Trusted CCPenX-Az Exam Resource | CCPenX-Az Latest Exam Preparation

Our PDF version of our CCPenX-Az exam practice guide is convenient for the clients to read and supports the printing. If the clients use our PDF version they can read the PDF form conveniently and take notes. The CCPenX-Az quiz prep can be printed onto the papers. If the clients need to take note of the important information they need they can write them on the papers to be convenient for reading or print them on the papers. The clients can read our CCPenX-Az Study Materials in the form of PDF or on the printed papers. Thus the clients learn at any time and in any place and practice the CCPenX-Az exam practice guide repeatedly.

The SecOps Group Certified Cloud Pentesting eXpert - Azure Sample Questions (Q24-Q29):

NEW QUESTION # 24

You've uncovered valid credentials for another user in the previous step. Authenticate as this user and investigate their level of access within the Azure environment. Which of the following Microsoft Entra ID roles is assigned to this user?

- A. Groups Administrator
- **B. User Administrator**
- C. Helpdesk Administrator
- D. Password Administrator

Answer: B

Explanation:

Detailed Solution:

Log in using the credential recovered in Q4.

```
az login -u sumit.siddharth@azuresecops.onmicrosoft.com -p '< recovered-password >' Confirm the current signed-in user:
```

```
az ad signed-in-user show --output json
```

Now enumerate the user's Microsoft Entra ID role memberships through Microsoft Graph.

```
az rest --method GET \
```

```
--url "https://graph.microsoft.com/v1.0/me/memberOf" \
```

```
--output json
```

To display only role names:

```
az rest --method GET \
```

```
--url "https://graph.microsoft.com/v1.0/me/memberOf" \
```

```
--query "value[].displayName" \
```

```
--output table
```

The relevant role is:

User Administrator

This role is dangerous because it can manage users and reset passwords for many non-privileged users. That is exactly why the next task asks you to abuse directory-level privileges to compromise another user.

Final answer:

B). User Administrator

NEW QUESTION # 25

The compromised service principal has Contributor access to a resource group but no direct Key Vault data- plane role. Can it immediately read Key Vault secret values?

- A. Yes, Contributor includes secret read permissions
- B. Yes, if the vault is in the same resource group
- C. No, service principals cannot access Key Vault
- **D. No, Contributor does not automatically grant Key Vault secret data-plane read**

Answer: D

Explanation:

Detailed Solution:

Contributor allows broad management-plane operations but does not inherently grant secret-value retrieval from Key Vault data plane.

Test secret read:

```
az keyvault secret show \
```

```
--vault-name kv-finance-prod \
```

```
--name db-password \
```

--query value \

--output tsv

Expected failure:

Forbidden

Correct answer:

B). No, Contributor does not automatically grant Key Vault secret data-plane read Key Vault access can be controlled by Azure RBAC or access policies, and secret read requires appropriate data-plane permission.

NEW QUESTION # 26

A compromised developer account has Reader access to a resource group. Enumerate all Azure resources in that resource group and identify the exposed App Service name.

Answer:

Explanation:

See the Answer in Explanation below.

Explanation:

finance-reporting-api

Detailed Solution:

Set the resource group:

RG= " rg-prod-apps-eastus "

List resources:

az resource list \

--resource-group " \$RG "\

--output table

Expected output:

Name ResourceGroup Location Type

----- finance-reporting-api rg-prod-apps-eastus
eastus Microsoft.Web/sites prod-reportstore01 rg-prod-apps-eastus eastus Microsoft.Storage/storageAccounts kv-finance-prod
rg-prod-apps-eastus eastus Microsoft.KeyVault/vaults The exposed App Service is:
finance-reporting-api

NEW QUESTION # 27

From inside the App Service environment, request an Azure Resource Manager token using the managed identity endpoint. Which resource value should be requested for Azure Resource Manager access?

- A. <https://graph.microsoft.com/>
- B. <https://management.azure.com/>
- C. <https://storage.azure.com/>
- D. <https://vault.azure.net/>

Answer: B

Explanation:

Detailed Solution:

For Azure Resource Manager API calls, the token audience/resource must be:

<https://management.azure.com/>

Inside App Service Kudu/console, request the token:

curl " \$IDENTITY_ENDPOINT?api-version=2019-08-01 & resource=https://management.azure.com/ " \

-H " X-IDENTITY-HEADER: \$IDENTITY_HEADER "

The response contains:

```
{  
  "access_token " : "<jwt-token> ",  
  "resource " : "https://management.azure.com/ ",  
  "token_type " : "Bearer "  
}
```

Correct option:

B). <https://management.azure.com/>

NEW QUESTION # 28

Inside the public blob container, a file named backup-config.json contains service principal credentials. What field contains the App Registration client ID?

- A. clientSecret
- B. objectId
- C. clientId
- D. tenantId

Answer: C

Explanation:

Detailed Solution:

Download the blob:

```
az storage blob download \  
--account-name prodreportstore01 \  
--container-name public-backups \  
--name backup-config.json \  
--file backup-config.json \  
--auth-mode login
```

Read the file:

```
cat backup-config.json
```

Expected structure:

```
{  
  "tenantId": "8f34c1de-1198-4c2a-b1a8-1eaa72f6e99a",  
  "clientId": "c5fba7db-5e61-45bc-8944-3cd457bb19c2",  
  "clientSecret": "REDACTED"  
}
```

The App Registration application/client ID is stored in:
clientId

NEW QUESTION # 29

.....

With a CCPenX-Az certification, you can not only get a good position in many companies, but also make your financial free come true. Besides, you can have more opportunities and challenge that will make your life endless possibility. We promise you that CCPenX-Az Actual Exam must be worth purchasing, and they can be your helper on your way to get success in gaining the CCPenX-Az certificate. Come and you will be a winner!
