Pass Guaranteed 2026 Cisco 350-801–High Pass-Rate Reliable Exam Camp

Our 350-801 study guide is carefully edited and reviewed by our experts. The design of the content conforms to the examination outline and its key points. Through the practice of our 350-801 exam questions, you can grasp the intention of the examination organization accurately. And we also have the Software version of our 350-801 Learning Materials that can simulate the real exam which can help you better adapt to the real exam.

Final Thoughts

IT certifications can give you the much-needed flexibility enabling you to choose where you want to take your career. The Cisco 350-801 exam specifically stands out because it not only equips candidates with new skills but also qualifies them for a new certification. Get your career on track today by acing the test and enjoy the endless benefits.

Cisco 350-801 exam is an essential certification for IT professionals who want to specialize in Cisco collaboration core technologies. 350-801 Exam Tests the candidate's knowledge and skills in implementing and operating Cisco collaboration endpoints, Cisco Unified Communications Manager, Cisco Unity Connection, and Cisco Unified Contact Center Express. Passing 350-801 exam enhances the candidate's value in the job market and opens up new career opportunities.

350-801 Latest Exam Simulator, 350-801 Real Testing Environment

Be certain about what you believe and consistent in what you say. If you intend to pass Cisco 350-801 exam, you must take prompt action. Which is the best for your reference on the website? If you don't know how to choose your reference materials, we commend our TrainingQuiz Cisco 350-801 Study Guide to you. TrainingQuiz Cisco 350-801 certification training materials is the most complete. There is another advantage: we can provide you with free update for a year.

Cisco Implementing and Operating Cisco Collaboration Core Technologies Sample Questions (Q19-Q24):

NEW QUESTION # 19
Multiple route patterns match a number. How does Cisco Unified Communications Managers determine which pattern to use?

- A. the one with the longest match
- B. the one that discards everything PreDot
- C. the one with the closest match
- D. the one that comes first in numerical order
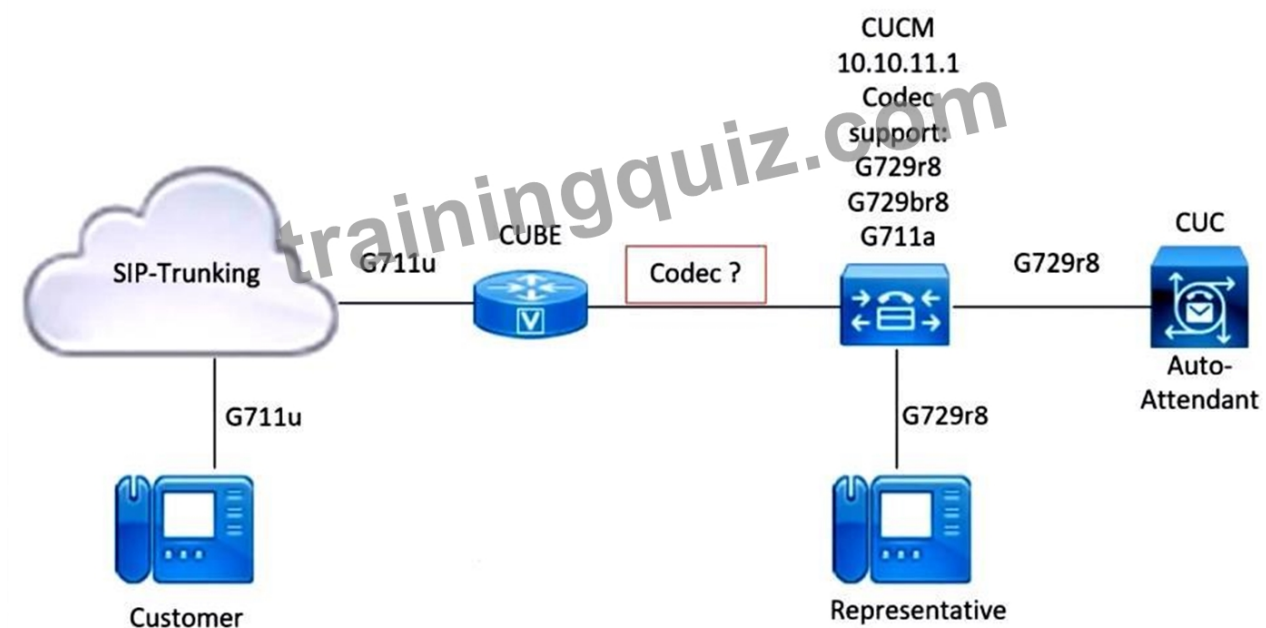

Answer: C

Explanation:
https://www.cisco.com/c/en/us/support/docs/voice-unified-communications/unified- communications-manager-callmanager/13920-call-routing.html#bcr

NEW QUESTION # 20
Refer to the exhibit. Which two events occur when a transcoder becomes unavailable and a customer calls the representative? (Choose two.)

```
1    CUBE(config)# voice class codec 100
2    CUBE(config-class)# codec preference 1 g729r8
3    CUBE(config-class)# codec preference 2 g729br8
4    CUBE(config-class)# codec preference 3 g711alaw
5    CUBE(config-class)# exit
6    CUBE(config)# dial-peer voice 10 voip
7    CUBE(config-dial-peer)# session target ipv4:10.10.11.1
8    CUBE(config-dial-peer)# session protocol sipv2
9    CUBE(config-dial-peer)# dtmf-relay rtp-nte
10   CUBE(config-dial-peer)# voice-class codec 100
11   CUBE(config-dial-peer)# end
```

- A. The call fails.
- B. The G.729r8 codec is used.
- C. The G.729br8 codec is used.
- D. The G.711u codec is used.
- E. The call succeeds.

Answer: A,D

Explanation:
This scenario involves a SIP call that requires codec negotiation between a customer (using G).711u via SIP trunk) and a representative (using G.729r8 via CUCM). The Cisco Unified Border Element (CUBE) is expected to provide a transcoding service between incompatible codecs.
When the transcoder becomes unavailable, the outcome depends on codec compatibility between the endpoints.

NEW QUESTION # 21
How does traffic policing respond to violations?

- A. Excess traffic is queued.
- B. Excess traffic is dropped.
- C. AH traffic is treated equally.
- D. Excess traffic is retransmitted.

Answer: B

NEW QUESTION # 22
On a cisco catalyst switch which command is required to send CDP packets on a switch port that configures a cisco IP phone to transmit voice traffic in 802.1q frames tagged with the voice VLAN ID 221?

- A. Device(config-if)# switchport access vlan 221
- B. Device(config-if)# switchport voice vlan 221
- C. Device(config-if)# switchport vlan voice 221
- D. Device(config~if)# switchport trunk allowed vlan 221

Answer: B

NEW QUESTION # 23
A collaboration engineer troubleshoots issues with a Cisco IP Phone 7800 Series. The IPv4 address of the phone is reachable via ICMP and HTTP, and the phone is registered to Cisco UCM However the engineer cannot reach the CU of the phone Which two actions in Cisco UCM resolve the issue? (Choose two)

- A. Enable Settings Access under Product Specific Configuration Layout in Cisco UCM
- B. Set a username and password under Secure Shell information in Cisco UCM
- C. Enable SSH Access under Product Specific Configuration Layout in Cisco UCM
- D. Disable Web Access under Product Specific Configuration Layout in Cisco UCM
- E. Enable FIPS Mode under Product Specific Configuration Layout in Cisco UCM

Answer: B,C

Explanation:
Cisco IP Phone 7800 Series devices support remote command-line access through SSH, but this access is disabled by default in Cisco Unified Communications Manager (CUCM). When an engineer is unable to reach the phone's command line while the device is otherwise reachable via ICMP/HTTP and registered to CUCM, the most common cause is that SSH is not enabled or the required credentials have not been configured.
Within the Phone Configuration # Product Specific Configuration Layout, CUCM provides administrative controls for remote access capabilities. The "SSH Access" parameter in this menu explicitly controls whether the phone will accept SSH connections; this must be enabled for any CLI access to function. In addition, CUCM requires the configuration of SSH username and password under the Secure Shell Information section. These credentials are then provisioned to the phone through its configuration file. If SSH is enabled but no credentials are defined, the phone will reject the connection even if TCP/22 is open.
Other listed options (such as disabling Web Access, enabling Settings Access, or turning on FIPS mode) do not impact SSH functionality. Web Access controls HTTP/HTTPS availability, Settings Access controls local phone menu access, and FIPS mode enforces cryptographic compliance but does not enable SSH by itself.
Therefore, the two actions that resolve the issue are:
* Enabling SSH Access in the Product Specific Configuration Layout
* Configuring SSH username and password under Secure Shell Information
These steps ensure the phone downloads updated configuration files, activates SSH, and allows authenticated remote CLI access-fully aligned with Cisco's standard operational behavior for 7800 Series endpoints.

NEW QUESTION # 24
......

The 350-801 PDF file contains the real, valid, and updated Cisco 350-801 exam practice questions. These are the real 350-801 exam questions that surely will appear in the upcoming exam and by preparing with them you can easily pass the final exam. The 350-801 PDF Questions file is easy to use and install. You can use the 350-801 PDF practice questions on your laptop, desktop, tabs, or even on your smartphone and start 350-801 exam preparation right now.
