

Juniper JN0-637 Valid Test Braindumps & JN0-637 Pass4sure Dumps Pdf

What's more, part of that DumpTorrent JN0-637 dumps now are free: <https://drive.google.com/open?id=1Ko0Ad3rHUaffqZoZyjoXPse2AzXGMIF>

We are a comprehensive service platform aiming at help you to pass JN0-637 exams in the shortest time and with the least amount of effort. As the saying goes, an inch of gold is an inch of time. The more efficient the JN0-637 study guide is, the more our candidates will love and benefit from it. It is no exaggeration to say that you can successfully pass your exams with the help our JN0-637 learning torrent just for 20 to 30 hours even by your first attempt.

Juniper JN0-637 Exam Syllabus Topics:

Topic	Details
Topic 1	• Troubleshooting Security Policies and Security Zones: This topic assesses the skills of networking professionals in troubleshooting and monitoring security policies and zones using tools like logging and tracing.
Topic 2	• Automated Threat Mitigation: This topic covers Automated Threat Mitigation concepts and emphasizes implementing and managing threat mitigation strategies.
Topic 3	• Advanced Network Address Translation (NAT): This section evaluates networking professionals' expertise in advanced NAT functionalities and their ability to manage complex NAT scenarios.
Topic 4	• Multinode High Availability (HA): In this topic, aspiring networking professionals get knowledge about multinode HA concepts. To pass the exam, candidates must learn to configure or monitor HA systems.

Get First-grade JN0-637 Valid Test Braindumps and Pass Exam in First Attempt

As is known to us, a good product is not only reflected in the strict management system, complete quality guarantee system but also the fine pre-sale and after-sale service system. In order to provide the best JN0-637 study materials for all people, our company already established the integrate quality manage system, before sell serve and promise after sale. If you buy the JN0-637 Study Materials from our company, we can make sure that you will have the right to enjoy the 24 hours full-time online service.

Juniper Security, Professional (JNCIP-SEC) Sample Questions (Q86-Q91):

NEW QUESTION # 86

Exhibit:

Your company uses SRX Series devices to establish an IPsec VPN that connects Site-1 and the HQ networks. You want VoIP traffic to receive priority over data traffic when it is forwarded across the VPN.

Which three actions should you perform in this scenario? (Choose three.)

- A. Enable next-hop tunnel binding.
- **B. Configure CoS forwarding classes and scheduling parameters.**
- C. Enable the copy-outer-dscp parameter so that DSCP header values are copied to the tunneled packets.
- **D. Enable the multi-sa parameter to enable two separate IPsec SAs for the VoIP and data traffic.**
- **E. Create a firewall filter that identifies VoIP traffic and associates it with the correct forwarding class.**

Answer: B,D,E

NEW QUESTION # 87

Which role does an SRX Series device play in a DS-Lite deployment?

- A. STUN client
- B. Softwire concentrator
- **C. Softwire initiator**
- D. STUN server

Answer: C

Explanation:

In a DS-Lite deployment, the SRX device functions as the softwire initiator, which initiates IPv4-in-IPv6 tunneling to connect IPv4 hosts over an IPv6 infrastructure. For DS-Lite configurations and roles, check Juniper DS-Lite Documentation.

In a DS-Lite (Dual-Stack Lite) deployment, the SRX Series device typically acts as a softwire initiator. DS-Lite is an IPv6 transition technology that allows IPv6-enabled devices to communicate with IPv4 networks.

The softwire initiator is responsible for encapsulating IPv4 packets within an IPv6 header at the customer edge, which is then sent to the softwire concentrator (usually on the service provider's side). Juniper SRX devices can be configured for DS-Lite to support IPv6 clients while communicating with an IPv4 internet via this tunneling mechanism.

To configure DS-Lite on a Juniper SRX device, you'd follow these steps:

- * Configure the DS-Lite AFTR (Address Family Transition Router) with the correct IPv6 addressing and routing parameters.
- * Enable DS-Lite functionality on the SRX device using Junos OS commands.
- * Verify connectivity and ensure that traffic from IPv6 devices is correctly tunneled over IPv4 using tools like ping and traceroute over IPv6.

NEW QUESTION # 88

Referring to the exhibit, you are attempting to set up a remote access VPN on your SRX series devices.

However you are unsure of which system services you should allow and in which zones they should be allowed to correctly finish the remote access VPN configuration Which two statements are correct? (Choose two.)

- A. You should add the host-inbound-traffic system-service ike statement to the VPN zone.
- **B. You should add the host-inbound-traffic system-service ike statement to the Untrust zone.**
- C. You should add the host-inbound-traffic system-service tcp-encap statement to the VPN zone
- **D. You should add the host-inbound-traffic system-service tcp-encap statement to the Untrust zone**

Answer: B,D

NEW QUESTION # 89

Exhibit:

□
In which mode is the SRX Series device?

- A. Packet
- B. Ethernet switching
- **C. Mixed**
- D. Transparent

Answer: C

NEW QUESTION # 90

You have configured the backup signal route IP for your multinode HA deployment, and the ICL link fails. Which two statements are correct in this scenario? (Choose two.)

- **A. The current active node retains the active role.**
- B. The active node removes the active signal route.
- C. The active node keeps the active signal route.
- **D. The backup node changes the routing preference to the other node at its medium priority.**

Answer: A,D

Explanation:

Explanation:

NEW QUESTION # 91

.....

I think these smart tips will help you to study well for the exam and get a brilliant score without any confusion. To get the Security, Professional (JNCIP-SEC) JN0-637 practice test, find a reliable source that provides the JN0-637 Exam Dumps to their clients. Security, Professional (JNCIP-SEC) JN0-637 certification exams are not easy but quite tricky to know whether the applicant has complete knowledge regarding the subject or not.
