Passing JN0-336 exam is not very simple. JN0-336 exam requires a high degree of professional knowledge of IT, and if you lack this knowledge, UpdateDumps can provide you with a source of IT knowledge. UpdateDumps's expert team will use their wealth of expertise and experience to help you increase your knowledge, and can provide you practice questions and answers JN0-336 certification exam. UpdateDumps will not only do our best to help you pass the JN0-336 Certification Exam for only one time, but also help you consolidate your IT expertise. If you select UpdateDumps, we can not only guarantee you 100% pass JN0-336 certification exam, but also provide you with a free year of exam practice questions and answers update service. And if you fail to pass the examination carelessly, we can guarantee that we will immediately 100% refund your cost to you.

Can you imagine that you only need to review twenty hours to successfully obtain the JN0-336 certification? Can you imagine that you don't have to stay up late to learn and get your boss's favor? With JN0-336 study quiz, passing exams is no longer a dream. If you are an office worker, JN0-336 Preparation questions can help you make better use of the scattered time to review. Just visit our website and try our JN0-336 exam questions, then you will find what you need.

>> Juniper JN0-336 Latest Test Question <<

Pass-Sure JN0-336 Latest Test Question & Passing JN0-336 Exam is No More a Challenging Task

To fit in this amazing and highly accepted exam, you must prepare for it with high-rank practice materials like our JN0-336 study materials. Our JN0-336 exam questions are the Best choice in terms of time and money. If you are a beginner, start with the learning guide of JN0-336 Practice Engine and our products will correct your learning problems with the help of the JN0-336 training braindumps.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q62-Q67):

NEW QUESTION # 62

Which three statements about SRX Series device chassis clusters are true? (Choose three.)

- A. A control link failure causes the secondary cluster node to be disabled.
- B. Recovery from a control link failure requires that the secondary member device be rebooted.
- C. Chassis cluster control links must be configured using RFC 1918 IP addresses.
- D. Heartbeat messages verify that the chassis cluster control link is working.
- E. Chassis cluster member devices synchronize configuration using the control link.

Answer: A,D,E

Explanation:

B: Chassis cluster member devices synchronize configuration using the control link: This statement is correct because the control link

is used for configuration synchronization among other functions.

C: A control link failure causes the secondary cluster node to be disabled: This statement is correct because a control link failure causes the secondary node to become ineligible for primary role and remain in secondary role until the control link is restored.

E: Heartbeat messages verify that the chassis cluster control link is working: This statement is correct because heartbeat messages are sent periodically over the control link to monitor its status.

NEW QUESTION # 63

You enable chassis clustering on two devices and assign a cluster ID and a node ID to each device. In this scenario, what is the correct order for rebooting the devices?

- A. Reboot the secondary device, then the primary device.
- B. Reboot the primary device, then the secondary device.
- C. Reboot only the primary device since the secondary will assign itself the correct cluster and node ID.
- D. Reboot only the secondary device since the primary will assign itself the correct cluster and node ID.

Answer: A

Explanation:

When chassis clustering is enabled and IDs are assigned, it is typically recommended to first reboot the secondary device. This allows the secondary device to fully integrate and recognize its role and settings within the cluster without affecting the ongoing traffic that the primary device might be handling.

Once the secondary device has successfully rebooted and is operational within the cluster, the primary device can then be rebooted. This ensures that the primary device's reboot does not cause any network downtime, as the secondary device, now fully operational, can take over the traffic and roles as needed.

NEW QUESTION # 64

Which two functions does Juniper ATP Cloud perform to reduce delays in the inspection of files?

(Choose two.)

- A. Juniper ATP Cloud performs a cache lookup on files.
- B. Juniper ATP Cloud allows the creation of allowlists.
- C. Juniper ATP Cloud uses a single antivirus software package to analyze files.
- D. Juniper ATP Cloud allows end users to bypass the inspection of files.

Answer: A,B

Explanation:

Juniper ATP Cloud is a cloud-based service that provides advanced threat prevention and detection for your network. It integrates with SRX Series firewalls and MX Series routers to analyze files and network traffic for signs of malicious activity.

Two functions that Juniper ATP Cloud performs to reduce delays in the inspection of files are:

Juniper ATP Cloud allows the creation of allowlists: Allowlists are lists of trusted files or file hashes that are excluded from scanning by Juniper ATP Cloud. You can create allowlists based on file name, file type, file size, file hash, or sender domain. By using allowlists, you can reduce the number of files that need to be uploaded to Juniper ATP Cloud for analysis and improve the performance and efficiency of your network.

Juniper ATP Cloud performs a cache lookup on files: Cache lookup is a process that checks if a file has been previously scanned by Juniper ATP Cloud and if there is a cached verdict for it. If there is a cached verdict, Juniper ATP Cloud returns it immediately without scanning the file again. If there is no cached verdict, Juniper ATP Cloud uploads the file for analysis. By using cache lookup, you can reduce the time and bandwidth required for scanning files by Juniper ATP Cloud.

Reference: = [Juniper Advanced Threat Prevention Cloud (ATP Cloud)], [Configuring Allowlists], [Understanding Cache Lookup]

NEW QUESTION # 65

Exhibit

```

Exhibit
(primary:node0)
user@srx> show chassis cluster status
Cluster ID: 3
Node          Priority      Status      Preempt  Manual failover
Redundancy group: 0 , Failover count: 1
  node0       129          primary    no       no
  node1       128          secondary  no       no
Redundancy group: 1 , Failover count: 3
  node0       0           primary    no       no
  node1       0           secondary  no       no

```

Using the information from the exhibit, which statement is correct?

- A. Redundancy group 0 is in an ineligible state.
- B. Node1 is the active node for the control plane
- C. There are no issues with the cluster.
- D. Redundancy group 1 is in an ineligible state.

Answer: C

NEW QUESTION # 66

You have deployed an SRX300 Series device and determined that files have stopped being scanned. In this scenario, what is a reason for this problem?

- A. The infected host communicated with a command-and-control server, but it did not download malware.
- B. You have exceeded the maximum files submission for your SRX platform size.
- C. The file is too small to have a virus.
- D. The software license is a free model and only scans executable type files.

Answer: B

Explanation:

You have exceeded the maximum files submission for your SRX platform size: This statement is correct because file scanning on SRX300 Series device has a limit on the number of files that can be submitted per minute based on the platform size. For example, SRX320 has a limit of 10 files per minute.

NEW QUESTION # 67

.....

If you want to study JN0-336 certification exam and plan to pass exam one shot, UpdateDumps exam braindumps will be your best assist. Purchasing valid JN0-336 exam dumps is not a cheap thing for some candidates in the internet since there is so much different advertisement. If you feel confused you can choose our JN0-336 Exam Dumps. We are sure about "pass Guaranteed" & "Money Back Guaranteed" so that you can feel safe and worry-free on our website.

JN0-336 Valid Test Materials: <https://www.updatedumps.com/Juniper/JN0-336-updated-exam-dumps.html>

Juniper JN0-336 Latest Test Question Because it will make you pass the exam easily, since then rise higher and higher on your career path, Juniper JN0-336 Latest Test Question Every page is carefully arranged by our experts with clear layout and helpful knowledge to remember, JN0-336 practice test software 365 days updated and reliable, Preparing Well To Pass The Juniper JN0-336.

The specific layer interactions for each file will determine how much of this Pass JN0-336 Guaranteed latter technique can be used, For the purpose of your Microsoft exams you won't really need to know much more detail on multicasting than this.

JN0-336 Exam Braindumps & JN0-336 Test Quiz & JN0-336 Practice Material

Because it will make you pass the exam easily, since then rise higher JN0-336 and higher on your career path, Every page is carefully arranged by our experts with clear layout and helpful knowledge to remember.

JN0-336 practice test software 365 days updated and reliable, Preparing Well To Pass The Juniper JN0-336, Do I need to choose between Security, Specialist (JNCIS-SEC) dumps PDF and JNCIS-SEC JN0-336 practice test questions software?
