C_SIGDA_2403 PDF Question & New C_SIGDA_2403 Exam Duration

PassTorrent is a reliable and professional leader in developing and delivering authorized IT exam training for all the IT candidates. We promise to give the most valid C_SIGDA_2403 exam dumps to all of our clients and make the SAP C_SIGDA_2403 exam training material highly beneficial for you. Before you buy our C_SIGDA_2403 exam torrent, you can free download the C_SIGDA_2403 Exam Demo to have a try. If you buy it, you will receive an email attached with C_SIGDA_2403 exam dumps instantly, then, you can start your study and prepare for C_SIGDA_2403 exam test. You will get a high score with the help of our SAP C_SIGDA_2403 practice training.

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q13-Q18):

NEW QUESTION # 13

Which group includes the E-Mail task?

- A. Automatic actions
- B. Events & Gateways
- C. Services & other actions
- **D. Main actions**

Answer: D

NEW QUESTION # 14

What is a Query?

- **A. A request for information from a database**
- B. A request created by the system
- C. A request to show a data model
- D. A request to start a workflow

Answer: A

Explanation:

A query in the context of SAP Signavio Process Intelligence is a fundamental concept for data retrieval. The documentation provides a clear definition:

* Exact Extract: "A query is a request for information from a database, typically written in SQL, to retrieve specific data or perform calculations based on defined criteria. In SAP Signavio Process Intelligence, queries are used to extract process data for analysis, such as case attributes or event sequences." (SAP Signavio Process Intelligence User Guide, section on "SQL Query Editor and Data Retrieval").

* Explanation:

* Option B (A request for information from a database): This is correct as a query is a structured request, often in SQL, to retrieve or manipulate data from the database underlying Process Intelligence, such as fetching cases with specific attributes.

* Option A (A request to start a workflow) is incorrect because workflows are managed in SAP Signavio Process Governance, and queries do not initiate them.

* Option C (A request to show a data model) is incorrect as displaying a data model is a configuration task, not the purpose of a query.

* Option D (A request created by the system) is incorrect because queries are user-defined or configured, not automatically generated by the system.

Reference: SAP Signavio Process Intelligence User Guide, section on "SQL Query Editor and Data Retrieval"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 4: Query Fundamentals.

NEW QUESTION # 15

Which process-related areas are the focus for Business Process Management? Note: There are 3 correct answers to this question.

- A. Process Discovery
- B. Process Governance
- **C. Process Implementation**
- **D. Process Transparency**
- **E. Process Improvement**

Answer: C,D,E

NEW QUESTION # 16

Which of the following areas are part of the lifecycle of a business process? Note: There are 3 correct answers to this question.

- A. Process Risk Management
- **B. Process Analysis**
- C. Process Approvals
- **D. Process Execution**
- **E. Process Documentation**

Answer: B,D,E

NEW QUESTION # 17

What is the Process Conformance Widget used for?

- A. Visualizing customer journeys and live insights
- **B. Visualizing different variants against a BPMN model of a process**
- C. Visualizing activities in processes over time
- D. Visualizing the way tasks are performed and backtracking the process flow

Answer: B

Explanation:

The Process Conformance Widget in SAP Signavio Process Intelligence is designed to compare actual process execution data against a reference process model to identify deviations. According to the SAP Signavio documentation:

* Option C (Visualizing different variants against a BPMN model of a process): The Process Conformance Widget displays how actual process variants, derived from event logs, align or deviate from a predefined BPMN (Business Process Model and Notation) model. It highlights non-compliant steps and variations, enabling analysts to assess process adherence.

* Option A (Visualizing the way tasks are performed and backtracking the process flow) is incorrect because backtracking process flows is handled by the Process Discovery or Variant Explorer Widgets, not the Conformance Widget.

* Option B (Visualizing activities in processes over time) is incorrect as time-based analysis is performed by the Over Time Widget, not the Conformance Widget.

Reference: SAP Signavio Process Intelligence Widget Documentation, section on "Process Conformance Widget"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 4: Process Conformance Analysis.

NEW QUESTION # 18

.....

Are you worried about insufficient time to prepare the exam? Do you have a scientific learning plan? Maybe you have set a series of to-do list, but it's hard to put into practice for there are always unexpected changes during the C_SIGDA_2403 exam.
