

Valid NSE5_FWF_AD-7.6 Exam Answers & Authoritative Platform Providing You High-quality NSE5_FWF_AD-7.6 Reliable Test Tutorial

BONUS!!! Download part of PDFDumps NSE5_FWF_AD-7.6 dumps for free: https://drive.google.com/open?id=1VnVnlyjYw_TnonR-oDIVKc-gIR4-VxNc

For the purposes of covering all the current events into our NSE5_FWF_AD-7.6 study guide, our company will continuously update our training materials. And after payment, you will automatically become the VIP of our company, therefore you will get the privilege to enjoy free renewal of our NSE5_FWF_AD-7.6 practice test during the whole year. No matter when we have compiled a new version of our NSE5_FWF_AD-7.6 Training Materials our operation system will automatically send the latest version of the NSE5_FWF_AD-7.6 preparation materials for the exam to your email, all you need to do is just check your email then download it.

Fortinet NSE5_FWF_AD-7.6 Exam Syllabus Topics:

Section	Weight	Objectives
Topic 1: Wireless Network Security and Access Control	30%	- Encryption and security policies - VLAN configuration and wireless segmentation - Network Access Control (NAC) integration - Secure wireless access and authentication methods
Topic 2: Advanced Features and Solutions	15%	- FortiPresence deployment and usage - FortiAIOPS integration and operation - High availability and scaling wireless networks
Topic 3: Wireless Monitoring, Troubleshooting and Optimization	25%	- Log analysis and diagnostic tools - Monitoring AP health, performance and connectivity - Troubleshooting connectivity and performance issues - Identifying and mitigating wireless threats
Topic 4: Wireless Fundamentals and FortiAP Management	30%	- Managing access point profiles and configurations - Deploying FortiAP devices with FortiOS integrated wireless controller - Wireless networking standards and technologies - FortiEdge Cloud management basics

NSE5_FWF_AD-7.6: Fortinet NSE 5 - Secure Wireless LAN 7.6 Administrator exam cram sheet - Pass4sure preparation materials

The Fortinet NSE5_FWF_AD-7.6 exam practice questions are being offered in three different formats. These formats are Fortinet NSE5_FWF_AD-7.6 web-based practice test software, desktop practice test software, and PDF dumps files. All these three Fortinet NSE5_FWF_AD-7.6 exam questions format are important and play a crucial role in your Fortinet NSE 5 - Secure Wireless LAN 7.6 Administrator (NSE5_FWF_AD-7.6) exam preparation. With the Fortinet NSE5_FWF_AD-7.6 exam questions you will get updated and error-free Fortinet NSE 5 - Secure Wireless LAN 7.6 Administrator (NSE5_FWF_AD-7.6) exam questions all the time. In this way, you cannot miss a single NSE5_FWF_AD-7.6 exam question without an answer.

Fortinet NSE 5 - Secure Wireless LAN 7.6 Administrator Sample Questions (Q37-Q42):

NEW QUESTION # 37

When enabling a Security Fabric connection on a FortiGate interface to manage FortiAP devices, which two types of CAPWAP communication channels are established between FortiGate and the FortiAP devices? (Choose two.)

- A. Security channels
- B. Data channels
- C. FortiLink channels
- D. Control channels

Answer: B,D

Explanation:

FortiAPs and the FortiGate establish two distinct CAPWAP tunnels when you enable the Security Fabric Connection:

- Control channels carry management and configuration traffic (encrypted by DTLS by default) between the FortiGate and each FortiA
- Data channels carry user-plane (client) traffic across the CAPWAP tunnel, separate from the control path

NEW QUESTION # 38

Refer to the exhibits. FortiGate is pushing the POST parameters shown in the exhibit to the external captive portal server. The wireless client redirection fails because certificate validation occurred while loading the web page.

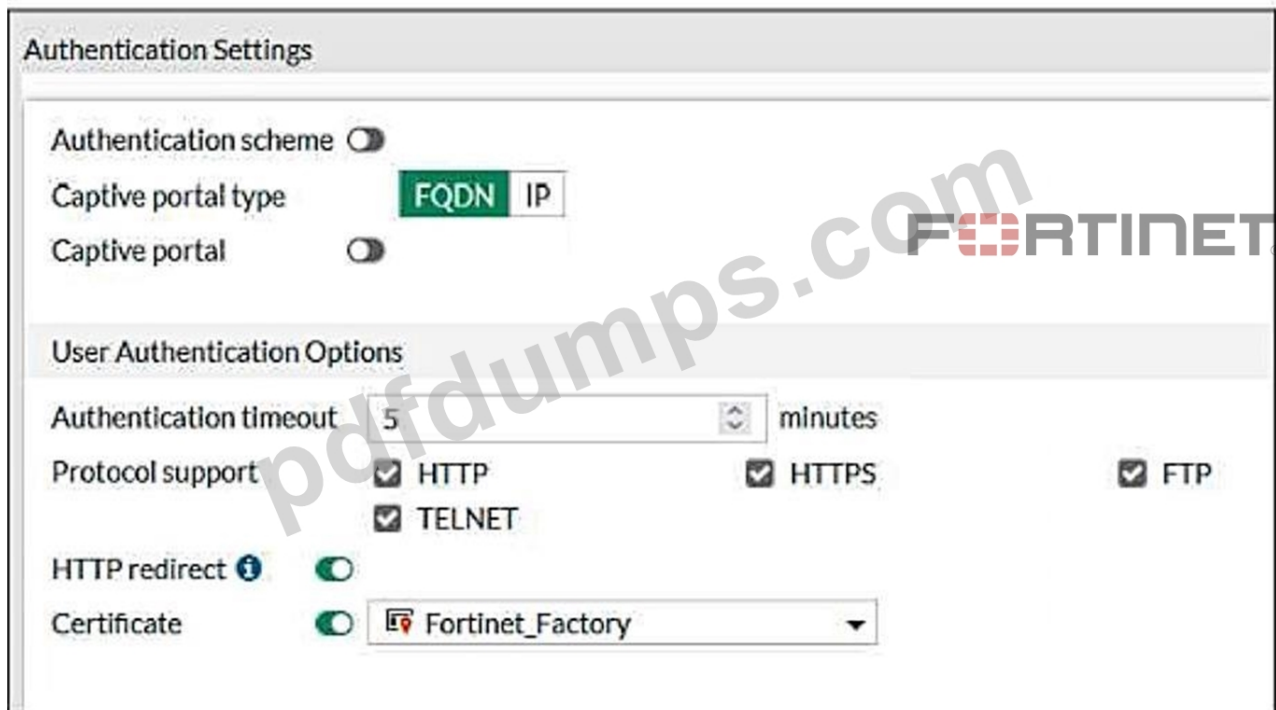

The wireless client browser uses the FortiGate self-signed certificate to access secured web pages. The SSID on FortiGate has the captive portal setting enabled.

What could cause the certification validation error on the wireless client?

Captive portal POST parameters

```
https://10.0.1.150/guests/login/?login&post=https://auth.trainingad.training.lab:1003/fgtauth&magic=000a038293d1f411&usermac=b8:27:eb:d8:50:02&apmac=70:4c:a5:9d:0d:28&apip=10.10.100.2&userip=10.0.3.1&ssid=Guest03&apname=FP231FTF20011555&bssid=70:4c:a5:9d:0d:30
```

Captive portal authentication settings

The screenshot shows the 'Authentication Settings' page in a FortiGate web interface. The 'Authentication scheme' is set to 'FQDN'. The 'Captive portal type' is set to 'FQDN'. The 'Captive portal' is enabled. Under 'User Authentication Options', the 'Authentication timeout' is 5 minutes. 'Protocol support' includes HTTP, HTTPS, TELNET, and FTP. 'HTTP redirect' is enabled. The 'Certificate' is set to 'Fortinet_Factory'.

- A. The FortiGate IP address in the POST parameters is using a numerical IP address.
- **B. The captive portal setting in the authentication setting is set to use FQDN as the captive portal type.**
- C. The external server address is not the FQDN address.
- D. The used credential is not embedded in the captive portal parameters.

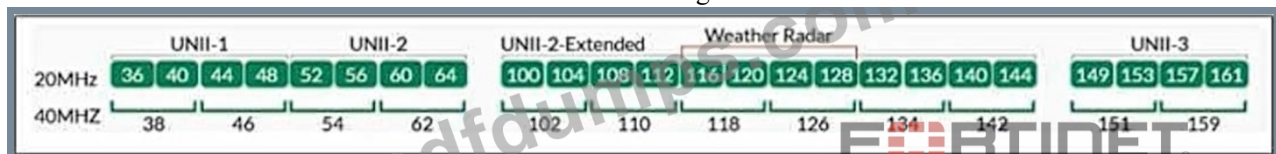

Answer: B

Explanation:

Because you've configured the portal to use an FQDN but the redirect URL (and certificate) is based on an IP address, the browser sees a host-name mismatch when validating the FortiGate's self-signed cert. Aligning the captive-portal type and the redirect URL (both via FQDN or both via IP) resolves the validation error.

NEW QUESTION # 39

Refer to the exhibit. Which statement is correct about channels 52 through 144 in the 5 GHz band?

- A. The channels cannot be used because of regulatory channel restrictions.
- **B. The channels are subject to dynamic frequency selection (DFS) regulations.**
- C. The channels can be used only when Radio Resource Provisioning is enabled.
- D. The channels will be scanned by the wireless intrusion detection system (WIDS).

Answer: B

Explanation:

Channels 52-144 fall within the DFS-required UNII-2 and UNII-2 Extended bands, meaning APs must monitor for radar signals and vacate those frequencies if radar is detected before transmitting.

NEW QUESTION # 40

A FortiAP device is connected directly to a FortiGate interface.

What discovery method will be used to provision the FortiAP device?

- A. FortiGate discovers the FortiAP IP address from DHCP option 138.
- B. FortiAP discovers FortiGate by connecting to FortiLAN Cloud to verify its management license.
- C. FortiGate discovers the FortiAP through the received broadcast packets.
- D. FortiAP discovers FortiGate by reviewing the vendor class value.

Answer: C

Explanation:

When a FortiAP and FortiGate share the same L2 network, the AP sends out a CAPWAP

"discovery" broadcast (to 255.255.255.255) and the FortiGate listens for and replies to those broadcasts, automatically provisioning the AP without requiring DHCP option configuration.

NEW QUESTION # 41

A company requires a secure wireless network to span several adjacent buildings. Employees need seamless roaming access across buildings, floors, and, potentially, outdoor areas. FortiAP devices will be used.

Which deployment is the most scalable, manageable, and cost-effective in this scenario?

- A. Implement a wireless mesh design to allow FortiAP devices to use neighboring FortiAP devices to connect with FortiGate in the main building.
- B. Install FortiWiFi with a cellular modem in the buildings and areas where no wireless signal reaches from the main building.
- C. Deploy a WAN connection on each building to allow FortiAP devices to communicate with FortiGate in the main building.
- D. Configure FortiGuard-capable FortiAP devices to broadcast the corporate SSID without being managed by FortiGate in the main building.

Answer: A

NEW QUESTION # 42

.....

It is not hard to know that NSE5_FWF_AD-7.6 study materials not only have better quality than any other study materials, but also have more protection. On the one hand, we can guarantee that you will pass the exam easily if you learn our NSE5_FWF_AD-7.6 study materials; on the other hand, once you didn't pass the exam for any reason, we guarantee that your property will not be lost. Our NSE5_FWF_AD-7.6 Study Materials have a high quality which is mainly reflected in the pass rate. Our product can promise a higher pass rate than other study materials.
