Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Sample Questions (Q201-Q206):

NEW QUESTION # 201

A company plans to implement Dynamics 365 Finance and purchase licenses through an Enterprise Agreement (EA).

Development environments must be licensed for the duration of the implementation.

You need to recommend solutions for activating development environments that allows the company to manage costs based on usage.

What should you recommend? To answer, drag the appropriate solutions to the correct requirements.

Each requirement may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 202

A company plans to build Power Apps apps as part of their digital transformation strategy.

App makers require access to individual environments to learn how to build apps through the Community Plan. Tenant users require access to an environment in which they can test apps as well as have database backup and restore capabilities.

You need to recommend appropriate environments for the company.

What should you recommend? To answer, drag the appropriate environments to the correct requirements. Each environment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Developer

Developer

Developer environments are created by users who have the Developer Plan license. They're special environments intended only for use by the owner. Provisioning developer environments can be restricted to admins (see Block trial licenses commands). The developer environment will be available as long as you actively use the Power Apps Developer Plan.

Box 2: Sandbox

These are non-production environments, which offer features like copy and reset. Sandbox environments are used for development and testing, separate from production. Provisioning sandbox environments can be restricted to admins (because production environment creation can be blocked), but converting from a production to a sandbox environment can't be blocked.

NEW QUESTION # 203

A company implements Dynamics 365 Commerce. The company has 200 retail stores. The company has a retail store custom solution and a third-party e-commerce solution. Dynamics 365 Commerce will replace the custom retail point of sale (POS) solution.

Dynamics 365 Commerce must integrate with the company's third-party e-commerce solution. The third-party e-commerce solution must meet the following requirements:

- * Integrate with Microsoft Dynamics 365 for in-store order pickups.

- * Store orders in XML file format.

- * Send the XML order files to an FTP file location.

Dynamics 365 Commerce must meet the following requirements:

- * Serve as the inventory system of record.

- * Serve as the retail sales and financial system of record.

- * Provide point-of-sale (POS) capabilities in store.

- * Provide the ability for e-commerce customers to pick up orders in store.

- * Update the status of the sales order to prevent it from being fulfilled multiple times.

The custom retail POS solution must meet the following requirements:

- * Import retail transactions from all stores into Dynamics 365 Commerce.

- * Produce a single pipe-delimited file of all daily sales transactions by store.

- * Continue to operate for six months before it is deprecated.

You need to create data integrations for the business processes.

Which integration patterns should you use? To answer, drag the appropriate patterns to the correct requirements. Each pattern may

be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 204

You need to recommend solutions to meet the CIO's requirements (or the customers and the roadmap. What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 205

A company with multiple legal entities implements Dynamics 365 Finance. The company does not want to purchase additional licensing or incur development costs.

The company's controller notes that vendors exist in multiple companies. The system does not apply and does not post payments to the correct company.

The controller notes that a company-specific report exists for vendor payment journals.

You must replace the single company-specific report with a global report that displays the vendor payment journal status across all companies in the organization for a single vendor.

You must minimize development and creation of new reports.

You need to identify a tool to create the report.

What should you recommend?

- A. SQL Server Reporting Services (SSRS)
- B. Power BI
- C. Electronic reporting tool
- **D. Financial Reporter**
- E. View

Answer: D

Explanation:

Financial reporting for the application allows financial and business professionals to create, maintain, deploy, and view financial statements. It moves beyond traditional reporting constraints to help you efficiently design various types of reports.

Financial reporting includes dimension support. Therefore, account segments or dimensions are immediately available. No additional tools or configuration steps are required.
