Our Salesforce AP-222 study guide in order to allow the user to form a complete system of knowledge structure, the qualification examination of test interpretation and supporting course practice organic reasonable arrangement together, the AP-222 simulating

materials let the user after learning the section, and each section between cohesion and is closely linked, for users who use the Public Sector Solutions Accredited Professional AP-222 training quiz to build a knowledge of logical framework to create a good condition.

Salesforce Public Sector Solutions Accredited Professional Sample Questions (Q82-Q87):

NEW QUESTION # 82

A government agency recently implemented Inspections Management, but the internal users want an easier way to generate Visits. Currently, the users must navigate to the Related List tab on an Application, scroll to the Visits* related list and click 'New.' The users also have to manually fill all of the fields when creating the Visit record. What is the recommended approach for creating a better user experience when creating a Visit?

- A. Create a new Action on the Business License Application and Individual Application objects to create a Visit record with Predefined Field Values.
- **B. Create a Screen Flow with the required fields to create a Visit record and add the button to launch the flow on the page layout.**
- C. Change the Business License Application and Individual Application pages to have a single related list of Visits on the right panel.
- D. Advise the government agency that the current method is the best option available without custom code, which they should avoid wherever possible.

Answer: B

Explanation:

Creating a Screen Flow or creating a new Action are two possible approaches for creating a better user experience when creating a Visit. A Screen Flow is a type of flow that can create an interactive user interface to display information or collect data from users. A Screen Flow can have the required fields to create a Visit record and it can be launched by a button on the page layout. An Action is a type of button that can perform tasks such as creating or updating records. An Action can have Predefined Field Values that can automatically populate fields when creating a Visit record. NEW QUESTION # 83

A public sector agency is looking to digitize its operations for Emergency Response. As the technical consultant on the project, the expectations are to roll out a public facing portal that allows citizens to submit a simple emergency request with some basic information.

Which two are the correct approaches a consultant should take to meet these objectives?

- A. Build a digital experience site using the Help Center template based on the agency's requirement
- **B. Leverage prebuilt Emergency Service Request flow.**
- **C. Build a digital experience site using pre-configured emergency response management (ERM) specific template**
- D. Create a custom Case Record Type and leverage a prebuilt Contact Support Form

Answer: B,C

Explanation:

Building a digital experience site using pre-configured emergency response management (ERM) specific template and leveraging prebuilt Emergency Service Request flow are two correct approaches to meet the objectives of providing a way for citizens to submit a simple emergency request with some basic information.

The ERM specific template is a prebuilt template that comes with Community Response for Public Sector, which is a prebuilt app that comes with Public Sector Solutions. It can help public sector agencies to create and manage emergency response programs and services, and enable citizens to access resources and submit requests. The Emergency Service Request flow is a prebuilt flow that comes with the ERM specific template.

It can allow citizens to submit a simple emergency request with some basic information, such as their name, contact details, location, and service type. Reference: https://help.salesforce.com/s/articleView?id=psc_admin_setup_community_response.htm&type=5&language=en_US

NEW QUESTION # 84

The City of Snaxboro has implemented CRM Analytics for Public Sector but keeps getting an error message when creating the Analytics (or the Licensing, Permits, and inspections app. They have verified that their users have the appropriate permission sets assigned.

What is the most probable cause for the error message?

- A. There are no Visit records.
- B. There are no active Action Plan Templates.
- C. Person Accounts have not been enabled.
- D. There are no Violation records.

Answer: A

Explanation:

There are no Visit records is the most probable cause for the error message when creating the Analytics for the Licensing, Permits, and Inspections app. CRM Analytics for Public Sector is a prebuilt app that comes with Public Sector Solutions and it can provide reports and dashboards for licensing, permitting, and inspections data. However, if there are no Visit records in the org, the Analytics app cannot generate any data and will show an error message. To fix this issue, the City of Snaxboro needs to create some Visit records or import some sample data. NEW QUESTION # 85

Foodvania has adopted Salesforce Public Sector Solutions to get relief to small businesses experiencing hardship due to the pandemic. Foodvania would like the recipients to apply for relief in a self-service portal, allowing for the upload of supporting documentation and the capability to check the status of their application. What should the consultant recommend using?

- A. The consultant should recommend the Grants Management product which Includes the Grants Portal feature
- B. The consultant should recommend the Outbound Funds Module Which Includes the Grants Portal feature and the procurement for an allotment to Experience Cloud licenses so as the recipients may review their applications status
- C. The consultant should recommend the Grants Management product with the Outbound Funds Module to give the recipients the capability to review their applications status.
- D. The consultant should recommend the Outbound Funds Module Which Includes the Grants Portal feature

Answer: A

Explanation:

The consultant should recommend the Grants Management product which includes the Grants Portal feature to allow the recipients to apply for relief in a self-service portal, allowing for the upload of supporting documentation and the capability to check the status of their application. Grants Management is a prebuilt app that comes with Public Sector Solutions. It can help public sector agencies to manage the entire grant lifecycle, from application to award to reporting. Grants Portal is a component of Grants Management that can help public sector agencies to create a digital experience site for grant applicants or recipients. Grants Portal can allow the recipients to apply for relief in a self-service portal, upload supporting documentation, and check the status of their application.
