### Box 1: Connect-MgGraph

Assign Microsoft 365 licenses to user accounts with PowerShell

Use the Microsoft Graph PowerShell SDK

First, connect to your Microsoft 365 tenant.

Assigning and removing licenses for a user requires the User.ReadWrite.All permission scope or one of the other permissions listed in the 'Assign license' Microsoft Graph API reference page.

The Organization.Read.All permission scope is required to read the licenses available in the tenant.

Connect-MgGraph -Scopes User.ReadWrite.All, Organization.Read.All

### Box 2: Get-MgSubscribedSku

Run the Get-MgSubscribedSku command to view the available licensing plans and the number of available licenses in each plan in your organization. The number of available licenses in each plan is ActiveUnits - WarningUnits - ConsumedUnits.

### Box 3: Set-MgUserLicense

Assigning licenses to user accounts

To assign a license to a user, use the following command in PowerShell.

Set-MgUserLicense -UserId \$userUPN -AddLicenses @{'Skuid' = "<Skuid>"} -RemoveLicenses @() This example assigns a license from the SPE\_E5 (Microsoft 365 E5) licensing plan to the unlicensed user belindan@litwareinc.com:

\$e5Sku = Get-MgSubscribedSku -All | Where SkuPartNumber -eq 'SPE\_E5'

Set-MgUserLicense -UserId "belindan@litwareinc.com" -AddLicenses @{'Skuid' = \$e5Sku.SkuId} -RemoveLicenses @()
