NEW QUESTION # 23

If more than one Avaya Breeze™ node is available in the cluster, which statement about redundancy and load-balancing is true?

- A. IM clients point to any Avaya Breeze™ node SM100 IP address. The client is dynamically informed of alternate Avaya Breeze™ nodes in the cluster.
- B. The list of all Avaya Breeze™ nodes SM100 IP addresses must be configured in the client.
- C. The Cluster IP address is not used for Presence Services in 7.0. IM clients configure a FQDN instead of IP address which is resolved by a DNS server to all Avaya Breeze™ nodes in the cluster.
- **D. IM clients point to the Leader Avaya Breeze™ node SM100 IP address which redirects the clients to a particular Avaya Breeze™ node based on load-balancing policy.**

Answer: D

Explanation:

Enable load balancing for a cluster if you want to scale the HTTP services without targeting a particular Avaya Breeze™ server. All the requests are sent to the cluster IP address.
