

# Sample Microsoft GH-100 Questions Answers, GH-100 Test Guide

2025 Latest Dumps Valid GH-100 PDF Dumps and GH-100 Exam Engine Free Share: [https://drive.google.com/open?id=1jayfLdoZ0Si0T\\_gu9mywlPt5fgv5YHvH](https://drive.google.com/open?id=1jayfLdoZ0Si0T_gu9mywlPt5fgv5YHvH)

You can download a free demo of Microsoft - GH-100 exam study material at DumpsValid. The free demo of GH-100 exam product will eliminate doubts about our GitHub Administration PDF and practice exams. You should avail this opportunity of GH-100 exam dumps free demo. It will help you pay money without any doubt in mind. We ensure that our GitHub Administration exam questions will meet your GitHub Administration test preparation needs. If you remain unsuccessful in the GH-100 test after using our GH-100 product, you can ask for a full refund. DumpsValid will refund you as per the terms and conditions.

## Microsoft GH-100 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Manage access and permissions based on membership: This section of the exam measures skills of DevOps Engineers and reviews how to manage organizations, teams, and repository permissions. It includes default permission settings, team synchronization through AD, scripting across multiple organizations, and aligning enterprise policies with trust requirements. It also contrasts roles such as organization members, owners, collaborators, and billing managers.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Describe how GitHub is deployed, distributed, and licensed: This section of the exam measures skills of GitHub Enterprise Administrators and highlights the deployment models of GitHub Enterprise Server, Enterprise Cloud, and GitHub AE. It covers licensing structures, billing for seat licenses and metered services, support options, and monitoring license usage across users and machine accounts.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Enable secure software development and ensure compliance: This section of the exam measures skills of GitHub Enterprise Administrators and deals with applying GitHub's security and compliance capabilities. It covers policies, auditing, scrubbing sensitive data, secret scanning, code scanning with CodeQL, dependency management with Dependabot, and implementing security response plans. It also explores authentication tokens, app security policies, and enterprise managed users.</li></ul>

**GH-100 Test Guide & New GH-100 Dumps Book**

Our Microsoft Exam Questions greatly help GitHub Administration (GH-100) exam candidates in their preparation. Our GH-100 practice questions are designed and verified by prominent and qualified GitHub Administration (GH-100) exam dumps preparation experts. The qualified GitHub Administration (GH-100) exam questions preparation experts strive hard and put all their expertise to ensure the top standard and relevancy of GH-100 exam dumps topics.

## Microsoft GitHub Administration Sample Questions (Q28-Q33):

### NEW QUESTION # 28

You are using GitHub-hosted runners and need to securely deploy to an internal system. The security team requires that these runners use IP address ranges that would not be shared with other companies. Which of the following approaches would meet their requirements?

- A. GitHub-hosted larger runners with Azure private networking
- **B. GitHub-hosted larger runners with static IP addresses**
- C. GitHub-hosted standard runners, using the IP addresses provided in "actions" from <https://api.github.com/meta>
- D. GitHub-hosted standard runners, using the IP addresses provided in "api" from <https://api.github.com/meta>

**Answer: B**

Explanation:

GitHub's larger runners let you reserve dedicated static IP addresses for your workflows - so you can allow-list those IPs in your firewall and be sure they aren't shared with any other tenant.

### NEW QUESTION # 29

Which of the following is a key benefit of using GitHub Marketplace Apps in an enterprise?

- A. They guarantee no downtime during enterprise GitHub maintenance windows
- **B. They often include integrations with external services, reducing the need for custom code**
- C. Apps eliminate the need for GitHub Actions entirely
- D. All apps come pre-approved by GitHub's internal security team

**Answer: B**

Explanation:

GitHub Marketplace Apps come with built-in integrations to external services - so you can plug in things like CI servers, code-quality scanners, or deployment tools without writing and maintaining custom connectors.

### NEW QUESTION # 30

Which THREE of the following accurately describe how the SCIM protocol enhances user management in GitHub Enterprise Cloud? (Choose three.)

- A. SCIM configures repository permissions based on user roles within the organization.
- **B. SCIM deactivates GitHub accounts when users are deleted from the identity provider.**
- C. SCIM automates user provisioning when new users are added to the identity provider.
- D. SCIM generates authentication tokens for accessing GitHub's REST API.
- **E. SCIM synchronizes changes to user attributes from the identity provider to GitHub.**
- F. SCIM automatically deletes organization repositories when administrators are removed.

**Answer: B,E**

Explanation:

SCIM automatically updates a user's account on GitHub whenever their profile attributes change in the identity provider.

When a user is removed or deactivated in the IdP, SCIM deactivates (soft-deprovisions) their GitHub account and disables access. SCIM provisions new GitHub Enterprise Cloud accounts automatically when users are added in the identity provider.

### NEW QUESTION # 31

A team member is unable to push to a repository due to a 403-error related to branch protection. What should the GitHub

Enterprise administrator do first?

- **A. Check the user's permissions and rulesets applied to the branch**
- B. Revert the branch to an earlier state
- C. Raise a GitHub Support request for permissions issues
- D. Remove the user from the team and re-add them

**Answer: A**

Explanation:

The administrator should first review the user's repository role and the branch protection rules applied to that branch. A 403 error on push almost always indicates that the user either lacks the necessary write permissions or is not listed among the actors authorized by the branch protection settings.

### NEW QUESTION # 32

Which of the following is a key benefit of setting default read permissions across organizations?

- A. Improves collaboration by allowing users to modify content directly.
- B. Suits environments where all users need write access.
- **C. Enhances security by minimizing unintended modifications.**
- D. Increases efficiency in content creation and updates.

**Answer: C**

Explanation:

Enforcing a default of Read for organization members ensures they can view content without the ability to push changes, reducing the risk of accidental or unauthorized modifications.

### NEW QUESTION # 33

.....

Our DumpsValid have a huge IT elite team. They will accurately and quickly provide you with Microsoft certification GH-100 exam materials and timely update Microsoft GH-100 exam certification exam practice questions and answers and binding. Besides, DumpsValid also got a high reputation in many certification industry. The the probability of passing Microsoft Certification GH-100 Exam is very small, but the reliability of DumpsValid can guarantee you to pass the examination of this probability.
