Exam Topics 3V0-22.25 Pdf | 3V0-22.25 Valid Exam Book

According to different kinds of questionnaires based on study condition among different age groups, we have drawn a conclusion

that the majority learners have the same problems to a large extent, that is low-efficiency, low-productivity, and lack of plan and periodicity. As a consequence of these problem, our 3V0-22.25 test prep is totally designed for these study groups to improve their capability and efficiency when preparing for 3V0-22.25 Exams, thus inspiring them obtain the targeted 3V0-22.25 certificate successfully. There are many advantages of our 3V0-22.25 question torrent that we are happy to introduce you and you can pass the exam for sure.

VMware Advanced VMware Cloud Foundation 9.0 Operation Sample Questions (Q191-Q196):

NEW QUESTION # 191

An operator needs to update the "Currency" setting used for Cost Analysis from USD to Euro (€) to reflect the location of a new data center.

Task

Change Global Currency to Euro.

What is the correct procedure to apply this change?

- A. Go to Administration -> Management -> Global Settings -> Cost/Currency, select Euro, and click Update. Note that historical cost data may need to be recalculated.
- B. Go to the "Cost Overview" Dashboard and edit the widget to show Euro.
- C. Reinstall VCF Operations and select "Euro" during the OVF deployment wizard.
- D. Edit the "Cost Driver" policy and apply a conversion rate of 0.9 manually.

Answer: A

NEW QUESTION # 192

A Cloud Admin is reviewing the "Powered Off VMs" list in the Reclaim workbench. Several VMs listed are actually "Golden Images" and "Templates" that are intentionally kept powered off. The admin wants to permanently hide these specific objects from the reclamation list to prevent accidental deletion.

What is the most scalable configuration to achieve this?

- A. Manually select the VMs in the list and click the "Exclude" button every Monday.
- B. Create a Custom Group that identifies these objects (e.g., via a tag Type: Golden-Image), and then modify the active Policy to disable the "Powered Off VM" reclamation analyzer for this specific group.
- C. Delete the Golden Images and restore them from backup when needed.
- D. Power on the Golden Images so they no longer match the "Powered Off" criteria.

Answer: B

NEW QUESTION # 193

While investigating a "VM unresponsive" issue, an administrator finds a log entry: VM stuck in stuned state. They need to check if any administrative actions (like a Snapshot creation or vMotion) occurred immediately prior to this event that might have triggered the stun.

How can they correlate these distinct events (VM Error vs Admin Action) in a single view?

- A. Open two browser windows: one for the VM logs, one for vCenter logs.
- B. It is impossible to mix vCenter and ESXi logs.
- C. Run a broad query for the VM name (text contains MyVM) which retrieves both the ESXi logs (reporting the stun) AND the vCenter logs (reporting the 'Create Snapshot' task) because both sources likely mention the VM's name in their messages. Then use "View Context" or sort by time to see the sequence.
- D. Run a query filtering for vm_name = "MyVM" AND event_type = "vCenter Task".

Answer: C

NEW QUESTION # 194

When creating a new user account locally in VCF Operations (not imported from AD), what step is mandatory to ensure the user can actually log in and do something?

- A. The user must be assigned to at least one User Group that has a Role and Object Group mapping associated with it. (Or assigned directly, though Group is best practice).
- B. The user must be given a "vSphere License" assignment.
- C. The user account must be "Activated" by a second administrator.
- D. The user must have a valid email address configured for MFA.

Answer: A

NEW QUESTION # 195

A VCF Operations for Logs cluster consisting of 3 nodes is experiencing slow query performance and ingestion lag. The administrator decides to scale out the cluster by adding 3 new nodes.

What is the operational impact on the existing historical log data after the new nodes are added?

- A. The existing data must be manually migrated to the new nodes using the "Data Rebalance Tool".
- B. The existing data is automatically rebalanced across all 6 nodes immediately after expansion.
- C. The new nodes cannot accept data until the existing data is fully replicated to them, causing a downtime window.
- D. The existing data remains on the original 3 nodes; only new incoming logs are distributed across the 6 nodes. Historical searches will query the old nodes for old data and all nodes for new data.

Answer: D

NEW QUESTION # 196

.....

Most experts agree that the best time to ask for more dough is after you feel your 3V0-22.25 performance has really stood out. Our 3V0-22.25 guide materials provide such a learning system where you can improve your study efficiency to a great extent. During the process of using our 3V0-22.25 Study Materials, you focus yourself on the exam bank within the given time, and we will refer to the real exam time to set your 3V0-22.25 practice time, which will make you feel the actual 3V0-22.25 exam environment and build up confidence.
