Real SAFe-Practitioner Testing Environment - Test SAFe-Practitioner Duration

Our PDF version of SAFe-Practitioner training materials is legible to read and remember, and support printing request. Software version of SAFe-Practitioner practice materials supports simulation test system, and give times of setup has no restriction. Remember this version support Windows system users only. App online version of SAFe-Practitioner Exam Questions is suitable to all kinds of equipment or digital devices and supportive to offline exercise on the condition that you practice it without mobile data.

Another benefit of achieving the SAFe 5 Practitioner certification is the opportunity for career advancement. SAFe Practitioner Exam (6.0) certification can help individuals differentiate themselves in a crowded job market and open up new career opportunities. It can also lead to higher salaries and greater job security.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q141-Q146):

NEW QUESTION # 141

Features are split into User Stories and Enabler Stories which are then implemented during the iterations of the PI

- A. FALSE
- B. TRUE

Answer: B

NEW QUESTION # 142

Which statement is true about Features and Stories?

- A. Features should be small enough to fit into an Iteration
- B. They are estimated like User Stories
- C. Features can be larger than an Iteration but Stories should be small enough to fit into an Iteration
- D. They are prioritized by the team

Answer: C

Explanation:

In SAFe, a clear distinction is made between the purpose, structure and content of features, and that of stories (including enablers). Features are visible units of business intent that the customer recognizes, and it's at this level of detail that the customer is able to prioritize their needs¹. Features are maintained in the ART Backlog and sized to fit in a PI so that each delivers new value². Stories are short descriptions of a small piece of desired functionality written from the user's perspective. Stories are the primary artifact used to define system behavior in Agile³. Stories are small and must be completed in a single iteration³. Therefore, features can be larger than an iteration but stories should be small enough to fit into an iteration. NEW QUESTION # 143

What is considered an anti-pattern when assigning business values to team PI Objectives?

- A. All PI Objectives are given a business value of 10.
- B. High business value is assigned to important Enabler work.
- C. Business values are assigned to uncommitted objectives.
- D. Business Owners assign the business value for all teams on the ART.

Answer: A

Explanation:

Assigning the same business value to all PI Objectives is an anti-pattern because it does not reflect the relative importance and priority of each objective. It also does not provide a clear guidance for trade-off decisions and impediment resolution. Business value should be assigned based on the expected benefits and outcomes of each objective, and it should be negotiated and agreed upon by the Business Owners and the teams. NEW QUESTION # 144

What is the purpose of the Team Sync?

- A. To make announcements to the entire ART
- B. To coordinate daily work
- C. To identify Iteration goals
- D. To identify ART PI risks

Answer: B

Explanation:

The Team Sync is a short meeting (usually 15 minutes or less), typically held about daily, to inspect progress toward the team goals, communicate, and adjust upcoming planned work¹. The Team Sync helps the team members align their activities, identify and

resolve impediments, and collaborate effectively. The Team Sync is also an opportunity to share information, celebrate achievements, and foster team spirit. The other options are incorrect because:

* A. The Team Sync is not the place to identify ART PI risks. Risks are identified and managed at the Program level, using the ROAM board and other tools².

* C. The Team Sync is not the place to identify Iteration goals. Iteration goals are defined and agreed upon during the Iteration Planning event, which happens at the beginning of each Iteration³.

* D. The Team Sync is not the place to make announcements to the entire ART. The Team Sync is a team-level event, where only the team members and the Scrum Master participate. Announcements to the entire ART are made during the ART Sync, which is a program-level event that happens weekly or biweekly⁴. NEW QUESTION # 145

If there is no historical data of team velocity, how many story points are allocated for every full-time developer and tester on the team?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

NEW QUESTION # 146

.....

Based on the research results of the examination questions over the years, the experts give more detailed explanations of the contents of the frequently examined contents and difficult-to-understand contents, and made appropriate simplifications for infrequently examined contents. SAFe-Practitioner test questions make it possible for students to focus on the important content which greatly shortens the students' learning time. With SAFe-Practitioner Exam Torrent, you will no longer learn blindly but in a targeted way. With SAFe-Practitioner exam guide, you only need to spend 20-30 hours to study and you can successfully pass the exam. You will no longer worry about your exam because of bad study materials. If you decide to choose and practice our SAFe-Practitioner test questions, our life will be even more exciting.
