We know deeply that a reliable NCP-DB-6.10 exam material is our company's foothold in this competitive market. High accuracy and high quality are the most important things we always looking for. Compared with the other products in the market, our NCP-DB-6.10 latest questions grasp of the core knowledge and key point of the real exam, the targeted and efficient Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 study training dumps guarantee our candidates to pass the test easily. Passing exam won't be a problem anymore as long as you are familiar with our NCP-DB-6.10 Exam Material (only about 20 to 30 hours practice). High accuracy and high quality are the reasons why you should choose us.

Practicing with Nutanix NCP-DB-6.10 Exam questions will help you to become an expert, Nutanix NCP-DB-6.10 and acquire the Nutanix NCP-DB-6.10 Certification. Nutanix NCP-DB-6.10 Exam Questions allow you to verify your skills as a professional, prepared by Nutanix NCP-DB-6.10. You have to pass the Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 NCP-DB-6.10 exam to achieve the Nutanix NCP-DB-6.10 certification on the first attempt, which is organized by Nutanix.

NCP-DB-6.10 Valid Exam Experience - Question NCP-DB-6.10 Explanations

We are stable and reliable NCP-DB-6.10 exam questions providers for persons who need them for their NCP-DB-6.10 exam. We have been staying and growing in the market for a long time, and we will be here all the time, because our excellent quality and high pass rate of NCP-DB-6.10 exam questions can meet your requirement. As for the high-effective NCP-DB-6.10 training guide, there are thousands of candidates are willing to choose our NCP-DB-6.10 study question, why don't you have a try for our NCP-DB-6.10 study materials, we will never let you down!

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q31-Q36):

NEW QUESTION # 31

An administrator has been asked to patch several Nutanix database server VMs. Prior to patching, what should the administrator configure?

- A. pulse
- B. Active Directory Access
- C. An SMTP Server
- D. A Repository

Answer: D

Explanation:

Before patching several Nutanix database server VMs using the "Patch OS now" feature in NDB, the administrator must configure a Repository. A repository (e.g., a custom patch repository or Nutanix- provided source) contains the OS updates or patches (e.g., for Windows or Red Hat- based systems). NDB requires this repository to be specified to fetch and apply the patches, ensuring the database VMs are updated from a validated source.

NEW QUESTION # 32

A vCenter instance which manages multiple clusters including a Nutanix cluster hosting NDB service crashed. After deploying a dedicated new vCenter server, the administrator needs to update vCenter setting within NDB.

Which action should be performed?

- A. Click the Getting Started page and perform the configuration wizard.
- B. Wait 60 minutes and Prism Central will automatically sync NDB.
- **C. Update cluster settings from the NDB administration page.**
- D. Open the maintenance page in NDB and configure the cluster settings.

Answer: C

Explanation:

When a vCenter instance managing multiple clusters, including a Nutanix cluster hosting the NDB service, crashes and a new dedicated vCenter server is deployed, the administrator must update the vCenter settings within NDB to re-establish connectivity and management. The correct action is to navigate to the NDB Administration page, where cluster and vCenter configurations can be updated. This page allows the administrator to re-register the new vCenter instance, ensuring NDB can continue to manage the clusters and database VMs effectively. This approach avoids unnecessary reconfiguration wizards or waiting for automatic syncs.

NEW QUESTION # 33

While adding Time Machine data access to a Nutanix cluster, when is a storage container mapping needed?

- A. When the source and destination database containers are different.
- B. When the source database and NDB provisioning container are the same.
- **C. When the source database and NDB Server containers are different.**
- D. When the source database and NDB VM are on the same container.

Answer: C

Explanation:

Time Machine data access is a feature of Nutanix Database Service (NDB) that allows you to access a point-in-time snapshot of a database without restoring it. To use this feature, you need to create a Data Access Management (DAM) policy that defines the access mode, the source database, the destination cluster, and the storage container mapping. The storage container mapping is needed when the source database and the NDB Server containers are different, because NDB needs to know where to store the metadata and the clone of the source database.

If the source database and the NDB Server containers are the same, then NDB will use the same container for both the metadata and the clone.

NEW QUESTION # 34

Which file format is available when downloading a list of alerts?

- A. xml
- **B. csv**
- C. pdf
- D. xlsx

Answer: B

Explanation:

When downloading a list of alerts from NDB, the available file format is csv (Comma-Separated Values). NDB provides this format

to export alert data (e.g., alert ID, timestamp, severity, description) in a structured, machine-readable way that can be easily imported into spreadsheet applications like Microsoft Excel or analyzed programmatically. This aligns with NDB's focus on operational efficiency and data portability.

NEW QUESTION # 35

An administrator needs to remove the default administrative account in use for NDB operations. What is the recommended role for the Prism Element user to register a Nutanix cluster?

- A. User Admin
- B. Cluster Admin
- C. Backup Admin
- D. Super Admin

Answer: B

Explanation:

When registering a Nutanix cluster with the Nutanix Database Service (NDB), the Prism Element user account used for registration must have sufficient privileges to perform cluster-level operations. The recommended role for this task is Cluster Admin. The Cluster Admin role in Prism Element provides the necessary permissions to manage cluster resources, including storage, networking, and integration with external services like NDB. This role is required because registering a cluster with NDB involves tasks such as establishing connectivity, validating configurations (e.g., Data Services IP), and ensuring that NDB can interact with the cluster's Controller VMs and storage infrastructure.

NEW QUESTION # 36

.....

.Nutanix NCP-DB-6.10 exam dumps are important because they show you where you stand. After learning everything related to the Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) certification, it is the right time to take a self-test and check whether you can clear the Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) certification exam or not. People who score well on the Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) practice questions are ready to give the final Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) exam. On the other hand, those who do not score well can again try reading all the Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) dumps questions and then give the NCP-DB-6.10 exam.

NCP-DB-6.10 Valid Exam Experience: <https://www.pdfdumps.com/NCP-DB-6.10-valid-exam.html>

With PDFDumps's Nutanix Nutanix Certified Professional (NCP) study guides as well as NCP-DB-6.10 dumps, they find it quite easy to prepare for any certification exam within days and pass it. We can provide the NCP-DB-6.10 certification training and valid best questions for you, and guarantee you can pass exam 100% surely, Nutanix Exam NCP-DB-6.10 Guide You can use practice test VCE any time to test your own exam simulation test scores.

But the version control system doesn't discard the previous state of the NCP-DB-6.10 files, The Officejet Pro requires the user to enable HP Wireless Direct functionality on the printer before any device can see the printer.

Exam NCP-DB-6.10 Guide 100% Pass | Professional NCP-DB-6.10: Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 100% Pass

With PDFDumps's Nutanix Nutanix Certified Professional (NCP) study guides as well as NCP-DB-6.10 Dumps, they find it quite easy to prepare for any certification exam within days and pass it.

We can provide the NCP-DB-6.10 certification training and valid best questions for you, and guarantee you can pass exam 100% surely, You can use practice test VCE any time to test your own exam simulation test scores.

In our modern society, information has become a very important element no matter in business or personal life, You can find all the key points in the NCP-DB-6.10 practice torrent.
