Plat-Admn-202 Zertifikatsdemo & Plat-Admn-202 Exam Fragen

Sicherlich kennen Sie ExamFragen, weil es die Webseite mit höchster Bestehensrate für die Salesforce Plat-Admn-202 Zertifizierungsprüfung auf dem derzeitigen Markt ist. Sie können durch die Webseite ExamFragen ein paar kostenlosen Zertifizierungsantworten herunterladen und proben. Dann können Sie herausfinden, dass die Genauigkeit unserer Schulungsunterlagen zur Salesforce Plat-Admn-202 Zertifizierungsprüfung extrem hoch ist. Außerdem können Sie einjährige Aktualisierung genießen, nachdem Sie unsere Examsfragen gekauft haben.

Salesforce Plat-Admn-202 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Salesforce Fundamentals: This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.

Thema 2	• Business Logic and Process Automation: This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.
Thema 3	• Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.
Thema 4	• App Deployment: This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.
Thema 5	• User Interface: This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.

Salesforce Certified Platform App Builder Plat-Admn-202 Prüfungsfragen mit Lösungen (Q77-Q82):

77. Frage

Northern Trail Outfitters (NTO) has created the custom objects Trail and Park in Salesforce to track trails and parks respectively. NTO wants to track the total number of trails a park has on the park record without writing any code.

Which two actions should an app builder take to accomplish this requirement?

Choose 2 answers

- A. Use a formula field on the Park record to show the total number of trails.
- **B. Use a master-detail relationship between the Park and Trail objects.**
- C. Use a lookup relationship between the Park and Trail objects.
- **D. Use a roll-up summary field on the Park record to show the total number of Trails.**

Antwort: B,D

Begründung:

To track the total number of trails associated with a park without writing code, the correct actions to take are:

Use a roll-up summary field on the Park record to show the total number of Trails (B). Roll-up summary fields calculate and display a value in a master record based on the values of fields in a detail record. They are used to count, sum, average, or get the minimum/maximum of values in related detail records.

Use a master-detail relationship between the Park and Trail objects (C). Master-detail relationships are necessary for roll-up summary fields as they allow the master object to control certain behaviors of the detail object and summarize data from those detail records.

A formula field (A) cannot dynamically count related records unless those records are linked via a master-detail relationship, and it cannot alone handle counts across related records without such a relationship. A lookup relationship (D) does not support roll-up summaries unless combined with additional tools like triggers or third-party apps, which involve coding or extra configuration outside standard object setup.

For more details, refer to the Salesforce Help documentation on master-detail relationships and roll-up summary fields:
Master-Detail Relationship: https://help.salesforce.com/articleView?id=relationships_considerations.htm&type=5 Roll-Up Summary Fields: https://help.salesforce.com/articleView?id=fields_about_roll_up_summary_fields.htm&type=5

78. Frage

When a deal is closed- won, it has to be approved by the owner's manager prior to being added to the leaderboard for a quarterly sales competition. An opportunity is won on the last day of the quarter and the manager is on vacation.

What is recommended to ensure all of the appropriate deals are reviewed and the leaderboard is up to date?

- **A. Set up a delegated approver for the manager**
- B. Use Process Builder to assign a delegated approver.
- C. Have the manager log on and reassign the approval request
- D. Forward the approval request to the manager's assistant.

Antwort: A

Begründung:

Set up a delegated approver for the manager is the recommended solution to ensure all of the appropriate deals are reviewed and the leaderboard is up to date. According to the Salesforce documentation, "A delegated approver can approve records that are submitted for approval by users below them in the role hierarchy." Forwarding the approval request to the manager's assistant, having the manager log on and reassign the approval request, and using Process Builder to assign a delegated approver are not valid or feasible options.

79. Frage

An app builder at Cloud Kicks has been working on changes to a custom Shoe Sales app in a sandbox and is ready to deploy their changes to production with a change set. Part of the work included updates to a permission set.

What should the app builder take into consideration when deploying the change set to production?

- A. The existing permission set will be completely overwritten.
- **B. The deployed permission set will only contain changes related to the change set.**
- C. Change to field-level security in the permission set will not be applied.
- D. The deployed permission set will manage with the existing permission set.

Antwort: B

Begründung:

Reference:

Salesforce Help - Permission Sets

80. Frage

Ursa Major Solar has a lookup relationship between a custom Galaxy__c object and a custom Star__c object. An app builder wants to create a roll-up summary field that counts the total number of Star__c records related to each Galaxy__c record.

How would the current configuration impact the ability to achieve the desired result?

- A. The roll-up summary can be achieved by creating a formula field on the Galaxy__c object.
- B. A roll-up summary field will need to be created on the Galaxy__c object with a field filter that select all related Star__c records
- C. The roll-up summary can be achieved by creating a formula field on the Star__c object.
- **D. The lookup relationship will need to be converted to a master-detail relationship before a roll-up summary field can be created.**

Antwort: D

Begründung:

The lookup relationship will need to be converted to a master-detail relationship before a roll-up summary field can be created. This is correct because roll-up summary fields are only available on the master object in a master-detail relationship, and a lookup relationship does not establish a parent-child hierarchy between the objects

81. Frage

A business user wants a quick way to edit a record's status and enter a custom due date field from the record's feed in Salesforce Mobile App.

What should be used to accomplish this?

- A. Custom action
- B. Custom button
- C. Custom quick access link
- D. Custom URL formula Field

Antwort: A

Begründung:

To allow quick editing of a record's status and entering a due date from the record's feed in the Salesforce Mobile App:

A . Custom action. This option enables users to perform specific tasks directly from the record page in the Salesforce Mobile App, such as editing fields.

Steps to create a custom action:

Navigate to Setup → Object Manager → select the relevant object.

Click Buttons, Links, and Actions → New Action.

Set Action Type to 'Update a Record'.

Configure the action layout to include the Status and Custom Due Date fields.

Add the action to the Salesforce Mobile layout.

This setup provides an efficient way for users to update key fields without navigating away from the record feed.

For detailed setup instructions, see Salesforce's documentation on Creating Quick Actions.

82. Frage

.....

Der Vorhang der Lebensbühne wird jederzeit geöffnet werden. Die Hauptsache ist, ob Sie spielen wollen oder einfach weglaufen.

Diejenigen, die die Chancen ergreifen können, können Erfolg erlangen. Deshalb müssen Sie ExamFragen wählen. Sie können

jederzeit Ihre Fertigkeiten zeigen. Die Prüfungsmaterialien zur Salesforce Plat-Admn-202 Zertifizierungsprüfung von ExamFragen ist

die effiziente Methode, die Plat-Admn-202 Prüfung zu bestehen. Mit Plat-Admn-202 Zertifikat können Sie Ihren Traum

verwirklichen und Erfolg erlangen.
