Citrix 1Y0-205題庫最新資訊 - 1Y0-205題庫分享

Citrix的認證考試現在是很有人氣的考試。你已經取得了這個重要的認證資格嗎？比如，你已經參加了現在參加人數最多的1Y0-205考試了嗎？如果還沒有的話，你應該儘快採取行動了。你必須要拿到如此重要的認證資格。在這裏我想說的就是怎樣才能更有效率地準備1Y0-205考試，並且一次就通過考試拿到考試的認證資格。

最新的 Citrix Virtual Apps 1Y0-205 免費考試真題 (Q38-Q43):

問題 #38
Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a number of network print servers being

used for all users. Currently, the print servers use native Windows drivers. No client printers are being used. New company guidelines require a reduction in the number of native drivers being used within the Site infrastructure. Which step can the administrator take to meet the new company guidelines?

- A. Install the Universal Print Server on all print servers in the Site and leave the default Universal printer driver usage policy setting.
- B. Enable the Citrix Universal Print Driver (EMF) driver and leave the default Universal printer driver usage policy setting.
- C. Configure the Citrix Universal Generic Printer and update the Auto-create generic universal printer policy setting.
- D. Install the Universal Print Server on all print servers in the Site and update the Universal printer driver usage policy setting.

答案：**D**

解題說明：
By installing the Citrix Universal Print Server and configuring the Universal printer driver usage policy, print servers can use the Citrix Universal Print Driver instead of multiple native Windows drivers. This reduces the number of drivers in the environment while ensuring centralized network printing remains functional.

問題 #39
By default, what is the printing behavior when no printing policy is configured?

- A. The Universal Print Server is enabled.
- B. The generic universal printer is automatically created.
- C. All client printers are auto-created.
- D. Direct connections to print servers are prohibited.

答案：**C**

問題 #40
Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a large number of Windows users running various locally attached client printers. No network printers are being used. The administrator has enabled the HDX printer mapping policy to 'Auto-create all client printers', which has resulted in a large number of drivers being loaded onto the Virtual Delivery Agent (VDA) machines. New standards are requiring the administrator to limit these Windows drivers on the VDA machines. Which printing feature can the administrator enable to meet the new standards?

- A. The Citrix Universal Print Server
- B. The Citrix Universal Printer Driver
- C. The Auto-create local (non-network) client printers only policy
- D. The Auto-create PDF universal printer policy

答案：**B**

解題說明：
Enabling the Citrix Universal Printer Driver allows client printers to be auto-created without requiring individual printer drivers to be installed on the VDA machines. This standardizes printing, reduces driver sprawl, and meets compliance requirements by minimizing the number of Windows drivers on the VDAs.

問題 #41
Which feature can a Citrix Administrator use to publish applications from an Application Group, considering only a subset of the machines in the selected Delivery Group?

- A. Limit Visibility
- B. Session Sharing
- C. Application Lingering
- D. Tag restriction

答案：**D**

解題說明：

Tag restriction allows an administrator to publish applications from an Application Group but restrict them to run only on a subset of machines within the associated Delivery Group. This provides flexibility in controlling which resources are used for specific applications.

問題 #42

A Virtual Delivery Agent (VDA) is unable to register with the Delivery Controller.
Which three factors could be causing this issue? (Choose three.)

- A. Citrix ICA service NOT running
- B. Time differences between VDA-enabled machines and the Domain Controller
- C. Improperly configured firewalls
- D. Incorrectly configured Citrix policy in Active Directory
- E. Incorrectly configured reverse DNS lookups in a forest

答案：A,B,C

解題說明：
Improperly configured firewalls can block communication between the VDA and Delivery Controller.
Time differences greater than 5 minutes between the VDA and Domain Controller can prevent Kerberos authentication, leading to registration failure.
The Citrix ICA service (BrokerAgent) must be running for the VDA to register; if stopped, registration will fail.

問題 #43

......

通過 Citrix的1Y0-205的考試認證不僅僅是驗證你的技能，但也證明你的專業知識和你的證書，你的老闆沒有白白雇傭你，目前的IT行業需要一個可靠的 Citrix的1Y0-205的考試的來源，NewDumps是個很好的選擇，1Y0-205的考試縮短在最短的時間內，這樣不會浪費你的錢和精力。還會讓你又一個美好的前程。
