Network Associate Exam (MTCNA) exam questions. Success in the MTCNA exam adds more value to your resume and helps you land the best jobs in the industry.

The MTCNA exam is a one-day practical and theoretical test that covers various topics such as routing, wireless networking, network security, and network management. MTCNA exam comprises of 60 multiple-choice questions, and the candidate must score at least 60% to pass. MikroTik Certified Network Associate Exam certification is valid for three years and can be renewed by passing the MTCNA renewal exam.

## MikroTik Certified Network Associate Exam Sample Questions (Q111-Q116):

### NEW QUESTION # 111

Which of the following allows a router to respond to an ARP request that is intended for a remote host?

- A. Reverse ARP (RARP)
- **B. Proxy ARP**
- C. Gateway DP
- D. Inverse ARP (IARP)

**Answer: B**

### NEW QUESTION # 112

If ARP=reply-only is configured on an interface, this interface will

- A. accept all IP addresses listed in '/ip arp' as static entries
- **B. accept all MAC-addresses listed in '/ip arp' as static entries**
- C. accept IP and MAC address combinations listed in '/ip arp' list
- D. add new MAC addresses in '/ip arp' list
- E. add new IP addresses in '/ip arp' list

**Answer: B**

### NEW QUESTION # 113

In RouterOS queue configurations the word "total" usually represents

- A. upload
- **B. upload + download**
- C. Download
- D. download - upload

**Answer: B**

### NEW QUESTION # 114

Which of these are possible solutions to bridge two networks over a wireless link:

- A. One device in AP mode, another one in station
- **B. One device in AP mode, another one in station-pseudobridge-clone**
- **C. One device in AP mode, another one in station-pseudobridge**
- **D. Both devices in AP mode and enable WDS mode**

**Answer: B,C,D**

Explanation:

To bridge two networks over a wireless link (i.e., perform Layer 2 bridging), MikroTik offers several wireless modes that support bridging:

- \* WDS (Wireless Distribution System) is MikroTik's mechanism to forward Layer 2 frames over wireless
  - \* pseudobridge and pseudobridge-clone attempt to mimic Layer 2 bridging, with some limitations Option analysis:
  - \* A.#Correct-Using AP mode on both ends and enabling WDS allows full Layer 2 bridging
  - \* B.#Correct-pseudobridge-clone allows limited bridging by spoofing the MAC address of the connected host
  - \* C.#Correct-station-pseudobridge enables partial bridging (one client per MAC)
  - \* D.#Incorrect-station mode alone does not support Layer 2 bridging; it performs routing/NAT instead Extract from MTCNA Course Material - Bridging and Wireless Section:
- "To bridge over wireless, you can use WDS or station-pseudobridge(-clone). WDS provides true Layer 2 bridging, while pseudobridge methods simulate it for single hosts." Extract from Rene Meneses Study Guide - Wireless Bridging:
- "WDS is most reliable for bridging. pseudobridge and pseudobridge-clone work with one client and should be used cautiously." Extract from Terry Combs Notes - Wireless Bridging:
- "station mode alone is not sufficient for bridging. Use WDS or pseudobridge options."

### NEW QUESTION # 115

A network ready device is directly connected to a MikroTik RouterBOARD 750 with a correct U.T.P. RJ45 functioning cable. The device is configured with an IPv4 address of 192.168.100.70 using a subnet mask of 255.255.255.252. What will be a valid IPv4 address for the RouterBOARD 750 for a successful connection to the device?

- A. 192.168.100.68/255.255.255.252
- B. 192.168.100.71/255.255.255.252
- C. 192.168.100.69/255.255.255.252
- D. 192.168.100.70/255.255.255.252

Answer: C
