Adobe Experience Manager Architect Master Sample Questions (Q77-Q82):

NEW QUESTION # 77

An AEM client requests that an Architect to establish non-functional KPIs. The Architect needs to avoid impacting user experience, asset processing, and download speed while doing this.

How should the Architect measure the performance properly to establish target metrics?

- A. Use the OOTB Explain Query Tool
- B. Use JMeter for end-to-end tests

- C. Use the Free Request Log Analyzer Command Line Tool
- D. Tail the Access Log and look for long-running queries

Answer: A

NEW QUESTION # 78

During the implementation of a public-facing website based on AEM as a Cloud Service, the customer raises an additional requirement to have a commenting functionality for end users implemented on the pages. What should the Architect do to make the design a future proof solution?

- A. Integrate a third-party solution to store comments externally
- B. Save comments in JCR and leverage Sling Distribution to synchronize comments between publishers
- **C. Use MongoDB as provided with AEM as a Cloud Service to store the comments**
- D. Save comments in JCR and leverage reverse replication to synchronize comments via author

Answer: C

NEW QUESTION # 79

A client has an existing AEM site using components that proxy AEM WCM Core Components. The site uses simple page authoring without referenced content, The client wants to create a new experience on another marketing channel. The plan is to use as much of the existing page content as possible to avoid refactoring the current content and to maintain consistency across channels. Which AEM capability should an Architect use to meet these requirements?

- **A. Content Fragments**
- B. Experience Fragments
- C. Assets API
- D. Sling Model Exporter

Answer: A

NEW QUESTION # 80

An AEM Architect is moving existing content from an on-premise AEM to an AEM Cloud Service instance using the Content Transfer Tool. As part of the initial source preparation, the Architect is going to run the offline compaction on the on-premise AEM. What other two actions should the Architect do to the on-premise AEM before proceeding with the extraction phase? (Choose two.)

- A. Verify that wipe mode is enabled
- B. Stop all bundles using the AEM Web Console
- C. Verify that free disk space is at least 1.5x the JCR size
- **D. Run datastore consistency check via oak-run**
- **E. Validate that all replication agents are disabled**

Answer: D,E

Explanation:

According to Adobe Experience Manager documentation¹, before using the Content Transfer Tool, it is recommended to disable all replication agents on the source AEM instance to prevent any content changes during the migration process. It is also recommended to run a datastore consistency check via oak-run tool² to ensure that there are no missing or corrupted binaries in the source AEM instance.

NEW QUESTION # 81

A client has a site that serves both authenticated and anonymous users. A subsection of the site, which is applicable for only logged-in users, is resource intensive. In order to have a scalable yet secured solution, using available features what would an architect choose for concerned hierarchy?

- **A. Cache the concerned hierarchy at Dispatcher but not CDN**
