So with CBCP-002 study tool you can easily pass the exam.

GAQM Certified Business Continuity Professional (CBCP) Sample Questions (Q39-Q44):

NEW QUESTION # 39

BIA helps you identify

- A. Critical services and products
- **B. All of the above**
- C. Tangible and intangible impact of a disruption over period of time
- D. Critical interdependencies and interested parties

Answer: B

Explanation:

Explanation

BIA helps to identify all of the above aspects of an organization's functions and processes. It helps to identify the critical services and products that the organization delivers to its customers and stakeholders, and the functions and processes that support them. It also helps to identify the critical interdependencies and interested parties that are involved in or affected by the organization's functions and processes, such as suppliers, partners, regulators, or employees. Moreover, it helps to identify the tangible and intangible impacts of a disruption to the organization's functions and processes over a period of time, such as financial losses, reputational damage, legal liabilities, or customer dissatisfaction. NEW QUESTION # 40

Which statement is authorized at an appropriate level and should codify the company's attitude to a particular risk?

- A. Process Document
- B. QMS Document
- C. Privacy Statement
- **D. Policy Statement**

Answer: D

Explanation:

Explanation

A policy statement is a statement that is authorized at an appropriate level and should codify the company's attitude to a particular risk. A policy statement is a document that defines the scope, objectives, principles, roles, and responsibilities of a business continuity management program. It should also express the organization's commitment to managing risks and ensuring continuity of its critical functions and processes. A policy statement should be approved by senior management and communicated to all relevant stakeholders.

NEW QUESTION # 41

Which risk group is associated with risk of physical assets failing/being damaged or enhanced?

- A. Operational
- **B. Technical**
- C. Strategic
- D. Financial

Answer: B

Explanation:

Technical risk is the type of risk that is associated with risk of physical assets failing/being damaged or enhanced. Technical risk is the uncertainty or variability of the performance or reliability of physical assets, such as equipment, systems, infrastructure, or data. Technical risk can result from factors such as design flaws, manufacturing defects, maintenance issues, obsolescence, human error, natural disasters, or cyberattacks. Technical risk can affect an organization's operational efficiency, quality, safety, security, or profitability. NEW QUESTION # 42

In pre-crisis management, CM activities are focused on prevention and preparedness activities.

- A. False
- **B. True**

Answer: B

Explanation:

In pre-crisis management, CM activities are focused on prevention and preparedness activities. This is true because pre-crisis management is the phase before a crisis occurs, where the organization tries to anticipate and avoid potential crises or reduce their likelihood and impact. Pre-crisis management involves activities such as risk assessment, business impact analysis, business continuity planning, contingency planning, crisis communication planning, training and awareness, testing and exercising, monitoring and reviewing. NEW QUESTION # 43

Which type of management is an often used term, but has so many different connotations to different people that invariably the

message of its meaning gets confused?

- A. Technical
- **B. Strategic**
- C. Functional
- D. Operational

Answer: B

Explanation:

Strategic management is the type of management that is an often used term, but has so many different connotations to different people that invariably the message of its meaning gets confused. Strategic management is the process of defining and executing the long-term vision, goals, plans, and actions of an organization. Strategic management involves analyzing the internal and external environment, formulating strategies, implementing them, and evaluating their outcomes. Strategic management can be complex and challenging, as it requires alignment and integration of various aspects of the organization, such as culture, structure, resources, capabilities, stakeholders, markets, competitors, or regulations.
