

# Test UiPath-ADPv1 Question | UiPath-ADPv1 Interactive Course

DOWNLOAD the newest RealExamFree UiPath-ADPv1 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=14IE26tqpqawanMxHrUYnRatREO-j65xX>

Downloading the UiPath-ADPv1 free demo doesn't cost you anything and you will learn about the pattern of our practice exam and the accuracy of our UiPath-ADPv1 test answers. We constantly check the updating of UiPath-ADPv1 vce pdf to follow the current exam requirement and you will be allowed to free update your pdf files one-year. Don't hesitate to get help from our customer assisting.

## UiPath UiPath-ADPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• UiPath Activities: In this section, the discussion is related to various UiPath activities for UI interaction, data manipulation, control flow, and more.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• UiPath Studio Fundamentals: In this section, the focus is given to the understanding of Robotic Process Automation (RPA) concepts; it covers UiPath Studio and its components, Working with the UiPath user interface, project creation, management, and version control.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Design and Development: This section covers designing workflows using sequences, flowcharts, and state machines, building reusable components with libraries, exception handling and debugging techniques, etc.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Debugging and Testing: This section is about utilizing logging and debugging tools and adopting unit testing and test automation strategies.</li></ul>

## Free PDF Quiz High-quality UiPath - UiPath-ADPv1 - Test UiPath (ADPv1) Automation Developer Professional Question

It is very normal to be afraid of the exam, especially such difficult exam like UiPath-ADPv1 exam. We know that encouragement alone cannot really improve your confidence in exam, so we provide the most practical and effective test software to help you pass the UiPath-ADPv1 Exam. You can use our samples first to experience the effect of our software, and we believe that you can realize our profession and efforts by researching and developing UiPath-ADPv1 exam software from samples of UiPath-ADPv1.

## UiPath (ADPv1) Automation Developer Professional Sample Questions (Q190-Q195):

### NEW QUESTION # 190

A developer Intends to incorporate a Flow Switch activity within a Flowchart. What Is a characteristic of this activity?

- A. The Flow Switch activity is designed solely for usage in sequence workflows.
- **B. The default TypeArgument property for the Flow Switch activity is set to Int32.**
- C. Two default cases can be assigned in the Default section
- D. Default cases can be numbered.

**Answer: B**

Explanation:

In UiPath, the Flow Switch activity is commonly used within flowcharts. Its default TypeArgument property is set to Int32, which means it is primarily used to handle integer-based decision branching.

### NEW QUESTION # 191

What can be verified in the InitAllSettingsTestCase test case?

- A. Verify If a certain application is open in the execution environment.
- B. Verify the naming of a certain key present in the 'Config' dictionary.
- **C. Verify If a certain key is present in the 'Config' dictionary.**
- D. Verify the variable type for the 'Config' dictionary.

**Answer: C**

Explanation:

In the InitAllSettingsTestCase test case, one of the verifications that can be done is to check if a certain key is present in the 'Config' dictionary. This ensures that necessary configurations are available for the process.

### NEW QUESTION # 192

What functionality does the Step Out action offer when a developer Is reviewing a process during debugging, as shown in the exhibit?

- A. Executes only one activity at a time and then pauses the execution
- **B. Executes activities in the current container and then pauses the execution**
- C. Re-executes the activity which threw an exception.
- D. Steps out and stops current execution.

**Answer: B**

Explanation:

The "Step Out" action in UiPath Studio's debugging tools allows the developer to finish executing the current container (such as a sequence, loop, or workflow) and returns to the next higher level in the call stack.

Essentially, it continues the execution of activities within the current container without stepping into any invoked workflows or activities.

The correct functionality provided by the "Step Out" action is:

D: Executes activities in the current container and then pauses the execution after stepping out to the next higher level in the call stack.

### NEW QUESTION # 193

Given the following list of arguments:

□ and the following code:

□ What is the value that will be displayed in the Output Panel at the end of the sequence below:

- A. 0
- B. 1
- **C. 2**
- D. 3

**Answer: C**

Explanation:

The value that will be displayed in the Output Panel at the end of the sequence is 9. This is because the code in the Invoke Code activity is looping through the array in\_numArray and setting the variable out\_numVar to the highest value in the array. The array in\_numArray has the values {1, 2, 7, 9, 4} as shown in the list of arguments. The variable out\_numVar is initialized to 0. The For loop iterates from 0 to the upper bound of the array, which is 4. In each iteration, the If condition checks if the current element of the array is greater than the current value of out\_numVar. If it is, then out\_numVar is assigned to the current element of the array. Otherwise, out\_numVar remains unchanged. Therefore, after the first iteration, out\_numVar becomes 1. After the second iteration, out\_numVar becomes 2. After the third iteration, out\_numVar becomes 7. After the fourth iteration, out\_numVar becomes 9. After the fifth iteration, out\_numVar remains 9, since 4 is not greater than 9. The Write Line activity outputs the value of out\_numVar to the console, which is

9. References: Invoke Code

#### NEW QUESTION # 194

When performing Remote Debugging using an Unattended Robot connection, Studio sends the list of project dependencies to the remote robot. From where does the remote robot download the required packages?

- **A. Orchestrator feeds and UiPath Official activity feed.**
- B. Studio local NuGet cache.
- C. Activity feeds configured in Studio.
- D. Orchestrator feeds and Robot activity feeds.

**Answer: A**

Explanation:

When performing remote debugging using an unattended robot connection, Studio must ensure that the necessary project dependencies (such as activities or libraries) are available to the robot. The unattended robot retrieves these dependencies from external sources. Specifically, the robot downloads the required packages from:

\* Orchestrator feeds: These are package feeds configured in Orchestrator, such as internal libraries or activities deployed and managed via Orchestrator.

\* UiPath Official activity feed: This feed includes all the official packages provided by UiPath and is a central repository for activities used in automation projects.

While Studio and its local NuGet cache (as in option A) may store packages locally for the developer, when the project is run remotely, the unattended robot does not access the developer's local cache. Instead, it relies on these external feeds (Orchestrator and UiPath Official activity feed) to ensure consistency and availability of the correct versions of dependencies. Option D is incorrect because the feeds configured in Studio do not directly affect where the robot downloads its dependencies.

References

- \* UiPath Official Documentation on Remote Debugging
- \* Orchestrator Feeds
- \* UiPath Official Activities Feed

#### NEW QUESTION # 195

.....

The pass rate for UiPath-ADPv1 learning materials is 98.75%, and you can pass the exam successfully by using the UiPath-ADPv1 exam dumps of us. We also pass guarantee and money back guarantee if you fail to pass the exam, and the refund money will be returned to your payment account. The UiPath-ADPv1 Learning Materials are famous for their high-quality, and if you choose, they can not only improve your ability in the process of learning but also help you get the certificate successfully. Choose us, and you will never regret.
