

# ISO-IEC-27002-Foundation Reliable Braindumps Pdf - ISO-IEC-27002-Foundation Sample Questions Answers

and efficiency when preparing for [ACD100 Exams](#), thus inspiring them obtain the targeted ACD100 certificate successfully. There are many advantages of our ACD100 question torrent that we are happy to introduce you and you can pass the exam for sure.

## Appian Certified Associate Developer Sample Questions (Q16-Q21):

### NEW QUESTION # 16

You want to retrieve data from the database to show on your form. Which option should you use?

- A. `alqueryColumn()`
- B. `alquerySelection()`
- C. `alquery()`
- D. `alqueryEntity()`

Answer: D

### NEW QUESTION # 17

When designing a new interface, you have to create a table populated with record data. The table needs to link to the relevant record. With component should you use?

- A. Editable Grid
- B. Rich Text Display
- C. Text Layout
- D. Read-Only Grid

Answer: D

### NEW QUESTION # 18

A form has 5 rule inputs, as follows:

- 1 CDT variable
- 3 Text variables
- 1 Integer variable

According to best practices, how many process variables are required in the process model's user input task?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

### NEW QUESTION # 19

New ACD100 Reliable Braindumps Pdf    Valid ACD100 Sample Questions Answers: Appian Certified Associate Developer

We have always been known as the superior after sale service provider, since we all tend to take lead of the whole process after you choose our ISO-IEC-27002-Foundation exam questions. So you have no need to trouble about our ISO-IEC-27002-Foundation study materials, if you have any questions, we will instantly response to you. Our ISO-IEC-27002-Foundation Training Materials will continue to pursue our passion for better performance and comprehensive service of ISO-IEC-27002-Foundation exam.

## PECB ISO-IEC-27002-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• Interpret the ISO</li> <li>• IEC 27002 organizational, people, physical, and technological controls in the specific context of an organization: This domain covers the four control categories defined in ISO</li> <li>• IEC 27002 organizational, people, physical, and technological and how each applies to real-world organizational environments. It requires understanding how to read, interpret, and contextualize these controls based on an organization's specific needs, risks, and operating conditions.</li> </ul>

Topic 2	<ul style="list-style-type: none"> <li>• Discuss the relationship between ISO</li> <li>• IEC 27001, ISO</li> <li>• IEC 27002, and other standards and regulatory frameworks: This domain examines how ISO</li> <li>• IEC 27002 functions as a code of practice that supports the requirements set out in ISO</li> <li>• IEC 27001, and how both standards interact with other relevant frameworks. It also addresses how organizations align these standards with applicable laws, regulations, and industry-specific requirements.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Explain the fundamental concepts of information security, cybersecurity, and privacy based on ISO</li> <li>• IEC 27002: This domain covers the core principles and definitions that underpin information security, including the concepts of confidentiality, integrity, and availability. It focuses on how ISO</li> <li>• IEC 27002 frames cybersecurity and privacy as foundational elements of an organization's overall security posture.</li> </ul>

## ISO-IEC-27002-Foundation Sample Questions Answers | Test ISO-IEC-27002-Foundation Testking

Our ISO-IEC-27002-Foundation exam prep is elaborately compiled and highly efficiently, it will cost you less time and energy, because we shouldn't waste our money on some useless things. The passing rate and the hit rate are also very high, there are thousands of candidates choose to trust our ISO-IEC-27002-Foundation guide torrent and they have passed the exam. We provide with candidate so many guarantees that they can purchase our study materials no worries. So we hope you can have a good understanding of the ISO-IEC-27002-Foundation Exam Torrent we provide, then you can pass your exam in your first attempt.

### PECB ISO/IEC 27002 Foundation Exam Sample Questions (Q14-Q19):

#### NEW QUESTION # 14

What should the management of the organization do to ensure that all personnel are aware of and fulfill their information security responsibilities?

- A. Require all personnel to apply information security in accordance with the established information security policy, topic-specific policies and procedures of the organization
- B. Require all personnel to read the guidelines of ISO/IEC 27002
- C. Require all personnel to establish and approve information security policies, topic-specific policies and procedures of the organization

**Answer: A**

#### NEW QUESTION # 15

How can organizations manage the security of large networks?

- A. By dividing networks into separate network domains and separating them from the public network
- B. By avoiding the integration of information services, users, and information systems into large networks
- C. By dividing networks into separate network domains and including them into the public network

**Answer: A**

Explanation:

Organizations can manage the security of large networks by dividing them into separate network domains and separating them from the public network where appropriate. This reflects the principle of network segregation, which reduces the ability of an attacker, malware, or unauthorized user to move freely across the environment. Separate domains can be based on trust level, business function, system criticality, data sensitivity, user group, supplier access, development environment, or regulatory requirement. ISO/IEC 27002 supports this through network security, network segregation, access control, and secure architecture practices. Option B is incorrect because including internal domains into the public network would increase exposure and weaken boundaries. Option C is not realistic or aligned with modern enterprise architecture; organizations often need integrated services, users, and systems, but they must integrate them securely. Segmentation allows controlled communication through firewalls, gateways, routing

rules, access controls, monitoring, and filtering. The goal is not isolation for its own sake, but risk-based separation and controlled connectivity.

Therefore, option A is verified. References/Chapters: ISO/IEC 27002:2022, Control 8.20 Network security; Control 8.22 Segregation of networks; Control 5.15 Access control.

#### NEW QUESTION # 16

What should NOT be taken into account when locating and constructing physical premises?

- A. System requirements
- B. Local topography
- C. Urban threats

**Answer: A**

Explanation:

System requirements should not be the primary factor listed for locating and constructing physical premises in the ISO/IEC 27002 physical security context. When selecting and constructing premises, organizations should consider physical and environmental threats such as local topography, flood risk, earthquake exposure, weather conditions, crime levels, civil unrest, neighboring facilities, hazardous sites, and urban threats. These considerations help reduce risks to secure areas, information processing facilities, equipment, personnel, and supporting utilities. Local topography is relevant because geography can influence flooding, landslides, access routes, drainage, and natural hazards. Urban threats are relevant because location can affect exposure to crime, protests, terrorism, traffic disruption, adjacent buildings, or public access. System requirements are important in technology design and facility planning, but they are not the type of environmental or location threat consideration targeted by this question. ISO/IEC 27002 physical controls emphasize protecting premises from physical and environmental risks, not choosing location based on application or system functional requirements. Therefore, option C is verified. References/Chapters: ISO/IEC 27002:2022, Control 7.1 Physical security perimeters; Control 7.5 Protecting against physical and environmental threats; Control 7.8 Equipment siting and protection.

#### NEW QUESTION # 17

An organization has set up a fire alarm. What type of control is this?

- A. Detective and technical
- B. Corrective and managerial
- C. Preventive and legal

**Answer: A**

Explanation:

A fire alarm is a detective and technical control. It is detective because it identifies or signals that a fire-related event may be occurring. The alarm does not normally stop the fire from starting, and it does not restore damaged assets after the event. Its purpose is to detect indicators such as smoke, heat, or fire and trigger response actions such as evacuation, suppression, emergency communication, or incident handling. It is technical because it operates through engineered or electronic mechanisms rather than through management approval, legal clauses, or purely administrative processes. ISO/IEC 27002:2022 classifies controls using attributes, including control type. Control types include preventive, detective, and corrective. Fire alarms align with the physical security control area because fire is a physical and environmental threat to information processing facilities, equipment, storage media, and supporting infrastructure. The value of the control is timely detection, reducing the chance that a physical event escalates unnoticed into major damage or service disruption. References/Chapters: ISO/IEC 27002:2022, Clause 4 control attributes; Control 7.4 Physical security monitoring; Control 7.5 Protecting against physical and environmental threats.

#### NEW QUESTION # 18

Which of the following controls aims to ensure the integrity of operational systems and prevent exploitation of technical vulnerabilities?

- A. Control 8.15 Logging
- B. Control 8.17 Clock synchronization
- C. Control 8.19 Installation of software on operational systems

**Answer: C**

## NEW QUESTION # 19

.....

Time is very important for everyone. As the saying goes, time is life so spend it wisely. We believe that you also don't want to spend much time on preparing for your ISO/IEC 27002 Foundation Exam exam. How can you pass your exam and get your certificate in a short time? Our ISO-IEC-27002-Foundation exam torrent will be your best choice to help you achieve your aim. According to customers' needs, our product was revised by a lot of experts; the most functions of our ISO/IEC 27002 Foundation Exam exam dumps are to help customers save more time, and make customers relaxed. If you choose to use our ISO-IEC-27002-Foundation Test Quiz, you will find it is very easy for you to pass your exam in a short time. You just need to spend 20-30 hours on studying; you will have more free time to do other things.
