## Reliable C-CPI-2506 Test Syllabus | C-CPI-2506 Reliable Practice Materials

We have been developing our C-CPI-2506 practice engine for many years. We have no doubt about our quality. Our experience is definitely what you need. To combine many factors, our C-CPI-2506 real exam must be your best choice. And our C-CPI-2506 Exam Questions have been tested by many of our loyal customers, as you can find that the 98% of them all passed their C-CPI-2506 exam and a lot of them left their warm feedbacks on the website.

## SAP Certified Associate - Integration Developer Sample Questions (Q11-Q16):

### NEW QUESTION # 11

In the SAP Integration Suite, where can you change the virtual host name?

- A. Configure ? APIs

- B. Discover - APIs
- C. Design APIs
- D. **Settings APIs**

**Answer: D**

Explanation:

In the SAP Integration Suite, you can change the virtual host name in the Settings APIs. The Settings APIs allow you to configure various aspects of your API provider, such as the virtual host name, the base path, the authentication method, and the CORS settings. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

#### NEW QUESTION # 12

What can you do in the Cloud Integration capability within SAP Integration Suite? Note: There are 2 correct answers to this question

- A. **Develop custom adapters.**
- B. Develop complex integration scenarios in Python.
- C. **Connect to multiple endpoints.**
- D. Connect to different cloud runtime environments.

**Answer: A,C**

Explanation:

In the Cloud Integration capability within SAP Integration Suite, you can do the following things:

Connect to multiple endpoints. You can use various adapters and protocols to connect to different systems and applications, such as SAP S/4HANA, Salesforce, SuccessFactors, and more.

Develop custom adapters. You can use the Adapter Development Kit (ADK) to create your own adapters for specific integration scenarios and requirements. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

#### NEW QUESTION # 13

During development, in which integration flow component can you configure a simulated payload?

- A. General Splitter
- B. **Content Modifier**
- C. SOAP Adapter
- D. Data Store Operations

**Answer: B**

Explanation:

In SAP Cloud Integration, during development and testing:

The Content Modifier can be used to insert or simulate payloads, headers, or properties.

This allows developers to test flows without requiring external calls.

Other options:

SOAP Adapter # Used for SOAP communication, not payload simulation.

General Splitter # Splits incoming payloads, doesn't simulate.

Data Store Operations # Manages stored messages, not simulation.

Thus, the correct component for simulated payloads is Content Modifier.

#### NEW QUESTION # 14

Which architectural pattern in an event-driven architecture allows direct communication between two parties without an intermediary?

- A. Message Queue
- B. Event Sourcing
- C. Publish-Subscribe
- D. **Point-to-Point**

## Answer: D

Explanation:

References

In an event-driven architecture (EDA), several messaging patterns exist:

Point-to-Point # Enables direct communication between exactly two parties (sender and receiver) without intermediaries.

Publish-Subscribe # Multiple consumers subscribe to events; requires a broker/intermediary (like Event Mesh).

Message Queue # Relies on a queue as an intermediary between producer and consumer.

Event Sourcing # Refers to storing state changes as events, not a communication pattern.

Therefore, the only pattern allowing direct communication without an intermediary is Point-to-Point.

## NEW QUESTION # 15

For which of the following scenarios can you use scripting in an integration flow?

- A. Create XSLT mapping artifacts.
- B. Add information to the message log
- C. Configure an OData adapter.

## Answer: B

Explanation:

In SAP Cloud Integration (part of Integration Suite), scripting (Groovy, JavaScript) is supported in integration flows to handle custom logic that cannot be achieved by standard adapters or mappings. Example use cases:

Enriching messages with dynamic values.

Adding custom log entries into the Message Processing Log.

Custom validation, conversions, or calculations.

Other options:

A). Create XSLT mapping artifacts # Achieved via XSLT, not scripting.

C). Configure an OData adapter # Done via adapter configuration, not scripting.

Thus, scripting is used for runtime logic enhancements like adding information to the message log.

## NEW QUESTION # 16

.....

Considering that different customers have various needs, we provide three versions of C-CPI-2506 test torrent available--- PDF version, PC Test Engine and Online Test Engine versions. One of the most favorable demo--- PDF version, in the form of Q&A, can be downloaded for free. This kind of C-CPI-2506 exam prep is printable and has instant access to download, which means you can study at any place at any time. PC version of C-CPI-2506 exam question stimulates real exam environment and supports MS operating system, which is a more practical way to study for the exam. In addition, the online test engine of the C-CPI-2506 Exam Prep seems to get a higher expectation among most candidates, on account that almost every user is accustomed to studying or working with APP in their portable phones or tablet PC. We assure you that each version has the same study materials, just choose one you like.
