AP-207 Pdf Braindumps & Valuable AP-207 Feedback

As we all know, famous companies use certificates as an important criterion for evaluating a person when recruiting. The number of certificates you have means the level of your ability. AP-207 practice materials are an effective tool to help you reflect your abilities. With our study materials, you do not need to have a high IQ, you do not need to spend a lot of time to learn, you only need to follow the method AP-207 Real Questions provide to you, and then you can easily pass the exam. Our study material is like a tutor helping

you learn, but unlike a tutor who make you spend too much money and time on learning.

Salesforce Energy and Utilities Cloud Accredited Professional Sample Questions (Q60-Q65):

NEW QUESTION # 60

An energy company provides gas and electricity services to some of its customers, but not all. When a new customer moves in, what object is used to determine what type of service is available at the premise?

- A. Account
- **B. Service Point**
- C. Meter
- D. Asset

Answer: B

Explanation:

In Salesforce Energy and Utilities Cloud, the Service Point object is used to determine the type of service available at a premise. This object represents a physical location where utility services are delivered, such as electricity or gas. By associating service points with specific types of utility services, energy companies can effectively manage and track the availability of different services for new and existing customers. This enables precise and efficient service provisioning, ensuring that customers receive the appropriate utility services based on their location and service point characteristics. Reference = The Salesforce Energy and Utilities Cloud documentation provides detailed information on the data model, including the role of the Service Point object in managing utility service delivery and availability: https://developer.salesforce.com/docs/atlas.en-us.industries_energy_and_utilities.meta/industries_energy_and_utilities/

NEW QUESTION # 61

An administrator for an energy company recently built a new FlexCard that shows whether a customer is enrolled in autopay. How can the administrator put the new FlexCard in the Energy and Utilities Cloud Contact Center Console?

- A. Open the object's page layout and add the FlexCard LWC ante the layout.
- **B. Edit the Lightning Record or App Builder and place the FlexCard LIC onto the page.**
- C. Create a VisualForce Page wrapper for the FlexCard and add it onto the page.
- D. Create a Lightning Web Component wrapper for the FlexCard and add it onto the page.

Answer: B

NEW QUESTION # 62

A developer discovers that the Lightning Web Components in their Energy and Utilities Cloud org aren't being rendered correctly. What could be the likely reason for this issue?

- A. Remote Site Settings entries are missing.
- B. The developer needs to re-write the components to be compatible with Energy and Utilities Cloud.
- C. Lightning Web Components aren't supported on Energy and Utilities Cloud.
- **D. There are incorrect permissions an Lightning Web Components.**

Answer: D

NEW QUESTION # 63

Which are the two essential deployment steps for migrating Utilities Self Serve Portal from one org to another? Choose 2 answers

- A. Select Self-Serve Portal components from the Energy and Utilities Cloud industry Process Library.
- **B. Create an Experience cloud site to set up a sample digital experience site on your target org.**
- C. Create customer community user profiles for the Utilities self-serve portal.
- **D. Set up Utilities self-serve templates on your target org.**

Answer: B,D

NEW QUESTION # 64

An implementation team has requested an org containing the Energy and Utilities Cloud Large Account Sales Management application. After working with the app, they determine that they need the functionality of the homepage for agents and team leaders. How does the team get the required components into their development environment?

- A. The team should request the Energy and Utilities Cloud engineering team to deploy the necessary components into the project development environment.
- **B. The team should follow the documentation and migrate the required components into the* development environment.**
- C. The team should take a look at the application code, and then go and re-type the code into their development environment.
- D. The team needs to copy and paste the required components from their trial environment into their development environment.

Answer: B

Explanation:

When the implementation team requires specific components from the Energy and Utilities Cloud Large Account Sales Management application in their development environment, the recommended approach is to follow the Salesforce documentation on migrating components. This process involves identifying the necessary components and utilizing Salesforce's deployment tools (such as change sets or the Salesforce CLI) to move them from one environment to another. This method ensures a controlled and systematic approach to customization and development, aligning with Salesforce's best practices for environment management and application development. Reference = Salesforce documentation provides extensive guides on environment management and the migration of components between environments. This includes using deployment tools and following best practices to ensure seamless and efficient development processes: https://developer.salesforce.com/docs/atlas.en-us.dev_lifecycle.meta/dev_lifecycle/

NEW QUESTION # 65

.....

In the past ten years, our company has never stopped improving the Energy and Utilities Cloud Accredited Professional exam cram. For a long time, we have invested much money to perfect our products.
