

CIPT Exam Forum - Valid CIPT Mock Exam

CIPT Exam Questions with 100% Correct Answers 2024

Access Control Entry - answer ✓✓ An element in an access control list (ACL). Each entry identifies a trustee and specifies the access rights allowed, denied, or audited for that trustee.

Access Control List - answer ✓✓ A list of access control entries (ACE) that apply to an object. Each ACE controls or monitors access to an object by a specified user.

Discretionary access control list (DACL) - answer ✓✓ This ACL identifies the trustees that are allowed or denied access to a securable object

System access control list (SACL) - answer ✓✓ This access control list enables administrators to log attempts to access a secured object. Can comprise part of an audit trail

Accountability - answer ✓✓ A fair information practices principle: A data controller should be accountable for complying with measures which give effect to the fair information practice principles.

Active Data Collection - answer ✓✓ Where the data subject actively provides their data, typically through the use of web forms, text boxes, check boxes or radio buttons.

Passive Data Collection - answer ✓✓ Data gathered without the involvement of the data provider. The data subject might not know that the data is being captured.

First-party Collection - answer ✓✓ A data subject provides personal data to the data controller directly, through a form or survey that is sent to the collector upon the data subject submitting the information

Surveillance Collection - answer ✓✓ Collection by way of observing the data stream produced by a given data subject without interference in the data subject's activity.

Repurposing - answer ✓✓ Taking information collected for one purpose and using it for another (secondary) purpose.

Third-party Collection - answer ✓✓ Transferring data collected directly from a data subject to another organisation for their use.

Risk Controls - answer ✓✓ Administrative Controls, Technical Controls, & Physical Controls

Risk Responses - answer ✓✓ Accept, Transfer, Mitigate, Avoid

Functional Requirements - answer ✓✓ Specific function intended for a system

PrepAwayTest believes in customer satisfaction and strives hard to make the entire IAPP CIPT exam preparation process simple, smart, and successful. These IAPP CIPT exam questions formats are IAPP CIPT Pdf Dumps file, desktop practice test software and web-based practice test software. All these three PrepAwayTest's IAPP CIPT exam dumps formats contain the real and updated CIPT practice test.

IAPP Certified Information Privacy Technologist (CIPT) Sample Questions (Q60-Q65):

NEW QUESTION # 60

What is an example of a just-in-time notice?

- A. Privacy information given to a user when he attempts to comment on an online article.
- B. A warning that a website may be unsafe.
- C. A credit card company calling a user to verify a purchase before it is authorized
- D. A full organizational privacy notice publicly available on a website

Answer: A

Explanation:

A just-in-time notice (JIT notice) refers to the practice of providing users with relevant privacy information at the point when they are about to engage in a specific activity that involves data collection. This approach ensures that users are informed about how their data will be used right when it is most relevant to them. For example, presenting a privacy notice when a user attempts to comment on an online article fits this description. This JIT notice informs the user about how their comment data will be processed and stored, ensuring they are aware of the privacy implications at the moment they need to be.

NEW QUESTION # 61

A sensitive biometrics authentication system is particularly susceptible to?

- A. Slow recognition speeds.
- B. Theft of finely individualized personal data.
- C. False positives.
- D. False negatives.

Answer: C

NEW QUESTION # 62

Organizations understand there are aggregation risks associated with the way they process their customer's data. They typically include the details of this aggregation risk in a privacy notice and ask that all customers acknowledge they understand these risks and consent to the processing.

What type of risk response does this notice and consent represent?

- A. Risk transfer.
- B. Risk mitigation.
- C. Risk acceptance.
- D. Risk avoidance.

Answer: A

NEW QUESTION # 63

SCENARIO

Please use the following to answer the next question:

Chuck, a compliance auditor for a consulting firm focusing on healthcare clients, was required to travel to the client's office to perform an onsite review of the client's operations. He rented a car from Finley Motors upon arrival at the airport as so he could commute to and from the client's office. The car rental agreement was electronically signed by Chuck and included his name, address, driver's license, make/model of the car, billing rate, and additional details describing the rental transaction. On the second night, Chuck was caught by a red light camera not stopping at an intersection on his way to dinner. Chuck returned the car back to the car rental agency at the end week without mentioning the infraction and Finley Motors emailed a copy of the final receipt to the address on file.

Local law enforcement later reviewed the red light camera footage. As Finley Motors is the registered owner of the car, a notice was sent to them indicating the infraction and fine incurred. This notice included the license plate number, occurrence date and time, a photograph of the driver, and a web portal link to a video clip of the violation for further review. Finley Motors, however, was not responsible for the violation as they were not driving the car at the time and transferred the incident to AMP Payment Resources for further review. AMP Payment Resources identified Chuck as the driver based on the rental agreement he signed when picking up the car and then contacted Chuck directly through a written letter regarding the infraction to collect the fine.

After reviewing the incident through the AMP Payment Resources' web portal, Chuck paid the fine using his personal credit card.

Two weeks later, Finley Motors sent Chuck an email promotion offering 10% off a future rental.

What is the strongest method for authenticating Chuck's identity prior to allowing access to his violation information through the AMP Payment Resources web portal?

- A. By requiring Chuck use the rental agreement number in combination with his email address.
- **B. By requiring Chuck to call AMP Payment Resources directly and provide his date of birth and home address.**
- C. By requiring Chuck use his credit card number in combination with the last 4 digits of his driver's license.
- D. By requiring Chuck use the last 4 digits of his driver's license number in combination with a unique PIN provided within the violation notice.

Answer: B

NEW QUESTION # 64

SCENARIO

Clean-Q is a company that offers house-hold and office cleaning services. The company receives requests from consumers via their website and telephone, to book cleaning services. Based on the type and size of service, Clean-Q then contracts individuals that are registered on its resource database - currently managed in-house by Clean-Q IT Support. Because of Clean-Q's business model, resources are contracted as needed instead of permanently employed.

The table below indicates some of the personal information Clean-Q requires as part of its business operations:

Category	Types of Personal Information
Customers	Name, address (location), contact information, billing information
Resources (contracted)	Name, contact information, banking details, address

Clean-Q has an internal employee base of about 30 people. A recent privacy compliance exercise has been conducted to align employee data management and human resource functions with applicable data protection regulation. Therefore, the Clean-Q permanent employee base is not included as part of this scenario.

With an increase in construction work and housing developments, Clean-Q has had an influx of requests for cleaning services. The demand has overwhelmed Clean-Q's traditional supply and demand system that has caused some overlapping bookings.

In a business strategy session held by senior management recently, Clean-Q invited vendors to present potential solutions to their current operational issues. These vendors included Application developers and Cloud-Q's solution providers, presenting their proposed solutions and platforms.

The Managing Director opted to initiate the process to integrate Clean-Q's operations with a cloud solution (LeadOps) that will provide the following solution one single online platform: A web interface that Clean-Q accesses for the purposes of resource and customer management. This would entail uploading resource and customer information.

A customer facing web interface that enables customers to register, manage and submit cleaning service requests online.

A resource facing web interface that enables resources to apply and manage their assigned jobs.

An online payment facility for customers to pay for services.

If Clean-Q were to utilize LeadOps' services, what is a contract clause that may be included in the agreement entered into with LeadOps?

- A. A provision that holds LeadOps liable for a data breach involving Clean-Q's information.
- B. A provision that requires LeadOps to notify Clean-Q of any suspected breaches of information that involves customer or resource information managed on behalf of Clean-Q.
- C. A provision that allows Clean-Q to conduct audits of LeadOps' information processing and information security environment, at LeadOps' cost and at any time that Clean-Q requires.
- D. A provision prescribing technical and organizational controls that LeadOps must implement.

Answer: C

NEW QUESTION # 65

.....

In this way, you can achieve your career objectives. Before this, you have to pass the IAPP CIPT exam which is not an easy task. The CIPT certification exam is a difficult and competitive exam that always gives a tough time to CIPT Exam holders.
