問題 #150

You're a Workplace Admin for a major retail chain in Europe on the Slack Pro plan. An executive user at your company recently discovered that Slack message retention for your organization was set at one year. The executive asked you to find out how to access their channel history from more than 18 months ago using any means necessary. Will it be possible for you to recover the data?

(Select the best answer.)

You're a Workplace Admin for a major retail chain in Europe on the Slack Pro plan. An executive user at your company recently discovered that Slack message retention for your organization was set at one year. The executive asked you to find out how to access their channel history from more than 18 months ago using any means necessary. Will it be possible for you to recover the data? (Select the best answer.)

- A. Yes, because Slack's disaster recovery policy and business continuity plan provide backups that organizations on the Slack Pro plan can access upon request from Org Admins.
- **B. No, because customer data is removed immediately upon expiration of message retention. Slack and deletes all information from production systems at that time.**
- C. No, because this company is in a territory affected by GDPR. Slack is legally not allowed to provide this data after the retention date has passed.
- D. Yes, because Slack employs multi-factor authentication for all administrative access to systems. Slack can access channel history upon request from Org Admins.

答案: B

問題 #151

You're an Org Owner on a Slack Enterprise Grid plan. Due to a legal issue, you need to export all messages and files from a Slack Connect channel.

What is the best way to do this?

(Select the best answer.)

- A. Use the Discovery API to export all messages and files from the channel.
- B. Use Slack's Import/Export Data tool to export all messages from the channel, and then manually download the files.
- **C. Use the Discovery API to export messages and files from the channel that were sent by your company. Then ask the partners in the Slack Connect channel to do the same.**
- D. Use the Audit Logs API to monitor and report on all messages and files from the channel.

答案: C

解題說明:

According to the Slack Enterprise Grid documentation:

"Org Owners and Org Admins can use the Discovery API to export messages and files sent by their organization in Slack Connect channels. Messages and files sent by external partners must be requested from the respective organizations." Because Slack Connect involves multiple organizations, each organization retains ownership of its own data.

Thus, you can only export your company's messages/files via the Discovery API; partners must export their own data.

問題 #152

You're the Org Admin for a company's Slack Enterprise Grid organization. Currently, Workspace Admins can decide how guest invitations are managed within their workspace. You want to lock this policy so that guest invitations can only be approved by Org Owners and Admins.

What action should you take to make this change?

(Select the best answer)

- A. Lock guest invitations from each workspace's setting page.

- B. Notify users that guest invitations must be submitted at the org level in the announcements channel.
- **C. Lock guest invitations from the org admin dashboard.**
- D. Ask the Org Owner to make this change because only Org Owners can change org-level policies and settings.

答案： C

解題說明：

According to Slack's Enterprise Grid admin settings:

"Org Admins and Org Owners can lock the guest invitation setting at the organization level from the Org Admin dashboard to prevent Workspace Admins from controlling it independently." Option A only applies to workspace-level settings (not sufficient). Option B is unnecessary because Org Admins also have permission. Option C is just communication without any enforcement. 問題 #153

Which plan(s) support(s) customizable message and file retention features?

- A. Business+ and Enterprise Grid
- **B. Pro, Business+ and Enterprise Grid**
- C. Free, Pro, Business+ and Enterprise Grid
- D. Enterprise Grid only

答案： B

問題 #154

Which of the following statements describes the effect of configuring mandatory Two Factor authentication (2FA) in Slack?

- A. Members must use a biometric reader to authenticate with Slack.
- B. Members must have a sophisticated and complex password that is updated regularly.
- C. Members use single sign-on (SSO) to handle the exchange of usernames and passwords on behalf of Slack.
- **D. Members must submit a verification code along with their password each time they sign in.**

答案： D
