Google Workspace Administrator certification exam is designed to test the capabilities of professionals who manage and administer Google Workspace, formerly known as G Suite. Google-Workspace-Administrator exam is intended for individuals who are responsible for managing and optimizing Google Workspace services for their organization. Google-Workspace-Administrator Exam is designed to test the candidate's knowledge of the core principles of Google Workspace, including Gmail, Calendar, Drive, and Docs. Google-Workspace-Administrator exam also covers advanced topics such as security, compliance, and mobile device management.

Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q48-Q53):

NEW QUESTION # 48

Before leaving your organization, an employee in the finance department created and shared documents from My Drive. Their manager wants to keep all the files, but only some of these documents need to be available in the Shared Drive of the finance department. You need to quickly and efficiently delete the Workspace account for the former employee but also ensure that the finance department can access the required files. What should you do?

- A. In the User Deletion process, transfer ownership of the documents to the manager. After completion, instruct the manager to move the desired documents into the Shared Drive of the finance department.
- B. Use Google Vault to set a retention policy for the organizational unit (OU) where the former employee resides.
- C. Use Google Takeout to download the Drive data and then upload the data back to the Shared Drive of the finance department.
- D. Before leaving the organization, instruct the employee to create a folder in My Drive, move the documents that need to be shared, then share that folder with the Finance manager and delete the user.

Answer: A

NEW QUESTION # 49

Your client is a multinational company with a single email domain. The client has compliance requirements and policies that vary by country. You need to configure the environment so that each country has their own administrator and no administrator can manage another country.
What should you do?

- A. Establish a new Google Workspace tenant with their own admin for each region.
- B. Create an OU for each country. Create an admin role and assign an admin with that role per OU.
- C. Create a Team Drive per OU, and allow only country-specific administration of each folder.
- D. Create Admin Alerts, and use the Security Center to audit whether admins manage countries other than their own.

Answer: B

NEW QUESTION # 50

A large enterprise that had a security breach is working with an external legal team to determine best practices for an investigation. Using Google Vault, the security team is tasked with exporting data for review by the legal team. What steps should you take to securely share the data in question?

- A. Determine the scope of the investigation, create a Matter and Holds in Google Vault, and share with the legal team.
- B. Suspend the user's account, search all associated users data in Google Vault, and export the data.
- C. Immediately suspend the user's account, assign an archived user license, and export data.
- D. Immediately suspend the user's account, search for all the email messages in question, and forward to the legal team.

Answer: B

Explanation:
To securely share data using Google Vault for an investigation:
* Suspend the user's account to prevent further changes to their data.
* Use Google Vault to search for all associated user data relevant to the investigation.
* Export the data securely from Google Vault. These steps ensure that the data remains intact and secure throughout the investigation process.

NEW QUESTION # 51
Security and Compliance has identified that data is being leaked through a third-party application connected to Google Workspace. You want to investigate using an audit log.
What log should you use?

* A. SAML audit log
* B. Drive usage audit log
* C. OAuth Token audit log
* D. Admin audit log

Answer: C

NEW QUESTION # 52
You work at a large global holding firm with multiple companies that are united under one Google Workspace deployment. You must ensure that employees can only access documents at the company in which they are employed What should you do?

* A. Set up data loss prevention (DLP) rules to prevent specific documents from being shared
* B. Set up Google Drive trust rules to prevent access to documents from individual companies
* C. Create an organizational unit (OU) for each company and disable file sharing.
* D. Create a User group for each company and change Google Drive sharing settings to block external sharing

Answer: B

Explanation:
* Access Admin Console: Log in to the Google Admin console using your administrator account.
* Navigate to Drive and Docs: Go to Apps > Google Workspace > Drive and Docs.
* Set Up Drive Trust Rules: Select Sharing settings > Sharing options.
* Configure Trust Rules: Set up trust rules to define which organizational units (OUs) or groups can share documents with each other. Ensure that each company's OU has rules that restrict access to documents only within that company.
* Apply and Save Changes: Implement these settings and save. This ensures that employees can only access documents within their respective companies.
