Real APICS CSCP Exam Questions -The Greatest Shortcut Towards Success

APICS CSCP Exam Questions Bank

As you plan a manufactured product supply chain, what is considered the most crucial element? - ✓✓Component suppliers. without the base components required for the product, the rest of the suppl chain cannot operate as designed.

The owner of a coal mine need power for the machinery that he uses to extract the coal. what is this and example of? - ✓✓Doubling back. When a raw material supplier ends up using a component that they produce in their own operations, it is an example of the supply chain doubling back to serve itself. in this instance, the coal might be used to run power generators that can then be used to power the basic mining equipment used to gather coal.

which is not essential element of product supply chain model? material extraction, material transformation into product, selling to the user, reverse chains. - ✓✓Reverse chain. Reverse transaction is not an essential element of supply chain product model.

stakeholders - ✓✓all who can be affected by the decision made in a supply chain. this may encompass the public, goverment, trade associations, and univerisities.

how can the goverment impact supply chain function? - ✓✓Levying taxes, creation of infrastructure, and regulation.

what is the best way to view the nature of a supply chain? ... a series of ..... - ✓✓a series of processes that are linked together. each process can be carried out by a different entity, the success or failure of the supply chain model depends on the process that allows information, material, and cash to flow most seamlessly.

what WAS the primary focus of some of the earlies supply chain models? - ✓✓Cutting costs. However, as business became more connected, the focus became value creation, rather than trimming expenses. this makes the chain more stable.

APICS Certified Supply Chain Professional Sample Questions (Q260-Q265):

NEW QUESTION # 260
The value that logistics provides within the supply chain can best be summarized as:

- A. establishing inventory and delivery goals with various customers that fulfill the firm's profit objectives.
- B. satisfying customer expectations about availability and delivery at an acceptable total cost.
- C. meeting promised location and on-time delivery goals with minimal use of expediting.
- D. providing accurate in-transit and delivery information to customers and salespeople.

Answer: B

Explanation:
Logistics plays a crucial role in the supply chain by ensuring that products are available and delivered to customers as expected.
Here's a detailed explanation:
* Customer Satisfaction: Logistics focuses on meeting customer expectations regarding product availability and delivery timelines, ensuring that customers receive what they want, when they want it.
* Cost Management: Achieving these goals while maintaining an acceptable total cost is essential. This involves optimizing transportation, warehousing, and inventory management to balance service levels and costs.
* Efficiency: Effective logistics minimizes delays and inefficiencies, ensuring a smooth flow of goods from suppliers to end customers.
* Reliability: Consistent performance in meeting delivery promises builds trust and reliability with customers.
Logistics thus provides value by balancing customer service and cost efficiency, ensuring the right products are available at the right time and place.
