Pass Guaranteed Quiz 2026 NS0-528: Implementation Engineer - Data Protection Exam Useful Reliable Exam Sample

VCEdumps offers a free demo of Network Appliance NS0-528 exam dumps before the purchase to test the features of the products. VCEdumps also offers 12 months of free Network Appliance NS0-528 Exam Questions updates if the NS0-528 certification exam content changes after purchasing our NS0-528 exam dumps.

Network Appliance Implementation Engineer - Data Protection Exam Sample Questions (Q240-Q245):

NEW QUESTION # 240

You want to ensure that a particular version of SnapManager for SQL is supported in a configuration. Which three components need to be verified in the Interoperability Matrix? (Choose three.)

- A. SnapManager version
- B. On Command Unified Manager version
- C. SnapDrive version
- D. Data ONTAP version
- E. FC HBA firmware

Answer: A,C,D

NEW QUESTION # 241

Your DevOps team reported that one virtual machine on a VMware datastore has been corrupted due to a ransomware attack. In this scenario, which two methods would solve the issue? (Choose two.)

- A. Clone the volume's Snapshot copy prior to the attack, mount, and storage vMotion.
- B. Restore the datastore using SnapCenter Plug-in for VMware vSphere.
- C. Restore the Snapshot copy of the volume from ONTAP System Manager.
- D. Restore the VM using SnapCenter Plug-in for VMware vSphere.

Answer: A,B

NEW QUESTION # 242

What are two NetApp data protection solutions? (Choose two.)

- A. RecoverPoint
- B. SnapMirror
- C. SnapVault
- D. TimeFinder

Answer: B,C

NEW QUESTION # 243

You need to upgrade to NetApp ONTAP 9.12.1 software on your source cluster in a SnapMirror relationship. The source cluster differs from the destination cluster and you want to take advantage of version-flexible SnapMirror replication.

Which option should you choose?

- A. Run the command `snapmirror resync` and set the type to XDP.
- B. Delete the DP-type relationship and create a new XDP-type relationship.
- C. Delete the XDP-type relationship and create a new DP-type relationship.
- D. SnapMirror automatically converts existing DP-type relationships to XDP-type relationships.

Answer: B

Explanation:

To take advantage of version-flexible SnapMirror (introduced with XDP-type relationships), you must delete the existing DP-type relationship and create a new one using type XDP. DP-type relationships do not support version flexibility, which allows the source and destination clusters to run different ONTAP versions.

NEW QUESTION # 244

You are the administrator of a large NAS environment that includes multiple NetApp and non-NetApp onsite storage systems, as well as multiple cloud storage solutions. One of your responsibilities is to replicate data between these systems.

Which NetApp tool enables you to replicate data between these autonomous systems?

- A. BlueXP disaster recovery
- B. BlueXP tiering
- C. BlueXP backup and recovery
- D. BlueXP copy and sync

Answer: D

Explanation:

BlueXP copy and sync enables efficient data replication and synchronization between NetApp and non-NetApp storage systems, both on-premises and in the cloud. It's specifically designed for cross-platform and cross-environment data movement, making it ideal for this scenario.

NEW QUESTION # 245
