Microsoft 365 Administrator Sample Questions (Q186-Q191):

NEW QUESTION # 186

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the users shown in the following table.

The domain syncs to an Azure AD tenant named contoso.com as shown in the exhibit. (Click the Exhibit tab.)

User2 fails to authenticate to Azure AD when signing in as user2@fabrikam.com

You need to ensure that User2 can access the resources in Azure AD.

Solution: From the Microsoft Entra admin center, you assign User2 the Security Reader role. You instruct User2 to sign in as user2@contoso.com.

Does this meet the goal?

- **A. No**
- B. Yes

Answer: A

Explanation:

This is not a permissions issue so you do not need to assign the Security Reader role.

The on-premises Active Directory domain is named contoso.com. User2 could sign on as user2@contoso.com but you would first need to change the UPN of User2 to user2@contoso.com

NEW QUESTION # 187

Your company has an Azure AD tenant named contoso.onmicrosoft.com.

You purchase a domain named contoso.com from a registrar and add all the required DNS records.

You create a user account named User1. User1 is configured to sign in as user1@contoso.onmicrosoft.com.

You need to configure User1 to sign in as user1@contoso.com.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

NEW QUESTION # 188

HOTSPOT

You have a Microsoft 365 E5 subscription.

You need to meet the following requirements:

Automatically encrypt documents stored in Microsoft OneDrive and SharePoint.

Enable co-authoring for Microsoft Office documents encrypted by using a sensitivity label.

Which two settings should you use in the Microsoft Purview compliance portal? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Information protection

Automatically encrypt documents stored in Microsoft OneDrive and SharePoint.

How to integrate Microsoft Purview Information Protection with Defender for Cloud Apps
Enable Microsoft Purview Information Protection All you have to do to integrate Microsoft Purview Information Protection with Defender for Cloud Apps is select a single checkbox. By enabling automatic scan, you enable searching for sensitivity labels from Microsoft Purview Information Protection on your Office 365 files without the need to create a policy. After you enable it, if you have files in your cloud environment that are labeled with sensitivity labels from Microsoft Purview Information Protection, you'll see them in Defender for Cloud Apps.

To enable Defender for Cloud Apps to scan files with content inspection enabled for sensitivity labels:

In the Microsoft 365 Defender portal, select Settings. Then choose Cloud Apps. Then go to Information Protection -> Microsoft Information Protection.

Note: Encryption of data at rest

Encryption at rest includes two components: BitLocker disk-level encryption and per-file encryption of customer content.

BitLocker is deployed for OneDrive for Business and SharePoint Online across the service. Per-file encryption is also in OneDrive for Business and SharePoint Online in Microsoft 365 multi-tenant and new dedicated environments that are built on multi-tenant technology.

Box 2: Settings

Enable co-authoring for Microsoft Office documents encrypted by using a sensitivity label.

1. Sign in to the Microsoft Purview compliance portal as a global admin for your tenant.
2. From the navigation pane, select Settings > Co-authoring for files with sensitivity files.
3. On the Co-authoring for files with sensitivity labels page, read the summary description, prerequisites, and what to expect.
4. Then select Turn on co-authoring for files with sensitivity labels, and Apply.

5. Wait 24 hours for this setting to replicate across your environment before you use this new feature for co- authoring.

NEW QUESTION # 189

You have a Microsoft 365 E5 subscription that uses Microsoft Intune.

You have devices enrolled in Intune as shown in the following table.

You create the device configuration profiles shown in the following table.

Which profiles will be applied to each device? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 190

You have a Microsoft 365 E5 subscription that has auditing turned on. The subscription contains the users shown in the following table.

You plan to create a new user named User1.

How long will the user creation audit event be available if Admin1 or Admin2 creates User1? To answer, select the appropriate options in the answer area.

Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 191
