## Valid SAFe-RTE Exam Topics - Reliable Exam SAFe-RTE Pass4sure

Our evaluation system for SAFe-RTE test material is smart and very powerful. First of all, our researchers have made great efforts to ensure that the data scoring system of our SAFe-RTE test questions can stand the test of practicality. Once you have completed your study tasks and submitted your training results, the evaluation system will begin to quickly and accurately perform statistical assessments of your marks on the SAFe-RTE Exam Torrent. If you encounter something you do not understand, in the process of learning our SAFe-RTE exam torrent, you can ask our staff. We provide you with 24-hour online services to help you solve the problem. Therefore we can ensure that we will provide you with efficient services.

## Scaled Agile SAFe Release Train Engineer Sample Questions (Q198-Q203):

### NEW QUESTION # 198

Which statement is true about using a Program Kanban system

- A. The board tracks features, dependencies and milestones
- B. WIP limits are used to provide any needed buffers
- C. All work is visualized, progress is continually tracked
- **D. Work is pushed through the Kanban to ensure train capacity is utilized**

**Answer: D**

### NEW QUESTION # 199

(Which event facilitated by the Release Train Engineer (RTE) is designed to keep the ART on the tracks?)

- A. Coach Sync
- B. Iteration Review
- C. Solution Demo
- **D. Team Sync**

**Answer: D**

Explanation:

Comprehensive and Detailed 250 to 250 words of Explanation From Exact Extract of SAFe 6.0, including the SAFe Release domains:

In SAFe 6.0, the Team Sync is a key ART-level event facilitated by the Release Train Engineer (RTE) and is explicitly designed to keep the Agile Release Train on track during Program Increment execution. The Team Sync replaces the traditional Scrum of Scrums and is a short, frequent coordination event where team representatives discuss progress, dependencies, impediments, and risks. Its purpose is to ensure alignment across teams and enable fast problem-solving to maintain flow.

SAFe guidance states that the Team Sync focuses on how teams are progressing toward PI Objectives, what issues may impact delivery, and what coordination is needed to address cross-team dependencies. By making problems visible early, the RTE can facilitate timely decision-making and escalation when needed. This directly supports the Release domain's emphasis on transparency, alignment, and predictable execution.

The other options do not serve this purpose. Solution Demos are facilitated at the Solution level to demonstrate integrated solution increments. Iteration Reviews occur at the team level and focus on team progress. Coach Sync is used to align Scrum Masters and Team Coaches on systemic improvement actions, not to manage day-to-day ART execution.

Therefore, the Team Sync is the RTE-facilitated event designed to keep the ART on the tracks throughout the PI.

### NEW QUESTION # 200

What is one example of a servant leader behavior pattern?

- A. Focuses on individual task Metrics
- B. Thinks about the day-to-day activities
- C. Uses authority rather than persuasion when necessary
- **D. Understands and empathizes with others**

**Answer: D**

### NEW QUESTION # 201

Some teams are having difficulty identifying where they might make process improvements. How might the RTE support them?

- A. Observe the team's ceremonies and share observations
- B. Run longer I&A meetings to brainstorm improvement items
- C. Conduct a survey to identify the worst problems the team is having
- **D. Encourage the team to perform regular self-assessments and discuss findings**

**Answer: D**

### NEW QUESTION # 202

What are two purposes of a community of practice? (Choose two.)

- **A. To share knowledge and skills**
- **B. To network**
- C. To refine definitions of done
- D. To approve standards
- E. To align tasks across teams

**Answer: A,B**

Explanation:
