BONUS!!! 免費下載PDFExamDumps Order-Management-Administrator 考試題庫的完整版：https://drive.google.com/open?id=1Q--skwAwnyGLD_FBEU6fx0AVQu3JeHq

當你準備Order-Management-Administrator 考試的時候，盲目地學習與考試相關的知識是很不理想的學習方法。其實想要通過考試是有竅門的。如果你使用了好的工具，不僅可以節省很多的時間，還能得到輕鬆通過考試的保證。如果你想問什麼工具，那當然是PDFExamDumps的Order-Management-Administrator 考古題了。

Salesforce Order-Management-Administrator 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none">Order Management Basics: In this topic, the Salesforce Order Management Administrator Consultant learns to position Order Management effectively within Salesforce's core architecture. By articulating the extensible platform capabilities, the ability to integrate with third-party systems, and the overall value proposition, this knowledge helps highlight Order Management's seamless adaptability and efficiency. These insights are crucial for demonstrating business value during client engagements.
主題 2	<ul style="list-style-type: none">Advanced Topics: This topic challenges the Salesforce Order Management Administrator Consultant to diagnose and resolve configuration issues that hinder the launch or operation of Order Management processes. Proficiency includes troubleshooting integration problems and articulating how various processes interact to support successful deployments and system functionality.
主題 3	<ul style="list-style-type: none">Deployment and Debugging: In this area, aspiring order management administrator consultant demonstrates a deep understanding of deployment options, life cycles, and the configuration of supporting objects. This includes creating processes from scratch, leveraging pre-set data, and validating results in runtime scenarios.
主題 4	<ul style="list-style-type: none">Data Model: This topic equips the Salesforce Order Management Administrator Consultant to showcase knowledge of critical objects such as Order, Order Summary, Fulfillment Orders, and Return Orders. It involves establishing and tracing integrations with B2C Commerce or other systems, including custom attributes. Proficiency here is pivotal for ensuring seamless data flow and robust Order Management operations within complex business environments.
主題 5	<ul style="list-style-type: none">Process Automation and Integrations: This section helps the Salesforce Order Management Administrator Consultant demonstrate the capability to deliver business value by integrating Order Management with external systems using clicks rather than code. Mastery of navigation within Order Management processes, connecting nodes, and integrating systems efficiently ensures understanding of how to implement effective solutions.

當您對我們的Salesforce Order-Management-Administrator考古題感到滿意的時候，趕快購買吧，付款之后，無需等待，你可以立刻獲得你所購買的Order-Management-Administrator考古題。雖然我們的Order-Management-Administrator考古題通過率高達98%，但是我們有退款保證來保護客戶的利益，如果您的Order-Management-Administrator考試失敗了，我們退還你的購買費用，所有考生可以放心購買。選擇Salesforce Order-Management-Administrator考古題可以保證你可以在短時間內增強考試知識，并順利高分通過考試。

最新的 Salesforce Order Management Order-Management-Administrator 免費考試真題 (Q13-Q18):

問題 #13

What are two ways an administrator can export data from order Management?
(Choose 2)

- A. Use data loader
- B. Write APEX classes to query the daase and write to a file
- C. Use workbench to access the daase
- D. Find an application on AppExchange
- E. User the developer console

答案: A,C

問題 #14

An administrator is looking for payment information about a returned item on an Order Summary. Which object should the administrator look at?

- A. Invoice
- B. Return Order Summary
- C. Return
- D. Credit Memo

答案: D

解題說明:

Explanation

The object that the administrator should look at to find payment information about a returned item on an Order Summary is Credit Memo. A Credit Memo is a record that represents a refund or credit issued to a customer for a returned item. A Credit Memo has a lookup relationship to both Order Summary and Return Order objects, and it contains information such as the credit amount, status, payment method, etc. Verified References:https://help.salesforce.com/s/articleView?id=sf.order_management_credit_memo.htm&type=5

問題 #15

A company's service team should not see Process Exceptions on any Order Summaries. How can an administrator meet these requirements?

- A. Add a filter to the Process Exception component on the Order Summary lightning record page to hide the component for the service team's Profile
- B. Create a copy of the Order Summary lightning record page for the service team and remove the Process Exceptions component. Activate the lightning record page by profile for all Service team profiles.
- C. Modify the service team profiles to remove access to the lightning component and all associated Apex classes

- D. Modify the Order Summary page layout to remove visibility to the Process Exception component for Service team profiles

答案： B

解題說明：

The best way for the administrator to meet these requirements is to create a copy of the Order Summary lightning record page for the service team and remove the Process Exceptions component. Activate the lightning record page by profile for all Service team profiles. A Process Exception is a record that represents an error or exception that occurred during the order lifecycle, such as payment authorization failure, inventory allocation failure, fulfillment location assignment failure, etc. A Process Exception has a lookup relationship to the Order object, and it contains information such as the exception type, status, message, etc. The Process Exceptions component is a standard component that displays process exceptions related to an order on its record page. The administrator can use the Lightning App Builder to create a copy of the Order Summary lightning record page for the service team and remove the Process Exceptions component from the page layout. The administrator can then activate the lightning record page by profile for all Service team profiles, so that they do not see Process Exceptions on any Order Summaries. Verified Reference:

問題 #16

Universal Containers (UC) has a flow which performs some custom logic in order to determine a least-cost shipping location. Some of the variables should be reset at the beginning of each loop iteration. Which design element in Flow allows the Admin to do this?

- A. Reset
- B. Reassignment
- C. Preset
- D. Assignment

答案： D

解題說明：

The design element in Flow that allows the admin to reset some variables at the beginning of each loop iteration is Assignment. An Assignment element lets the admin assign new values to one or more variables or sObject fields in a flow. The admin can use an Assignment element before a Loop element to initialize the variables that are used in the loop, and then use another Assignment element inside the loop to reset the variables for each iteration. Verified References: https://help.salesforce.com/s/articleView?id=sf.flow_ref_elements_assignment.htm&type=5https://help.salesforce.com/s/articleView?id=sf.flow_ref_elements_loop.htm&type=5

問題 #17

What are two reasons an admin should choose an Event over a Trigger when it comes to building out a solution?

- A. Events cannot be subscribed to in a batch for bulk operations
- B. Events are asynchronous
- C. Event order is not guaranteed within a topic
- D. Events do not participate in a transaction scope

答案： B,D

解題說明：

Explanation

Two reasons an admin should choose an Event over a Trigger when it comes to building out a solution are:

Events are asynchronous. This means that events are processed in the background, without blocking the main execution thread. This can improve the performance and user experience of the solution, as well as avoid governor limits and timeouts.

Events do not participate in a transaction scope. This means that events are independent of the transaction that publishes them, and they do not affect the rollback or commit behavior of the transaction. This can avoid unwanted side effects and errors in the solution, as well as decouple the logic from the data.
