We can make you pay a minimum of effort to get the greatest success.

Salesforce Media Cloud Consultant Exam Sample Questions (Q72-Q77):

NEW QUESTION # 72

A b2b advertising publishing company is exploring salesforce to manage its advertising sales business. They require an ad ops persona to be created. Which two managed permission sets should a consultant add to the ad ops persona?

- A. Media Cloud Base User
- B. OmniStudioAdmin
- C. MediaCloudRuntime
- D. OmniStudioUser

Answer: A,C

Explanation:

For creating an Ad Ops persona in a B2B advertising publishing company exploring Salesforce to manage its advertising sales business, the two managed permission sets to add are:

MediaCloudRuntime: This permission set provides the necessary runtime access within Media Cloud, enabling Ad Ops personnel to execute and manage operational tasks related to advertising sales.

Media Cloud Base User: This foundational permission set grants access to basic Media Cloud functionalities, allowing Ad Ops personnel to access and interact with the core features of the Advertising Sales Management application.

These permission sets equip the Ad Ops persona with the appropriate level of access and functionality required to perform their role effectively within the Salesforce Media Cloud environment.

NEW QUESTION # 73

A CTO of a customer who uses advertising sales management (ASM), asked a consultant to help them upgrade to the latest ASM release. Which two steps must the consultant complete before starting a manual upgrade to the latest release?

- A. Ensure that the consultant has the required permission sets and licenses
- B. complete the post install tasks for salesforce industries communications, media, and energy
- C. raise a support ticket to enable the required permissions
- D. go to setup and click on validate in the latest release

Answer: A,B

Explanation:

Before starting a manual upgrade to the latest ASM release, a consultant must:

Ensure they have the required permission sets and licenses: This is crucial to ensure the consultant has the necessary access rights to perform the upgrade and configure the system as needed.

Complete the post-install tasks for Salesforce Industries Communications, Media, and Energy:

These tasks may include configuration adjustments, data migrations, or other necessary steps to ensure that the upgrade is successful and that the system remains stable and functional after the upgrade.

Completing these steps ensures that the upgrade process goes smoothly and that the system is properly prepared for the new release.

NEW QUESTION # 74

A publisher wants to know which products have low reception with the customers. However, the publisher is having a hard time

analyzing the data because opportunities reflect only the sold products, excluding products which were once part of an opportunity but were later dropped. What should a consultant ensure is included in the design so that sellers can store and access different versions of the proposed media plan and its line items?

- A. product mapping to an active price list
- B. product schedule functionality
- C. A media Plan version field in opportunity line item (OLI)
- **D. quotes, and 'Sync to opportunity' custom button**

Answer: D

Explanation:

To address the challenge of tracking products with low reception, including those dropped from opportunities, the consultant should ensure that the media planning design includes the use of Quotes and a 'Sync to Opportunity' custom button. This setup allows sellers to create and manage multiple versions of media plans as quotes, capturing both selected and deselected products. The 'Sync to Opportunity' functionality facilitates the transfer of the final selected media plan to the opportunity, ensuring that the sales process reflects the most up-to-date proposal while retaining the history of changes for analysis. NEW QUESTION # 75

Acient is currently using manual processes and spreadsheets for selling ads and creating media plans and insertion orders. The client has selected media cloud advertising sales management along with the industry CPQ and industries order management for this purpose. Their orders need to be activated on an ad server for which there is no current pre-built integration available from ASM, although there are APIs available. When using ASM, where should a consultant start an interface to an ad server, so orders can be submitted to the ad server?

- A. custom apex
- B. flow builder
- C. industries CPQ
- **D. industries order management**

Answer: D

Explanation:

For a client transitioning from manual ad sales and media plan processes to using Media Cloud Advertising Sales Management, along with Industry CPQ and Industries Order Management, integrating with an ad server where no pre-built integration exists would begin with Industries Order Management. This system is designed to handle complex order processes and activations, making it the logical starting point for developing an interface to submit orders to an ad server. Leveraging the APIs available, a custom integration can be built within the Order Management framework to ensure seamless order transmission and activation on the ad server. NEW QUESTION # 76

A CTO of a customer who uses advertising sales management (ASM), asked a consultant to help them upgrade to the latest ASM release. Which two steps must the consultant complete before starting a manual upgrade to the latest release?

- **A. Ensure that the consultant has the required permission sets and licenses**
- **B. complete the post install tasks for salesforce industries communications, media, and energy**
- C. raise a support ticket to enable the required permissions
- D. go to setup and click on validate in the latest release

Answer: A,B

Explanation:

Before starting a manual upgrade to the latest ASM release, a consultant must:

Ensure they have the required permission sets and licenses: This is crucial to ensure the consultant has the necessary access rights to perform the upgrade and configure the system as needed.

Complete the post-install tasks for Salesforce Industries Communications, Media, and Energy: These tasks may include configuration adjustments, data migrations, or other necessary steps to ensure that the upgrade is successful and that the system remains stable and functional after the upgrade.

Completing these steps ensures that the upgrade process goes smoothly and that the system is properly prepared for the new

release.
