Axis ANVE Questions - With 25% Discount Offer [2026]

In the Axis ANVE PDF format of Actualtests4sure, all the available questions are updated and real. In the same way, Axis ANVE

PDF version is compatible with smartphones, laptops, and tablets. Furthermore, the Axis Network Video Exam (ANVE) PDF format is portable and users can also print Axis Network Video Exam (ANVE) questions in this document.

The ANVE Certification program covers a wide range of topics related to network video surveillance, including camera installation and configuration, video management systems, network design, and cybersecurity. It is designed to provide participants with a comprehensive understanding of network video technologies and how they can be applied to different security applications.

Axis ANVE certification is offered at two levels, namely Axis Certified Professional and Axis Certified Specialist. The Axis Certified Professional is the entry-level certification, which tests your knowledge of basic network video concepts and technology. The Axis Certified Specialist, on the other hand, is an advanced-level certification that tests your expertise in specific areas of network video technology.

Axis Network Video Exam Sample Questions (Q164-Q169):

NEW QUESTION # 164

What statement best describes OptimizedIR?

- A. The IR LEDs change polarity
- B. The IR LEDs change wavelengths
- C. The IR LEDs move mechanically
- **D. The IR LEDs adapt to the field of view**

Answer: D

Explanation:

OptimizedIR technology in Axis cameras refers to the intelligent adaptation of IR illumination to the camera's field of view. This ensures even illumination across the entire scene, reducing overexposure and underexposure caused by traditional fixed IR lights. The IR LEDs adjust their intensity and spread according to the zoom level and scene requirements, providing optimal image quality in low-light conditions. Axis documentation highlights OptimizedIR as a feature that enhances night-time surveillance by ensuring balanced lighting.

NEW QUESTION # 165

Match the product series with right product. Drag each gray box from the left column to the matching image box in the right column.

Answer:

Explanation:

Reference: Reference: <http://www.axis.com/products/video/camera/index.htm> (see the cameras series at the bottom of the page)

NEW QUESTION # 166

What network device is required to move data from one LAN to another?

- A. A port
- **B. A router**
- C. A hub
- D. A subnet

Answer: B

Explanation:

"A router is used to connect different local area networks (LANs), routing traffic between them and providing access to other networks or the internet."

- Axis Communications Academy, Network Video Fundamentals, 2022

"Routers are devices that forward data packets between computer networks."

- Axis Network Device Basics

NEW QUESTION # 167

Which camera aspect ratio is preferred to cover as much as possible of the narrow aisles in a warehouse?

- A. 9:16
- B. 16:9
- C. 21:9
- D. 1:3

Answer: A

Explanation:

"For covering narrow aisles, a vertical aspect ratio such as 9:16 is preferred as it matches the shape of the scene, allowing for better coverage and detail along the aisle's length."

- Axis Communications Academy, Network Video Fundamentals, 2022

"The corridor format (9:16 aspect ratio) maximizes image usability in vertically oriented scenes, such as warehouse aisles or hallways."

- Axis Corridor Format Technology

Axis Communications Academy, Network Video Fundamentals, 2022 (p. 20)

Axis Web Article: Corridor Format

NEW QUESTION # 168

When dealing with a poorly lit scene, which of the following options would most improve image quality?

- A. Adjusting exposure settings
- B. Adjusting brightness
- C. Changing camera placement
- D. Adding light

Answer: D

Explanation:

When dealing with a poorly lit scene, adding light is the most effective option to improve image quality.

Proper illumination ensures that the camera's sensor can capture clear and detailed images, reducing noise and enhancing visibility.

While adjusting exposure settings, brightness, or changing camera placement can help, they are secondary to the fundamental requirement of adequate lighting.

Reference: Axis Communications, "Improving Image Quality in Low Light Conditions", Application Note.
