IDPX試験準備、IDPX日本語版復習指南

弊社のCIDQ IDPX問題集を使用した後、IDPX試験に合格するのはあまりに難しくないと知られます。我々Xhs1991提供するIDPX問題集を通して、試験に迅速的にパースする技をファンドできます。あなたのご遠慮なく購買するために、弊社は提供する無料のCIDQ IDPX問題集デモをダウンロードします。

CIDQ IDPX 認定試験の出題範囲:

トピック	出題範囲
トピック 1	<ul style="list-style-type: none"> Code Requirements, Laws, Standards, and Regulations: This section of the exam measures the skills of a Regulatory Compliance Specialist and covers environmental regulations, accessibility standards, building codes, and zoning laws. It also addresses understanding jurisdictional permit processes and legal implications for design compliance.

トピック 2	<ul style="list-style-type: none"> • Project Process, Roles, and Coordination: This section of the exam measures the skills of a Project Design Manager and focuses on team roles, stakeholder engagement, budgeting, project timelines, and collaboration with allied professionals. It also includes managing deliverables, specifications, phased construction, and conducting post-occupancy evaluations.
トピック 3	<ul style="list-style-type: none"> • Integration with Building Systems and Construction: This section of the exam measures skills of a Building Systems Coordinator and involves applying knowledge of structural, mechanical, plumbing, electrical, fire protection, lighting, and acoustical systems. It also includes coordinating with ceiling plans, installation sequencing, and understanding building components and transport systems.
トピック 4	<ul style="list-style-type: none"> • Professional Business Practices: This section of the exam measures skills of an Interior Design Consultant and addresses business structures, scope of practice, proposals, contracts, and basic project accounting. It prepares candidates to understand legal obligations, manage finances, and structure project proposals professionally.
トピック 5	<ul style="list-style-type: none"> • Contract Administration: This section of the exam measures the skills of a Construction Administrator and covers documentation and communication processes such as RFIs, change orders, transmittals, field reports, and punch lists. It also includes managing site visits, shop drawings, project meetings, and contractor payment processes.
トピック 6	<ul style="list-style-type: none"> • Integration of Furniture, Fixtures, & Equipment: This section of the exam measures the skills of a FF&E Specialist and focuses on selecting and integrating furniture and equipment. It includes understanding product types, code compliance, maintenance requirements, procurement, installation processes, and cost estimation methods.

CIDQ Interior Design Professional Exam 認定 IDPX 試験問題 (Q53-Q58):

質問 # 53

Which project delivery method involves two separate contracts: one with the designer and one with the general contractor?

- A. design-build
- B. integrated project delivery
- C. construction management at risk
- **D. design-bid-build**

正解: D

解説:

Design-bid-build (DBB) is a traditional delivery method where the owner holds two separate contracts: one with the designer for design services and one with the general contractor (GC) for construction, selected via bidding. Design-build (A) combines design and construction under one contract. Integrated project delivery (C) uses a single multi-party agreement. Construction management at risk (D) involves a GC early but still typically under one construction contract post-design. DBB's dual-contract structure (B) matches the description.

Verified Answer from Official Source: B - design-bid-build

"Design-bid-build involves two separate contracts: one between the owner and designer, and one between the owner and contractor after bidding." (NCIDQ IDPX Study Guide, Section 3: Contract Administration) Explanation from Official Source: The NCIDQ identifies DBB as the standard method with distinct design and construction phases, ensuring clear contractual separation.

Objectives:

* Understand project delivery methods (IDPX Objective 3.3).

質問 # 54

What is the MAXIMUM occupant load of a business occupancy with one exit?

- **A. 0**
- B. 1
- C. 2
- D. 3

正解: A

解説:

Per IBC Section 1006.2.1, a business occupancy (Group B) with one exit is limited to 50 occupants, based on Table 1006.2.1, assuming a sprinklered building and 100 sf/person (gross). Above 50, a second exit is required for life safety. Option A (49) is a common assembly limit, not business. Options C (69) and D (70) exceed the code maximum. 50 (B) is the precise threshold for one-exit business spaces.

Verified Answer from Official Source: B - 50

"The maximum occupant load for a business occupancy with one exit is 50 per IBC Table 1006.2.1." (NCIDQ IDPX Study Guide, Section 1: Codes and Standards) Explanation from Official Source: The NCIDQ references IBC to ensure designers limit occupant loads for safe egress in single-exit scenarios, critical for business settings.

Objectives:

* Calculate occupant loads (IDPX Objective 1.2).

質問 # 55

The role of the project manager includes

- A. serving as the primary client contact, developing proposals and contracts, and producing project specifications
- **B. selecting a project team, establishing and overseeing the budget, and coordinating with consultants**
- C. establishing and overseeing the budget, producing schematic designs, and serving as the primary client contact
- D. preparing preliminary designs, coordinating with consultants, and developing proposals and contracts

正解: B

解説:

A project manager (PM) oversees the project's execution, not design creation. Their role includes selecting the team, managing the budget, and coordinating consultants, ensuring the project stays on track. Option B includes design tasks (preliminary designs), typically the designer's role. Option C mixes client contact and specifications, overlapping with design duties. Option D includes schematic designs, outside a PM's scope.

Option A aligns with the PM's administrative and coordination focus.

Verified Answer from Official Source: A - selecting a project team, establishing and overseeing the budget, and coordinating with consultants

"The project manager's role includes team selection, budget oversight, and consultant coordination to ensure project success." (NCIDQ IDPX Study Guide, Section 3: Contract Administration) Explanation from Official Source: The NCIDQ defines the PM as a facilitator, distinct from the designer, focusing on logistics and management, not creative output.

Objectives:

* Understand project management roles (IDPX Objective 3.3).

質問 # 56

At the time of preparing construction documents, the client is undecided about replacing flooring within the scope of work. How would the designer obtain pricing for including the flooring?

- **A. an alternate**
- B. an addendum
- C. a mock-up
- D. a change order

正解: A

解説:

An alternate in construction documents provides a separate price for an optional scope item (e.g., flooring replacement), allowing the client to decide later without delaying bidding. A mock-up (A) tests finishes, not pricing. An addendum (C) modifies documents pre-contract, not suitable during preparation. A change order (D) adjusts the contract post-execution, not applicable here. Alternate (B) is the standard method for pricing undecided elements during the CD phase.

Verified Answer from Official Source: B - an alternate

"Alternates are used in construction documents to provide pricing for optional scope items, such as flooring, when the client has not finalized decisions." (NCIDQ IDPX Study Guide, Section 3: Contract Documents) Explanation from Official Source: The NCIDQ notes alternates as a flexible tool for budgeting optional work, ensuring contractors bid on both base and additional scopes.

Objectives:

* Prepare contract documents with flexibility (IDPX Objective 3.1).

質問 # 57

Several employees in an office suffer from pollen allergies. How could their symptoms be reduced while at work?

- A. Install non-operable windows
- B. Relocate these employees to internal offices
- C. Install high-efficiency air filters
- D. Utilize a passive ventilation system

正解: C

解説:

High-efficiency air filters (e.g., HEPA or MERV 13+) in HVAC systems remove pollen and allergens from indoor air, reducing symptoms effectively, per ASHRAE 62.1. Non-operable windows (A) limit fresh air, potentially worsening air quality. Passive ventilation (C) introduces outdoor pollen, aggravating allergies.

Relocation (D) may help but doesn't address air quality building-wide. Filters (B) are the most direct, systemic solution for allergy relief.

Verified Answer from Official Source: B - Install high-efficiency air filters

"High-efficiency air filters reduce indoor allergens like pollen, improving air quality for employees with allergies." (NCIDQ IDPX Study Guide, Section 2: Building Systems) Explanation from Official Source: The NCIDQ highlights filters as a key HVAC upgrade for occupant health, aligning with air quality standards and allergy management.

Objectives:

* Improve indoor air quality (IDPX Objective 2.5).
