Valid Microsoft Power BI Data Analyst Exam Dumps 100% Guarantee Pass Microsoft Power BI Data Analyst Exam - PassSureExam

If you want to constantly improve yourself and realize your value, if you are not satisfied with your current state of work, if you still spend a lot of time studying and waiting for PL-300 qualification examination, then you need our PL-300 material, which can help solve all of the above problems. I can guarantee that our study materials will be your best choice. Our PL-300 Study Materials have three different versions, including the PDF version, the software version and the online version, to meet the different needs, our products have many advantages, I will introduce you to the main characteristics of our PL-300 research materials.

Microsoft Power BI Data Analyst Sample Questions (Q112-Q117):

NEW QUESTION # 112

You have an Azure SQL database that contains sales transactions. The database is updated frequently.

You need to generate reports from the data to detect fraudulent transactions. The data must be visible within five minutes of an update.

How should you configure the data connection?

- A. Set the Command timeout in minutes setting.
- B. Set Data Connectivity mode to DirectQuery.
- C. Add a SQL statement.
- D. Set Data Connectivity mode to Import.

Answer: B

Explanation:

Explanation

With Power BI Desktop, when you connect to your data source, it's always possible to import a copy of the data into the Power BI Desktop. For some data sources, an alternative approach is available: connect directly to the data source using DirectQuery.

DirectQuery: No data is imported or copied into Power BI Desktop. For relational sources, the selected tables and columns appear in the Fields list. For multi-dimensional sources like SAP Business Warehouse, the dimensions and measures of the selected cube appear in the Fields list. As you create or interact with a visualization, Power BI Desktop queries the underlying data source, so you're always viewing current data.

Reference:

<https://docs.microsoft.com/en-us/power-bi/connect-data/desktop-use-directquery>

NEW QUESTION # 113

You have a table that contains sales data and approximately 1,000 rows.

You need to identify outliers in the table.

Which type of visualization should you use?

- A. donut chart
- B. pie chart
- C. scatter plot
- D. area chart

Answer: C

Explanation:

Outliers are those data points that lie outside the overall pattern of distribution & the easiest way to detect outliers is through graphs.

Box plots, Scatter plots can help detect them easily.

NEW QUESTION # 114

You have the data lineage shown in the following exhibit.

□ Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□

NEW QUESTION # 115

You have a Power BI model for sales data. You create a measure to calculate the year-to-date sales.

You need to compare the year-to-date sales with the previous year for the same time period.

Which DAX function should you use?

- A. SAMEPERIODLASTYEAR
- B. PREVIOUSYEAR
- C. LASTDATE
- D. TOTALYTD

Answer: A

NEW QUESTION # 116

You have a report page that contains the visuals shown in the following exhibit.

□

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the

graphic. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: cross-filter

By default, selecting a data point in one visual on a report page will cross-filter or cross-highlight the other visuals on the page.

Box 2: cross-highlight

Example:

By default, selecting a data point in one visual on a report page will cross-filter or cross-highlight the other visuals on the page.

1. Let's see what happens when we select Moderation.

2. Cross-filtering removes data that doesn't apply. Selecting Moderation in the doughnut chart cross-filters the line chart. The line chart now only displays data points for the Moderation segment.

3. Cross-highlighting retains all the original data points but dims the portion that does not apply to your selection. Selecting Moderation in the doughnut chart cross-highlights the column chart. The column chart dims all the data that applies to the Convenience segment and highlights all the data that applies to the Moderation segment.
