Cisco Implementing and Configuring Cisco Identity Services Engine Sample Questions (Q49-Q54):

NEW QUESTION # 49

What is a restriction of a standalone Cisco ISE node deployment?

- A. The hostname of the node cannot be changed after installation.
- **B. Personas are enabled by default and cannot be edited on the node.**
- C. The domain name of the node cannot be changed after installation.
- D. Only the Policy Service persona can be disabled on the node.

Answer: B

NEW QUESTION # 50

A network engineer has recently configured a remote branch router to authenticate to a centralized Cisco ISE server behind the corporate firewall using TACACS+. After making this configuration change, the engineer opened another SSH session to the router in order to verify that login attempts are now being sent to Cisco ISE, however that login attempt was unsuccessful. There are no connection attempts showing in the TACACS live log in Cisco ISE and the firewall administrator has verified that they see syslog and SNMP traffic destined for the IP address of Cisco ISE, but no TACACS+ traffic. Which misconfiguration is the cause of the failed login?

- A. No hosts have been defined under the aaa server group on the router.
- **B. The tacacs source-interface command on the router references the wrong interface.**
- C. The router is missing a route to the Cisco ISE server.
- D. The shared secret entered on the router for the Cisco ISE server is incorrect.

Answer: B

NEW QUESTION # 51

An engineer configured posture assessment for their network access control with the goal of using an agent that supports using service conditions for the assessment. The agent should run as a background process to avoid user interruption, but the user can see it when it is run. What is the problem?

- A. The posture module was deployed using the headend instead of installing it with SCCM.
- B. The proper permissions were not given to the temporal agent to conduct the assessment.
- **C. The selected posture agent does not support the engineer's goal.**
- D. The user required remediation so the agent appeared in the notifications.

Answer: C

NEW QUESTION # 52

Drag the steps to configure a Cisco ISE node as a primary administration node from the left into the correct order on the right.

Answer:

Explanation:

Explanation:

https://www.cisco.com/c/en/us/td/docs/security/ise/2-4/admin_guide/b_ise_admin_guide_24/b_ise_admin_guide_24_new_chapter_011.html

Step 1

Choose Administration > System > Deployment.

The Register button will be disabled initially. To enable this button, you must configure a Primary PAN.

Step 2

Check the check box next to the current node, and click Edit.

Step 3

Click Make Primary to configure your Primary PAN.

Step 4

Enter data on the General Settings tab.

Step 5

Click Save to save the node configuration.

NEW QUESTION # 53

What does MAB stand for?

- **A. MAC Authentication Bypass**
- B. MAC Authorization Binding
- C. MAC Authorization Bypass
- D. MAC Address Binding

Answer: A

NEW QUESTION # 54
