Such a prior understanding will make the exam journey more simplified and effortless.

## Cisco Securing Networks with Cisco Firepower Sample Questions (Q21-Q26):

### NEW QUESTION # 21

A connectivity issue is occurring between a client and a server which are communicating through a Cisco Firepower device. While troubleshooting, a network administrator sees that traffic is reaching the server, but the client is not getting a response. Which step must be taken to resolve this issue without initiating traffic from the client?

- A. Use packet-tracer to ensure that traffic is not being blocked by an access list.
- B. Use packet-tracer to validate that the packet passes through the firewall and is NATed to the corrected IP address.
- C. Use packet capture to ensure that traffic is not being blocked by an access list.
- D. Use packet capture to validate that the packet passes through the firewall and is NATed to the corrected IP address.

**Answer: B**

Explanation:

If it is stateful firewall, then ACL can not block the response from server this existing connection, only wrong NAT rule for this server could be the issue.

### NEW QUESTION # 22

What is a method used by Cisco Rapid Threat Containment to contain the threat in the network?

- A. trustsec segmentation
- B. TACACS+
- C. change of authentication
- D. share context data

**Answer: A**

### NEW QUESTION # 23

What is a behavior of a Cisco FMC database purge?

- A. The appropriate process is restarted.
- B. Data can be recovered from the device.
- C. User login and history data are removed from the database if the User Activity check box is selected.
- D. The specified data is removed from Cisco FMC and kept for two weeks.

**Answer: A**

Explanation:

You can use the database purge page to purge discovery, identity, connection, and Security Intelligence data files from the FMC databases. Note that when you purge a database, the appropriate process is restarted.
