Topic 9	<ul style="list-style-type: none">• Traces: Covers distributed tracing and PurePath technology to track and analyze individual transactions end-to-end across services.

Dynatrace Associate Certification Exam Sample Questions (Q67-Q72):

NEW QUESTION # 67

What types of notifications can you set up for Security Problems? (Select all that apply)

- A. ServiceNow
- B. Jira
- C. PagerDuty
- D. Custom Integrations
- E. Emails

Answer: A,B,C,D,E

Explanation:

Dynatrace allows configuring problem notifications, including security problems, through multiple integration channels:

* Email notifications for direct alerts

* Jira integration for creating and tracking issues

* ServiceNow integration for IT service management workflows

* PagerDuty integration for incident response and alerting

* Custom integrations using webhooks or APIs for flexible notification handling These integrations ensure that security problems are communicated effectively across teams and tools, enabling rapid response and resolution.

Reference: Based on official Dynatrace University training materials covering alerting, problem notifications, and integrations.

NEW QUESTION # 68

Credential vault stores sensitive information for which Dynatrace capabilities?

- A. Synthetic HTTP monitors

- B. Dynatrace Apps
- C. Dynatrace API
- D. Synthetic Browser monitors
- E. Dynatrace Extensions v2

Answer: A,D,E

Explanation:

The Credential Vault in Dynatrace is used to securely store sensitive data such as usernames, passwords, and tokens for capabilities that require authentication.

It is used by:

- * Synthetic Browser monitors for login simulations and scripted interactions
- * Synthetic HTTP monitors for authenticated API testing
- * Dynatrace Extensions v2 for connecting to external systems that require credentials Other options are not applicable:
- * Dynatrace API uses tokens but not stored via Credential Vault in this context
- * Dynatrace Apps do not rely on Credential Vault for authentication storage This ensures secure handling of credentials without exposing them in plain text.

Reference: Based on official Dynatrace University training materials covering Credential Vault usage.

NEW QUESTION # 69

What can conversion goals be based on? (Select all that apply)

- A. Number of Actions per Session
- B. Destination URL
- C. Number of Errors on Session end
- D. Session Duration
- E. Specific User Action

Answer: A,B,D,E

Explanation:

In Dynatrace Digital Experience Monitoring, conversion goals are used to measure key user behaviors and business outcomes. These goals can be defined based on several criteria related to user sessions and actions.

Supported bases for conversion goals include:

- * Specific User Action, such as clicking a button or completing a defined interaction
- * Destination URL, where reaching a specific page indicates a successful conversion
- * Number of Actions per Session, which reflects engagement level
- * Session Duration, indicating how long users interact with the application The Number of Errors on Session end is not used as a basis for defining conversion goals. Instead, it is used more for session quality analysis rather than measuring successful conversions.

Reference: Based on official Dynatrace University training materials covering Real User Monitoring and conversion goals.

NEW QUESTION # 70

I need fine-grained control of the Business Events data ingested. Adding which attribute allows me to achieve this?

- A. dt.spanid
- B. dt.traceid
- C. dt.entity.process_group_instance
- D. dt.security.context

Answer: D

Explanation:

The dt.security.context attribute enables fine-grained access control over ingested data, including Business Events.

It allows:

- * Segmentation of data
- * Restricting access to specific users or groups
- * Applying security boundaries to sensitive datasets

Other attributes are related to tracing:

- * dt.traceid and dt.spanid are for distributed tracing

* dt.entity.process_group_instance links data to entities

Only dt.security.context provides control over data access and segmentation.

Reference: Based on official Dynatrace University training materials covering Grail and data security.

NEW QUESTION # 71

Which attribute provides a unique value to view a transaction end-to-end?

- A. Service type
- **B. W3C trace id**
- C. Span kind
- D. Process id

Answer: B

Explanation:

The W3C trace ID uniquely identifies a distributed trace across all services and components involved in a transaction.

It enables:

- * End-to-end visibility of a request
- * Correlation of spans across multiple services
- * Full trace reconstruction in distributed environments

Other attributes are not unique identifiers:

- * Span kind describes the role of a span
- * Process ID identifies a process, not a transaction
- * Service type categorizes services

Only the W3C trace ID provides a globally unique identifier for a full transaction.

Reference: Based on official Dynatrace University training materials covering distributed tracing.

NEW QUESTION # 72

.....

These Dynatrace-Associate PDF Questions are being presented in practice test software and PDF dumps file formats. The Dynatrace Dynatrace-Associate desktop practice test software is easy to use and install on your desktop computers. Whereas the other Dynatrace-Associate web-based practice test software is concerned, this is a simple browser-based application that works with all operating systems. Both practice tests are customizable, simulate actual exam scenarios, and help you overcome mistakes.
