VMware Cloud Management and Automation Advanced Design Sample Questions (Q59-Q64):

NEW QUESTION # 59

An organization wants to provide an automated self-service catalog to all departments within the organization.
The key stakeholders have asked for the platform to:
Be resilient to component failures.
Each department consume the same on-premises infrastructure.
Restrict visibility and management of virtual machines to only those in their respective departments.
Choose one design decision that will meet the business requirements.

- A. Deploy single node deployment and use tenants to separate the departments.
- B. Deploy multi-node deployment and use projects to separate the departments.
- C. Deploy single node deployment and use projects to separate the departments.
- D. Deploy multi-node deployment and use tenants to separate the departments.

Answer: B

Explanation:
A multi-node deployment provides resilience to component failures, and using projects allows you to restrict visibility and management of virtual machines to each department, while sharing the same on-premises infrastructure.
