

NSE8_813 Latest Test Format & NSE8_813 Dumps Free

Part of Test	Section	Item Type	Time allowed
Introduction			Not timed
Part 1: Speaking & Writing	Section 1	Personal Introduction	1 Minute
	Section 2	Read aloud Repeat sentence Describe image Re-tell lecture Answer short question	30-35 Minutes
	Section 3-4	Summarize Written text	20 Minutes
	Section 5	Summarize written text or write essay	10 Or 20 Minutes
	Section 6	Write Essay	20 Minutes
Part 2: Reading		Multiple-choice, Choose single Answer	32-41 Minutes
		Multiple-choice, Choose Multiple Answer	
		Re-order paragraphs	
		Reading: Fill in the blanks	
Part 3: Listening		Reading & writing: Fill in the blanks	20 or 30 Minutes
	Section 1	Summarize spoken text	
	Section 2	Multiple-choice, Choose Multiple Answer	
		Fill in the blanks	
		Highlight correct summary	
		Multiple-choice, Choose single Answer	
		Select missing word	
		Highlight incorrect words	
		Write from dictation	

Maybe you have desired the NSE8_813 certification for a long time but don't have time or good methods to study. Maybe you always thought study was too boring for you. Our NSE8_813 study materials will change your mind. With our NSE8_813 exam questions, you will soon feel the happiness of study. Just look at the three different versions of our NSE8_813 learning quiz: the PDF, Software and APP online which can apply to study not only on the paper, but also can apply to study on IPAD, phone or laptop.

Today we use computers & internet every day, high-technology products bring our life convenient and benefits. Many positions have great demand. TopExamCollection releases valid NSE8_813 dumps torrent files to help workers go through exams and get certifications so that many dreaming young people can enter into this field and even get a good position. Fortinet NSE8_813 Dumps Torrent files is the leading position in this field and can be your NO.1 choice.

NSE8_813 Latest Test Format: Fortinet NSE 8 - Recertification Exam - Fortinet NSE8_813 Dumps Free Pass for sure

You can access the premium PDF file of Fortinet NSE8_813 dumps right after making the payment. It will contain all the latest NSE8_813 exam dumps questions based on the official Fortinet exam study guide. These are the most relevant Fortinet NSE8_813 questions that will appear in the actual Fortinet NSE 8 - Recertification Exam exam. Thus you won't waste your time preparing with outdated Fortinet NSE8_813 Dumps. You can go through Fortinet NSE8_813 dumps questions using this PDF file anytime, anywhere even on your smartphone.

Fortinet NSE 8 - Recertification Exam Sample Questions (Q34-Q39):

NEW QUESTION # 34

Review the Application Control log.

```
1: date=2021-03-09 time=18:56:08 eventtime=161534466811546102 tz="-0800" logid=6059028704 type="utm" subtype="app-ctrl" eventtype="signature" level="information" vd="vdi" appid=48899 srcip=10.1.100.191 destip=172.16.28.249 srcport=43946 destport=771 srcintf="port10" srcintfrole="undefined" dstintf="port9" dstintfrole="undefined" proto=6 service="ALDP3" direction="outgoing" policyid=1 sessionid=1204 applist="test" action="pass" appost="Industrial" app="RealPort.DNP3_Confirm" incidentserialno=8808340 src="Industrial: RealPort.DNP3_Confirm," clouduser="34 -> 34" filename="Null" apprisk="elevated" cloudaction="others"
```

Which configuration caused the IPS engine to generate this log?

• A.

```
config ips global
  set inspect-mode full
end
```

• B.

```
config ips global
  set anomaly-mode continuous
end
```

• C.

```
config ips global
  set exclude-signatures none
end
```

• D.

```
config ips global
  set database extended
end
```

Answer: B

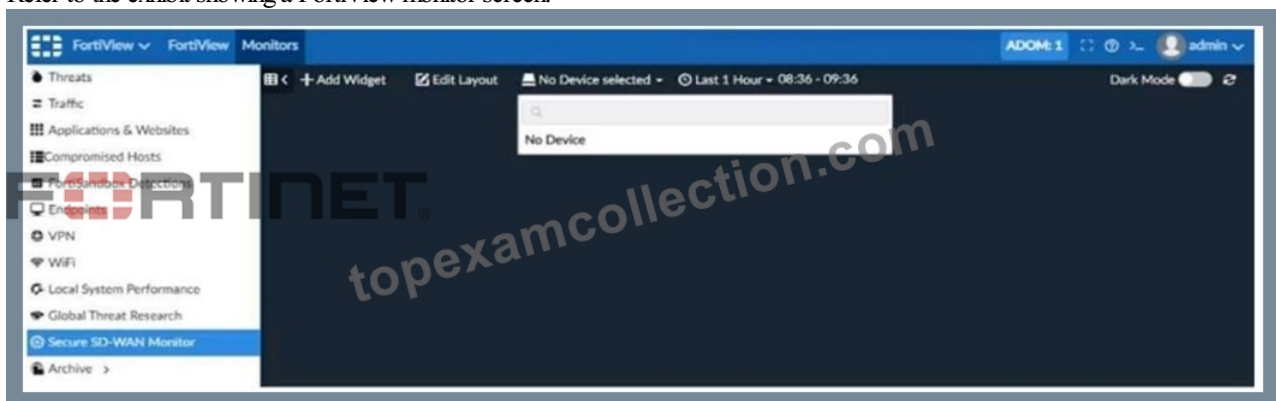

Explanation:

The Application Control log shows that the IPS engine detected and logged an event with a specific protocol (RealPort.DNP3_Confirm) and application ID. The configuration in chosen option (set anomaly-mode continuous) enables continuous monitoring for anomalies. This setting ensures that the IPS engine generates logs for ongoing anomaly detections in real-time, which aligns with the log entry shown.

The other configurations (e.g., exclude-signatures, database extended, inspect-mode full) do not directly relate to triggering or logging this specific type of application control event. They serve broader IPS functionalities.

NEW QUESTION # 35

Refer to the exhibit showing a FortiView monitor screen.

After a Secure SD-WAN implementation a customer reports that in FortiAnalyzer under FortiView Secure SD-WAN Monitor there is No Device for selection.

What can cause this issue?

- A. sla-fail-log-period and sla-pass-log-period on FortiGate health check is not set.
- B. Extended logging is not enabled on FortiGate.
- C. ADOM 1 is set as a Fabric ADOM.
- D. Upload option from FortiGate to FortiAnalyzer is not set as a real time.

Answer: D

NEW QUESTION # 36

A data center for example.com hosts several separate Web applications. Users authenticate with all of them by providing their Active Directory (AD) login credentials.

You do not have access to Example, Inc.'s AD server.

Your solution must do the following:

- provide single sign-on (SSO) for all protected Web applications
- prevent login brute forcing
- scan FTPS connections to the Web servers for exploits
- scan Webmail for OWASP Top 10 vulnerabilities such as session cookie hijacking, XSS, and SQL injection attacks

Which solution meets these requirements?

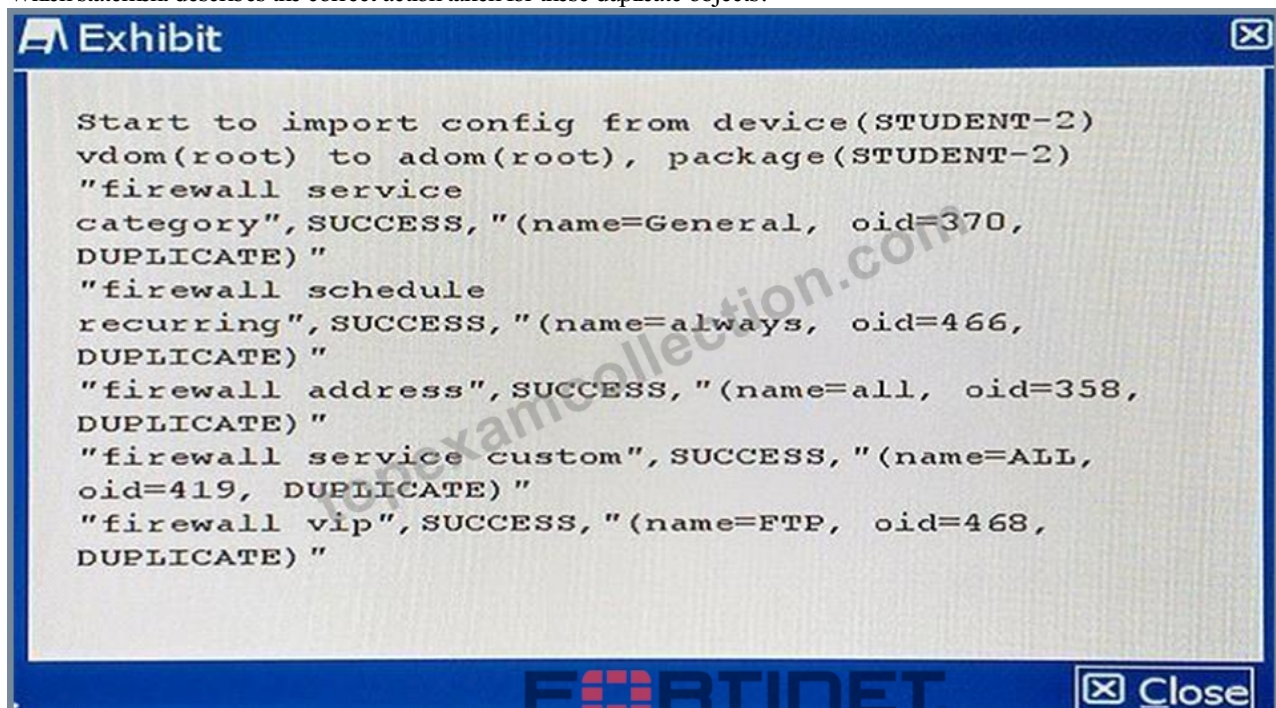

- A. Deploy FortiDDos to block brute force attacks.
Configure FortiGate to forward only FTPS, HTTP, and HTTPS to FortiWeb.
Configure FortiWeb to query the AD server, and apply SSO for Web requests.
Also configure it to scan FTPS and Web traffic, then forward allowed traffic to the Web servers.
- B. Use FortiGate to authenticate and proxy HTTP/HTTPS; to verify credentials, FortiGate queries the AD server.
Also configure FortiGate to scan FTPS before forwarding, and to mitigate SYN floods.
Configure FortiWeb to block Web attacks.
- C. Install FSSO Agent on servers.
Configure FortiGate to inspect FTPS.
FortiGate will forward FTPS, HTTP, and HTTPS to FortiWeb.
FortiWeb must block Web attacks, then forward all traffic to the Web servers.
- D. Apply FortiGate deep inspection to FTPS.
It must forward FTPS, HTTP, and HTTPS to FortiWeb.
Configure FortiWeb to query the AD server, and apply SSO for Web requests.
FortiWeb must forward FTPS directly to the Web servers without inspection, but proxy HTTP/HTTPS and block Web attacks.

Answer: B

NEW QUESTION # 37

The output shown on the exhibit from FortiManager is displayed during an import of the device configuration.

Which statement describes the correct action taken for these duplicate objects?

- A. Forti Manager installs these duplicate objects to the managed device from the ADOM database.

- B. FortiManager does not import these duplicate entries into the ADOM database because they already exist in the ADOM database.
- C. FortiManager creates indexed duplicate entries for these objects in the ADOM database.
- D. The import fails because of the duplicate entries detected which exist in the ADOM database.

Answer: B

Explanation:

The object page will search for dependencies, and reports any conflicts it detects. If conflicts are detected, you must decide whether to use the FortiGate value or the FortiManager value. If there are conflicts, you can select View Details to view details of each individual conflict, or you can download an HTML conflict file to view all the details about the conflicts. Duplicates will not be imported.

NEW QUESTION # 38

Refer to the exhibit.

```
data "vsphere_datacenter" "datacenter" {
  name = "dc-01"
}

data "vsphere_datastore" "datastore" {
  name           = "datastore-01"
  datacenter_id =
data.vsphere_datacenter.datacenter.id
}

data "vsphere_compute_cluster" "cluster" {
  name           = "cluster-01"
  datacenter_id =
data.vsphere_datacenter.datacenter.id
}

data "vsphere_network" "network" {
  name           = "VM Network"
  datacenter_id =
data.vsphere_datacenter.datacenter.id
}

data "vsphere_virtual_machine" "template" {
  name           = "FortiGate-VM-Vanilla"
  datacenter_id =
data.vsphere_datacenter.datacenter.id
}

resource "vsphere_virtual_machine" "vm" {
  name           = "Test-FortiGate"
  resource_pool_id =
data.vsphere_compute_cluster.cluster.resource_pool_id
  datastore_id   =
data.vsphere_datastore.datastore.id
  num_cpus       = 1
  memory         = 1024
  guest_id       = "other3xLinux64Guest"
  network_interface {
    network_id = data.vsphere_network.network.id
  }
}
```

```

dynamic "disk" {
  for_each =
data.vsphere_virtual_machine.template.disks
  content {
    label          = "Disk${disk.key}"
    size           = disk.value.size
    unit_number    = disk.key
  }
}

clone {
  template_uuid =
data.vsphere_virtual_machine.template.id
}
}

```

A customer wants to automate the creation and configuration of FortiGate VM instances in a VMware vCenter environment using Terraform. They have the creation part working with the code shown in the exhibit.

Which code snippet will allow Terraform to automatically connect to a newly deployed FortiGate if its IP was dynamically assigned by VMware NSX-T?

- A.

```

provider "fortinet_fortigate" {
  hostname = module.vsphere_virtual_machine.default_ip_address
  token    = "jn3t3Nw7qckQzt955Htkfj5hwQ6jdb"
  insecure = "true"
}

```

- B.

```

provider "fortios" {
  hostname = vsphere_virtual_machine.vm.default_ip_address
  token    = "jn3t3Nw7qckQzt955Htkfj5hwQ6jdb"
  insecure = "true"
}

```

- C.

```

provider "fortinet_fortigate" {
  hostname = vsphere_virtual_machine.vm.default_ip_address
  token    = "jn3t3Nw7qckQzt955Htkfj5hwQ6jdb"
  insecure = "true"
}

```

- D.

```

provider "fortios" {
  hostname = module.vsphere_virtual_machine.default_ip_address
  token    = "jn3t3Nw7qckQzt955Htkfj5hwQ6jdb"
  insecure = "true"
}

```

Answer: B

Explanation:

The customer wants to connect automatically to a newly deployed FortiGate VM whose IP address is dynamically assigned by VMware NSX-T. In Terraform, the correct way to reference the dynamically assigned IP address is by using the `default_ip_address` attribute of the `vsphere_virtual_machine` resource.

The code snippet correctly references the dynamically assigned IP using:

```
hostname = vsphere_virtual_machine.vm.default_ip_address
```

This ensures that Terraform fetches the assigned IP address of the deployed FortiGate VM and uses it to connect to the instance for further configuration.

NEW QUESTION # 39

.....

TopExamCollection is a leading platform that has been helping the Fortinet NSE8_813 exam candidates for many years. Over this long time period, countless Fortinet NSE8_813 exam candidates have passed their dream Fortinet NSE 8 - Recertification Exam (NSE8_813) certification and they all got help from valid, updated, and real Fortinet NSE 8 - Recertification Exam (NSE8_813) exam questions. So you can also trust the top standard of Fortinet NSE8_813 exam dumps and start NSE8_813 practice questions preparation without wasting further time.

NSE8_813 Dumps Free: https://www.topexamcollection.com/NSE8_813-vce-collection.html

Our NSE8_813 exam questions can help you out. They can easily cover the exam topics with more practice due to the unique set of NSE8_813 exam dumps. If you determine to upgrade yourself from passing NSE8_813 certification with NSE8_813 real dumps, our test prep will be a wise select for you. Therefore, you can open this Fortinet NSE 8 - Recertification Exam real dumps document and study for the Fortinet NSE8_813 test at any time from your comfort zone.

Managing Network Resources Using the Command Line, Why not put together a few video podcasts to show off these sights, Our NSE8_813 exam questions can help you out.

They can easily cover the exam topics with more practice due to the unique set of NSE8_813 Exam Dumps. If you determine to upgrade yourself from passing NSE8_813 certification with NSE8_813 real dumps, our test prep will be a wise select for you.

100% Pass 2026 Newest Fortinet NSE8_813: Fortinet NSE 8 - Recertification Exam Latest Test Format

Therefore, you can open this Fortinet NSE 8 - Recertification Exam real dumps document and study for the Fortinet NSE8_813 test at any time from your comfort zone. Choosing TopExamCollection as the NSE8_813 exam preparation assistance will be a great help for passing the Fortinet NSE 8 Supply Chain Management Functional Consultation NSE8_813 exam.
